What does the book contain?
This book is updated for the new Cambridge English: Advanced examination introduced in 2015 and contains two sections: Grammar (Units 1–25) and Vocabulary (Units 26–45).

What does the book aim to do?
This book aims to provide complete coverage of the grammar and vocabulary needed for success in the Cambridge English: Advanced, also known as the Certificate in Advanced English (CAE). Regular exam practice is provided throughout the book.

Units 1–25 present grammar in context followed by a detailed analysis of the language for advanced learners of English. Units 26–45 extend vocabulary knowledge – including of collocations and idioms – and introduce ways of studying vocabulary which will help you pass the exam.

Who is the book aimed at?
This book is for anyone preparing for success in the Cambridge English: Advanced. It is designed primarily for students working alone who want to revise, extend and practise their knowledge and understanding of grammar and vocabulary, but it can also be used on a Cambridge English: Advanced preparation course in the classroom, or can be set as homework by a teacher.

How do I use the book?
You can work through the units in any order, but we advise you to study every unit if you want to prepare thoroughly for the exam. It is best to work through a unit from beginning to end, as exercises may revise grammar or vocabulary from an earlier part of the same unit.

Each of the 25 units in the Grammar section is divided into three sections. Context listening introduces the grammar of the unit in context to help you understand it more easily. Grammar provides detailed explanations of specific grammar points and includes Start points which act as a brief reminder of grammar you may already know. Grammar exercises provide practice of the grammar of each unit.

Each of the 20 units in the Vocabulary section is based on a general topic (e.g., Cities) and presents general exercises on vocabulary for two areas within the main unit topic (e.g., Urban growth and Urban living).

Each unit of the book includes an Exam practice section which provides practice of the types of tasks you will face in the Reading and Use of English, Writing and Listening sections of the Cambridge English: Advanced examination. Note: Some of the Exam practice tasks test mainly the grammar or vocabulary taught in the same unit, to give extra practice. However, in the real exam each question tests a different grammar/vocabulary point or a different aspect of language.

The Answer key contains answers to all the exercises in the book, including alternative answers where more than one correct answer is possible.

What does this symbol mean? 
This symbol appears in the Error warning! boxes of the Vocabulary section and indicates that the errors were found in the Cambridge Learner Corpus, a database made up of many thousands of exam scripts written by students taking Cambridge English exams around the world. The exam practice tasks have been informed by the English Vocabulary Profile. The English Vocabulary Profile is an online resource with detailed and up-to-date information about the words, phrases, phrasal verbs and idioms that learners of English know at each of the six levels of the Common European Framework (A1 to C2), which guarantees suitable treatment of words, phrases and phrasal verbs at C1 level.

When should I use a dictionary?
To get the most out of the Vocabulary section, you will need a good dictionary. Use the Cambridge Advanced Learner’s Dictionary or another suitable monolingual dictionary. You should try to do each vocabulary exercise without a dictionary first, then use your dictionary to help you with answers you didn’t know. Use the Answer key as a final check. When you see the dictionary symbol, you are advised to use a dictionary to complete the exercise.

What material can I find online?
The following material for use with this book can be found online at www.cambridge.org/grammarvocabularyadvanced:

- Audio recordings for all listening exercises and for exam practice Listening tasks
- Complete Recording scripts for each audio file
- Reference notes which give further information and support on the grammar and vocabulary in this book
- Wordlists for key items in the Vocabulary section
- Model answers to the Exam practice: Writing tasks Parts 1 and 2

Context listening

1.1 You are going to hear part of a radio phone-in programme. Before you listen, look at the photos. What do you think the topic of the phone-in is?

1.2 Listen and check whether you were right. As you listen, answer the questions.

Which of the callers, Karen, Liam, Sahar or Lula ...

1 ... lost something on the train one day? ____________
2 ... travels to work by bus? ____________
3 ... works at home permanently? ____________
4 ... may buy a motorbike? ____________
5 ... has always liked travelling by train? ____________
6 ... used to catch the train at a quarter past seven in the morning? ____________
7 ... is working at home temporarily? ____________
8 ... has never owned a car? ____________

1.3 Listen again and fill in the gaps.

1 I ____________ to London for over ten years.
2 I ____________ over an hour when they announced that the train was cancelled.
3 I ____________ of buying a motorbike.
4 I ____________ at home while our office block is being renovated.
5 I ____________ to her only a couple of times before then.
6 I ____________ travelling by train ever since I was young.
7 I ____________ to phone in to your programme for the last half hour.
8 Yesterday, I ____________ all my work by 2.30 pm.

1.4 Identify the tenses you used in 1.3.

1 - past simple

## 2.1 Simple and continuous tenses

### START POINT

<table>
<thead>
<tr>
<th>Present continuous</th>
<th>Past continuous</th>
<th>Present simple</th>
<th>Past simple</th>
</tr>
</thead>
<tbody>
<tr>
<td>I'm working at home while our office block is being renovated. (= temporary state)</td>
<td>I was travelling home when the train broke down. (= action in progress at past point)</td>
<td>Public transport has a number of advantages over driving (= permanent state)</td>
<td>I sold my car last week. (= completed past action)</td>
</tr>
<tr>
<td>I'm phoning from the train. (= action in progress)</td>
<td>I drove to work for a couple of years. (= past situation that doesn't exist now)</td>
<td>I catch the train at 7.05 at the station near my home every morning. (= habit or regular event)</td>
<td>I caught the train every morning at 7.15. (= repeated past action)</td>
</tr>
</tbody>
</table>

We usually use simple tenses with verbs that describe an unchanging state rather than an action:

*I love trains.*

We can use continuous tenses with state verbs to suggest that a situation is temporary or untypical:

*I'm appreciating being able to get up later than usual. (= suggests a temporary arrangement)*

*Now that I work at home I appreciate being able to get up late. (= suggests a more permanent arrangement)*

With some verbs that describe mental states (e.g. consider, understand) and attitudes (e.g. hope, regret), continuous tenses suggest a process going on at the time of speaking, or emphasise that the process continues to develop:

*I'm regretting selling my car already. (= suggests that I have started to regret it and that this regret may grow)*

*I regret selling my car. (= describes an attitude that is unlikely to change)*

Some verbs have different meanings when talking about states and describing actions:

*I'm now thinking of buying a motorbike. (think of (action) = consider)*

*Do you think that's a good idea? (think (state) = asking about an opinion)*

We usually use the present simple with verbs that describe what we are doing as we speak:

*I admit that it can be frustrating at times. (= I agree that it is true when I say 'I admit')*

*I predict that increasing numbers of people will start working at home.*

We often use the past simple in a narrative (e.g. a report or a story) to talk about a single completed past action, and the past continuous to describe the situation that existed at the time:

*I dropped my purse while I was getting off the train.*

When we talk about two or more past completed actions that followed one another, we use the past simple for both:

*She woke me up and offered me a lift.*

When we talk about two actions that went on over the same period of past time, we can often use the past continuous or the past simple for both:

*I was listening to music while I was driving here. or I listened to music while I drove here.*

We can use continuous tenses with the adverbs always, constantly, continually and forever to emphasise that something is typical of a person, group or thing because they do it so often:

*I was forever arriving late for work.*
We can use either the present continuous or present simple to describe something we regularly do at a certain time:
At 8 o'clock I'm usually having a leisurely breakfast. or At 8 o'clock I usually have ...

We often use the present continuous or past continuous:
• to make an enquiry or a statement less certain because we don’t know if we’re right:
  I'm hoping we've got Dave Jones on the line. (= suggests that the speaker is not sure whether Dave Jones is there)
• to make a request or an offer more polite:
  Karen, were you wanting to say something?

### 2.2 Perfect tenses

#### START POINT

**Present perfect**
I've lived in Spain, and the trains are so much more reliable there. (past situation relevant to the present)
I've just sold my car and so now I go to work by bus. (recent action with consequences for the present)
I've enjoyed travelling by train ever since I was young. (situation continuing until the present)

**Past perfect**
This morning I'd read a couple of reports before I got off the train. (past event before another past event)

We use the present perfect to talk about a situation that existed in the past and still exists now, and the past simple when the situation no longer exists:
I've commuted to London every weekday for over ten years, and I actually enjoy it.
I commuted to London every weekday for over ten years before I started working at home.

We use the present perfect to talk about a repeated action that might happen again:
I've arrived late for work twice this week so far.

and the past simple for a repeated action that won’t happen again:
I arrived late for work twice this week. (= the working week is over; I won’t arrive late again this week)

When we give news or information, we often introduce a topic with the present perfect and then give details with other past tenses:
The new high speed rail link between the north of England and the Channel Tunnel has opened.
It took 15 years to build and cost nearly ten billion pounds.

When we use a time expression (e.g. after, as soon as, before, when) to say that one event happened after another, we can use either the past simple or past perfect for the first event:
I'd read a couple of reports before I even got to work. or I read a couple of reports before I even got to work.

### 2.3 Present perfect continuous and past perfect continuous

We use the present perfect continuous (have been + -ing) to talk about an action in progress in the past for a period until now, and which is either still in progress or recently finished:
I've been working at home for the last five years. (= action still in progress)
Sorry I'm late. I've been trying to find a parking place. (= action recently finished)

We often prefer the present perfect continuous to say how long an action has been in progress:
I've been trying to phone in to your programme for the last half hour.

We use the present perfect to talk about a completed action or series of actions when we are interested in the result:
I've called the bus company a number of times to complain.
They've bought new trains and have really improved the service.
We use the past perfect continuous (had been + -ing) to talk about an action in progress over a period up to a particular past point in time:

I'd been waiting over an hour when they announced that the train had been cancelled.

If we are not interested in how long the action went on, we often use the past continuous rather than the past perfect continuous:

I was waiting on the platform when they announced that the train had been cancelled, rather than

I'd been waiting on the platform when ... (= there is no mention of how long the person was waiting.)

We use the past perfect when we say how many times something happened in a period up to a particular past time:

I'd spoken to her only a couple of times before then.

We don't usually use the present perfect continuous or the past perfect continuous to describe states:

I'd owned a car ever since I left college. (not I'd been owning ...)

Planets beyond our solar system

Throughout history we have wondered about the possibility of life beyond the Earth. It is only in recent years, however, that advances in technology revealed the existence of extrasolar planets (or 'exoplanets'); is to say, planets which orbit not our own Sun, but other stars in the universe. So, astronomers have identified a few thousand exoplanets, but believe that billions more exist.

Although many astronomers believe that a large number of planets in the universe are capable of supporting kind of living organism, whether or not life has developed on any of them not yet known. An essential requirement for life is liquid water. a planet is to have liquid water on its surface, its temperature must be too hot nor too cold. However, a planet, other than the Earth, has yet to be discovered.
The future

Will, be going to + infinitive, shall; present tenses for the future; future continuous, future perfect and future perfect continuous; be to + infinitive; future in the past

6. _________ you stop over anywhere on the way out?
7. When I come to see you, you _________ in California for nearly six months.
8. You _________ longer, won't you?

1.4 How many different ways of referring to the future did you use in 1.3? ____________
2 The future

Grammar

2.1 Will, be going to + infinitive and shall

**START POINT**

**Will**
I think I'll fly directly to Los Angeles. (= a decision made without planning)
I'm sure you'll have a fantastic time. (= a prediction based on opinion or experience)
I'll be 21 on 2nd January. (= a fact about the future)
I'll meet you at the airport. (= willingness)

**Be going to + infinitive**
First I'm going to stay with Daniel and Susanna. (= a decision already made)
The cloud's building up. It's going to rain this afternoon. (= a prediction based on outside evidence)

We can sometimes use will instead of be going to to make a prediction based on evidence, but when we do, we usually include an adverb:
The cloud's building up. It'll definitely rain / It's definitely going to rain this afternoon.

We can use will or be going to in the main clause of an if-sentence with little difference in meaning when we say that something is conditional on something else:
If I don't go now, I'll be / I'm going to be late for my next lecture.

We use will, not be going to, when the main clause refers to offers, requests, promises and ability:
If my plans change, I'll let you know, of course. (= promise)
if you bring your tent, we'll camp on the coast for a few days. (= ability; 'we will be able to camp')

In formal contexts, we can use shall instead of will with I or we:
- in questions that ask about intentions:
  Shall I/we see you before you leave? (= Will I/we have the opportunity to see you?)
- in statements about the future, although will is more usual:
  When I finish my course I shall/will have some time to travel around America.

2.2 Present continuous and present simple for the future

**START POINT**

**Present continuous**
I'm spending a few days sightseeing. (= event intended or arranged)

**Present simple**
Lectures start on 27th July. (= event as part of an official schedule)

Compare the use of the present continuous for the future and be going to:
I'm flying on 15th July at ten in the evening. (= already arranged)
I'm going to fly up there if it's not too expensive. (= the speaker intends to fly but has not made the arrangements yet)

We tend to avoid be going to go and use the present continuous (be going to) instead:
Then I'm going to San Francisco. rather than Then I'm going to go to San Francisco.

We can't use the present continuous for future events which are not controlled by people:
It's going to rain this afternoon. (not It's raining this afternoon.)
We can use either the present simple or will to talk about formal arrangements made by, for example, a university or company:

*The semester begins on 7th December.* or *The semester will begin on 7th December.*

The present continuous is used in informal arrangements:

*You're not staying with them the whole time, then? (= informal arrangement) (not You don't stay with them the whole time, then?)*

We use the present simple, or sometimes other present tenses, to refer to the future in time clauses with a conjunction (e.g. after, as soon as, before, by the time, when, while, until); in conditional clauses with if, in case, provided and unless; and in clauses beginning with suppose, supposing and what if:

*As soon as I book my tickets, I'll let you know.* (not As soon as I will book ...)

*It'll be good to know I can contact them in case I have any problems.* (not ... in case I will have ...)

*What if I don't like it?* (not What if I won't like it?)

### 2.3 Future continuous, future perfect and future perfect continuous

We use the future continuous (*will be* + present participle) to talk about something predicted to happen at a particular time or over a particular period in the future:

*I'll be studying really hard during the semesters.*

We use the future perfect (*will have* + past participle) to make a prediction about an action we expect to be completed by a particular time in the future:

*By the time you come I'm sure I'll have got to know the city really well.*

We use the future perfect continuous (*will have been* + present participle) to emphasise the duration of an activity in progress at a particular point in the future:

*When I come to see you, you'll have been living in California for nearly six months.*

We can also use the future continuous, future perfect and future perfect continuous to say what we believe or imagine to be true:

*Dad won't be using his car, so I'm sure it's okay to borrow it.* (= an activity happening now or at a particular point in the future)

*They'll have forgotten what I look like.* (= an event that took place before now or before a particular point in the future)

*My plane's been delayed. Daniel and Susanna will have been waiting for me at the airport for hours.* (= an activity continuing to now)

### 2.4 Be to + infinitive

Be to + infinitive is commonly used:

- in news reports:
  *Extra lifeguards are to be posted at the beach after a shark was seen close to the shore.*

- to talk about formal plans, and rules or instructions:
  *Students are to hand in project reports at the end of semester two.* (active)
  *Project reports are to be handed in at the end of semester two.* (passive)

We only use *am/is/are to + infinitive* to talk about future events that people can control:

*The weather will still be warm even in winter.* (not The weather is still to be warm.)

We often use *be to + infinitive* in *if*-clauses when we mean 'in order to':

*If she is to get a good grade in her project report, she needs to work on her statistics.* (= in order to get a good grade, she needs to work on her statistics)
The future

2.5 Future in the past

A number of forms can be used to talk about a past activity or event that was still in the future from the point of view of the speaker:

I was going to see an aunt in Seattle a couple of years ago, but I cancelled the trip because she got ill. (= a plan that didn’t happen)

I knew I would be feeling awful by the end of the flight. (= a prediction made in the past)

Job interviews: expert advice for graduates

Are you a graduate about to apply for jobs? We asked five career consultants to give some tips on performing well in interviews.

Consultant A

Ask recruiters what disappoints them most about the people they interview and the answer is often the same — lack of knowledge of their organisation. And lack of knowledge suggests lack of interest. You will have learned research skills in your university degree, so apply them to job hunting and don’t forget that social networks can also provide a lot of inside information. Find out how the organisation you are applying for has developed in recent years, how its products or services and markets have changed, who its competitors are, what its ethos is. Then use that information intelligently — simply regurgitating facts won’t impress the interviewers. Instead, you need to demonstrate an understanding of what it all means for you as a prospective employee, what the challenges would be and the skills and attributes you’ll need to make a positive contribution.

Consultant B

Three-quarters of interviews are failed within three minutes of entering the room. Interviewers are put off by weak handshakes, a lack of eye contact, poor body language and poor posture (slumped shoulders suggest a lack of confidence). Many recruiters make early judgements about your trustworthiness, likeability and professionalism and spend the rest of the interview confirming these opinions. You should shake hands firmly and warmly, but wait to be invited to sit down. Strong handshakes communicate sociability and friendliness — normally desirable qualities in candidates — whereas weak handshakes may communicate introversion and shyness. At the start of the interview you should smile at and maintain good eye contact with the interviewer. Take a little time to consider your response to what the interviewers ask before speaking. Then, when you have decided what to say, speak clearly and not too fast.

Consultant C

Inevitably, you will be asked at some stage during the interview why you want to work for the organisation you are applying to. This is a great chance to show your business awareness, but you’ll need to prepare. Before the interview, contact one of the organisation’s customers — you should be able to identify some through an internet search — and ask them questions such as: ‘What’s it like to do business with company X?’ ‘What makes them stand out?’, ‘What makes them successful (or not)?’ And then at interview explain the research that you’ve done and include their customer’s responses in your answers. That way you’ll stand out from the crowd; not only will you give evidence of your personal enterprise and your genuine interest in the organisation, but also your understanding of the business world.

Consultant D

Most employers will want you to demonstrate a particular set of abilities which they believe are essential to the job role, for example team work, communication, problem solving and time management. At interview, you are likely to be asked to give specific examples of times when you have demonstrated those abilities. Employers recognise that you might not have lots of directly relevant work experience, so when they ask these questions they will usually be happy for you to provide examples from any aspect of your life, such as your studies, part-time work, volunteering, interests or extra-curricular activities. So before you go to an interview, check the job description for the skills and competencies required, then reflect on your experiences and think about examples that you could use as evidence.

Consultant E

It’s natural to be nervous, but if an employer thought you weren’t good enough, they simply wouldn’t waste their time on getting to know you in an interview. What interviewers aim to do is find out whether what’s written in your application is genuine and how well you’ll fit in. So the best advice I can give is: just be yourself in the interview. Of course, they’ll also be testing your understanding, motivation and ability, most often by asking you to talk them through examples of your practical knowledge that show you have the expertise the job requires. You’ll need to expand on what you’ve written and it’s a good idea to have some new examples ready, too.
Look at these newspaper headlines and photos. What do you think the stories are about?

Can/could
We'll get wealthy people from the mainland who can afford second homes. (= general ability)
Before the bridge was built we could only get to the island by ferry. (= general ability in the past)

May/could/might
Up to 100,000 people may experience delays. (= it's possible this will happen)
Air passengers could be hit badly today. (= it's possible)
It might be a number of months before the sports centre is back in operation. (= it's possible this is true; less certain than may or could)

Will/would
That will push up house prices. (= prediction about the future)

If schools highlighted the importance of physical exercise, this would have a major positive impact on children's attitudes to sport. (= prediction about an imaginary situation)

Must
The cabin staff must accept the new working conditions. (= a rule or order)
This negative attitude to sport mustn't be allowed to continue. (= it's not allowed or not a good idea)

Don't need to / needn't / don't have to
Parents don't need to / needn't be very interested in sport themselves. (= it's not necessarily true)
I'm sure I don't have to spell out the chaos being caused in the airline industry. (= it's not necessary)

Ought to / should
Parents ought to / should give their children whatever encouragement they can. (= obligation and recommendation)

2.1 Can, could, be able to: ability

We can use be able to instead of can or could, particularly in more formal contexts:
The hotels on the island are able to accommodate hundreds of visitors. (more formal) or The hotels on the island can accommodate ... (less formal)

We use be able to to talk about ability on a specific occasion in the past:
Firefighters were able to bring the fire under control fairly quickly. (not Firefighters could bring ...)

We can use either could or be able to in negatives in the past:
They couldn't / weren't able to prevent the fire damaging the school's sports centre.

We usually prefer can or could with verbs of sense (e.g. feel, hear, see, smell, taste) and verbs of thinking
(e.g. believe, remember, understand):
I can't believe Mr Wade is being so confrontational.

We use be able to in perfect tenses, -ing forms, infinitives and after modal verbs:
We've now been able to contact him.
The film star hates not being able to leave her house.
They've got to be able to adapt to change.
Parents might be able to help.

We prefer can and could in passives:
The news can be read on our website.

To talk about a future ability, we use will be able to:
Islanders won't be able to buy properties.
We use can or be able to to talk about possible future arrangements and can (or more politely could) to ask for permission:
The President can't / is not able to visit the country until next month.
*Can/Could I ask you what you think of the new bridge?*

### 2.2 May, might, can, could: possibility

To talk about a more general possibility of something happening we can use can or may:
The temperature in the mountains can/may fall below freezing even at this time of year.

We use could to say that something was possible in the past:
*It could be a very rough journey, too.*

We don't use may to ask questions about the possibility of something happening. Instead we use could or the phrase be likely to:
*Could the negotiations finish today, do you think?*
*What time is the meeting likely to finish?*

Might is sometimes used in questions, but is rather formal.

We can use these modals in negative sentences, including those with words like only or hardly, to say that things are not possible or that it is possible that things are not the case:
The company can hardly be described as a success. (= it is not possible to describe it as a success)
*I think we should call off the strike, but other people may/might not agree with me.* (= it's possible that people don't agree with me)

### 2.3 Will, would, used to: conclusions, willingness, habitual events

We can use will to draw conclusions or state assumptions about things we think are true:
*No doubt you will have heard the news by now.*

We use will (not) to talk about (un)willingness or refusal to do something:
The minister says he will resign if no solution is found.
*We will not be bullied by management.*

The computer won't let me print documents. (We can say that inanimate objects, such as machines, can be unwilling or refuse to do something.)

We use would to talk about willingness in the future, in conditionals, and when we say that we are willing but unable to do something:
*Many people would be happy to pay higher taxes for better public services.*

The minister would be pleased to accept the invitation if it were not for other commitments.

We don't use would to talk about willingness on a specific occasion in the past:
*David Wade agreed to meet the union representatives.* (not *David Wade would agree ...*)

We can use will (present) and would (past) to talk about characteristic behaviour or habits, or about things that are true now or were true in the past:
*Some parents will actually discourage their children from taking up a sport.*

Many passengers would get seasick during the crossing.

We can use either would or used to to talk about things that happened repeatedly in the past:
*The crossing would/used to take over an hour at least.*

We don't use would to talk about past states:
*We used to be terribly isolated here because the ferry service was so bad.* (not *We would be terribly isolated ...*)
2.4 Must, have (got) to: necessity, deduction

We can use either must or have to to say that it is necessary to do something, although have to is less formal and is also preferred in questions:

The cabin staff must / have to accept the new working conditions if the airline is to compete.

When we say that something was necessary in the past we use had to, not must:

Up to 200 teachers and pupils had to be evacuated from a school in South Wales today.

To say something is necessary in the future we use will have to:

To stay in business we will have to cut our costs.

We use must when we decide that, in our opinion, something is necessary or important:

I must give you my email address.

Have to suggests that the necessity comes from outside; for example, from a rule or official order:

The council has to close two city centre car parks following a health and safety report.

We usually use must, rather than have to, when we conclude that something (has) happened or that something is true.

The bridge must have cost a fortune.

When we conclude that something is impossible, we use can't or couldn't:

That can't be right, surely? (not That mustn't be right, surely?)

Sometimes we can use either have to or have got to, although have got to is more informal. We use have to with frequency adverbs and with other modal verbs:

Islanders normally have to queue for half an hour to get on the ferry.

The airlines will have to return to the negotiating table.

If have is contracted (e.g. I've), then we must include got:

They've got to be changed. (not They've to be changed)

When we use the past simple we prefer had to rather than had got to:

The manager seemed to be doing a good job. Why did he have to go? (not Why had he got to go?)

2.5 Didn't need to, didn't have to, needn't have: 'not necessary'

To say it was not necessary to do something in the past, we use didn't need to or didn't have to:

He didn't have to wait long for a response. (= he didn't actually wait long)

When we think something that was done in the past was not necessary, we use need not (needn't) have:

The event organisers expected the bad weather to affect ticket sales. However, they need not have worried, as every ticket was sold. (= they worried but it was not necessary)

2.6 Should, ought to: obligation

We can often use either should or ought to to talk about obligation (in giving advice and recommendations, saying what we think is a good idea and talking about responsibility):

I think we ought to / should keep Borland for the islanders! (= it's a good idea)

The authorities ought to / should prosecute companies that cause pollution. (= talking about responsibility)

We can use either should or ought to to say that something is likely because we have planned it or expect it to happen:

They say the road will be ready in five years, but they should / ought to be able to build it faster.

We use shouldn't rather than oughtn't to if something is unlikely:

If you're in the south of the country, you shouldn't be troubled by any rain today.

   B: I wish I was able to / could trust her.
8 This camera is a bit cheaper than the other one, but it mightn't / can't be as good, of course.

3.2 Amir is talking to Martha just before and after a job interview. Choose the correct verb.

Before the interview

A: What time (1) have you to / have you got to / must you be there by?
M: 10.30.
A: You (2) must / have to / have got to be really nervous.
M: Terrified! But it doesn't matter, I know I won't get the job.
A: You (3) haven't got to / mustn't / can't be sure of that. You've got just the right experience and qualifications.
M: But I feel tense. I'm worried I (4) can't / couldn't / mightn't make a good impression in the interview.
A: I'm sure you'll be okay.

After the interview

M: I got it!
A: Congratulations! What (5) had you got to / must you / did you have to do?
M: Well, mainly I (6) had got to / had to / must tell them why I wanted to work there.
A: And does the job sound good?

M: No, and I may (9) must / have to / have got to spend some time in Barcelona.
A: Well, I think we should certainly go out for a meal to celebrate.
M: Great idea.

3.3 Choose the correct sentence ending. Sometimes both are possible.

1 I have to get up early tomorrow, so I ...
   a mustn't be too late going to bed tonight.
   b don't need to be too late going to bed tonight.
2 When we got to the station, we found that the train was half an hour late, so we ...
   a didn't need to rush after all.
   b needn't have rushed after all.
Modals (1)

3 The meeting will be quite informal, so you ...
   a don't need to wear a suit.
   b don't have to wear a suit.

4 Fortunately, he wasn't badly hurt in the accident, so he ...
   a needn't go to hospital.
   b didn't need to go to hospital.

5 Gwen has lost a lot of weight during her illness, so you ...
   a needn't look surprised when you see her again.
   b mustn't look surprised when you see her again.

6 The tennis courts are open to the public, so you ...
   a needn't be a member of the club to play here.
   b mustn't be a member of the club to play here.

7 The house was in good condition when I bought it, so I ...
   a didn't need to decorate before I moved in.
   b didn't have to decorate before I moved in.

8 As it turned out, the exam was quite easy, so I ...
   a didn't have to spend all that time revising.
   b needn't have spent all that time revising.

3.4 Match a sentence beginning with one of the endings. You won't need to use all the endings.

1 I said I'd pay for her ticket but she ...
   a could cause dangerous driving conditions.
   b shouldn't take me too long.

2 In just a few years from now people ...
   c can do 3D printing in their own homes.
   d wouldn't accept my offer.

3 I still remember how they ...
   e would play together so well as children.
   f would be a school.

4 Forecasters are warning that heavy snow ...
   g will be able to control their car using an app.
   h used to belong to a politician.

5 Here's some really nice cheese that I don't think you ...
   i will have tasted before.
   j might have tried.
Listening Part 1

You will hear three different extracts. For questions 1 – 6, choose the answer (A, B or C) which fits best according to what you hear. There are two questions for each extract.

Extract One

You hear two people on a radio programme discussing music education for children.

1. They agree that young children should
   A. learn an instrument that requires a lot of concentration.
   B. be started on instruction at an early age.
   C. focus largely on music theory.

2. What does the woman say about the piano?
   A. It is not possible to play simple tunes on it.
   B. Playing it can discourage children from learning another instrument.
   C. Most young children are not mature enough to learn it.

Extract Two

You hear part of an interview with a rock climber called Ben.

3. In Ben's view, what is the best way to improve as a climber?
   A. take the advice of other climbers
   B. learn from the mistakes you make
   C. watch more experienced climbers

4. Why does Ben prefer not to climb alone in icy conditions?
   A. He can learn new techniques from other people.
   B. He gets nervous when rocks have ice on them.
   C. He lacks experience of climbing on ice.

Extract Three

You hear part of an interview with a restaurant critic called Amanda Downing.

5. How do most waiters react when they realise who Amanda is?
   A. They give her special attention.
   B. They are overcome with nerves.
   C. They provide her with free food.

6. In what way, according to Amanda, are most restaurant owners completely wrong?
   A. They think customers choose a restaurant only for its quality of service.
   B. They don't understand customers' motivation for eating in restaurants.
   C. They think their priorities are different to those of their customers.
Listen again and match the sentence beginnings and endings.

1. Anybody trying to do that would
2. After that they might
3. So someone else must
4. Do you think he might
5. But of course, he might
6. I suppose he could
7. The driver must
8. The forensic team should

a. have opened the door from the inside.
b. be hiding some information from us.
c. have been seen from the street below.
d. have finished examining the building by now.
e. have been expecting them and that he was part of the gang?
f. have been lowered by rope from the roof.
g. have been waiting nearby.
h. be lying.

1.3 Which of the sentences in 1.2 include these grammatical patterns?

1. modal verb + have been + past participle
2. modal verb + have + past participle
3. modal verb + have been + present participle
4. modal verb + be + present participle

1e: (would have been seen)
Grammar

2.1 May / might / could + be + present participle; may / might / could + have + past participle

START POINT

But of course, he might be lying. (not But of course, he can be lying.) (= in the present: it’s possible he’s lying)
They could have got in through a window up on the fourth floor. (= in the past: it’s possible they got in)

With a future time reference we can use may / might / could + be + present participle and may / might / could + have + past participle to say it is possible that something will happen in the future:
Nik’s flight was cancelled, so he may/might/could be arriving much later than expected.
The thieves may/might/could have left the country by the time we get to the airport.

2.2 May / might / could + have been + present participle

We can use may/might/could + have been + present participle to talk about situations or activities that were possibly happening at a particular past time:
Do you think he might have been expecting them?

2.3 Would / will + have + past participle

We use would have + past participle to talk about an imaginary past situation:
People would have seen them from the street below.
To show that we think a past situation actually happened, we use will have + past participle:
If they smashed a window to get in, people living nearby will certainly have heard something.

2.4 Should / ought to + have + past participle

We use should / ought to + have + past participle to talk about something that didn’t happen in the past, particularly when we want to imply some regret or criticism:
He must know that he ought to have called the police as soon as he found the door open.
We should have been contacted earlier. (passive)
We can also use should / ought to + have + past participle to talk about an expectation that something happened, has happened, or will happen:
The forensic team should have finished examining the building by now.

2.5 Must / can’t / couldn’t + have + past participle

START POINT

So someone else must have opened the door from the inside. (active)
It must have been opened from the inside. (passive)
We can use must have + past participle to draw a conclusion about something in the past.

To draw a conclusion about a past event, saying that it was not possible, we use can’t have + past participle or couldn’t have + past participle:
One man alone couldn’t have carried all those paintings. (not ... mustn’t have carried ...)

33
4 Modals (2)

To draw a conclusion about something happening at a particular past time, saying that it was likely or certain, we use must have been + present participle:

\[ \text{The driver must have been waiting nearby.} \]

2.6 Must be + present participle

We can use must be + present participle to draw a conclusion about something happening around the time of speaking. We can use must be + present participle or must be going to to draw a conclusion about something likely to happen in the future:

\[ \text{I'll speak to the curator of the museum later. She must be feeling devastated.} \]
\[ \text{They're taking the head cleaner to the police car. They must be going to arrest him. or They must be arresting him.} \]

2.7 Dare and need

<table>
<thead>
<tr>
<th>START POINT</th>
</tr>
</thead>
<tbody>
<tr>
<td>He gets annoyed easily, so I daren't criticise him. / A good car needn't cost a lot.</td>
</tr>
<tr>
<td>She dared me to jump across. / We need to talk to them.</td>
</tr>
<tr>
<td>Dare and need can be used either as modal verbs (+ bare infinitive) or ordinary verbs (+ to-infinitive).</td>
</tr>
</tbody>
</table>

As modals, dare and need are mostly used in negative contexts. We can use either dare to or dare (without to) when it is not followed by not:

\[ \text{But no one would have dared (to) climb up the outside of the building.} \]
\[ \text{I daren't tell him I've got another job. (not I-daren't-to-tell ...)} \]

We can't include to after needn't:

\[ \text{We needn't interview everyone in the block. (not We-needn't-to-interview ...)} \]

2.8 Had better

We can use had better instead of should / ought to, especially in spoken English, to say that we think it is a good idea (or not) to do something:

\[ \text{We'd better find out all we can about that guard as soon as possible.} \]
\[ \text{We'd better not go in until the forensic team has finished.} \]

We use should or ought to when we talk about the past or make general comments:

\[ \text{I should / ought to have phoned her earlier.} \]
\[ \text{People should / ought to support the police more. (not People-had-better ...)} \]

2.9 Be allowed to

We can use could or was/were allowed to to say that in the past someone had general permission to do something:

\[ \text{Only the security guard could / was allowed to stay in the museum after it closed.} \]

To talk about permission on a particular occasion, we use was/were allowed to (not could):

\[ \text{Although he had no ID, the man was allowed to enter the building.} \]

In negative sentences we can use either could or was/were allowed to when talking about permission in general or on particular occasions:

\[ \text{They let reporters into the crime scene, but they couldn't / weren't allowed to take photos.} \]
2.10 Be supposed to

We can use be supposed to to express a less strong obligation than with should or ought to. Using be supposed to often suggests that events do not happen as expected:

The entry code is supposed to be known only by the security guard. (= suggests that it was in fact known by others)

We can use be supposed to to report what people think is true:

The building is supposed to be one of the most secure in the country. (= people say it is.) (not The building should / ought to be ...) 

2.11 Other verbs with modal meanings

A number of other verbs are used with similar meanings to modal verbs:

No one is to enter the building until the police give permission. (= obligation - formal)

Everyone present was required to give a statement to the police. (= obligation)

How did they manage to get in? (= ability)

We have succeeded in narrowing down the list of suspects. (= ability)

He might be prepared to tell us more. (= willingness)

The suspects have refused to co-operate. (= unwillingness)

From the evidence found, it follows that it was carefully planned. (= conclusion - formal)

We can conclude that the paintings were stolen by professionals. (= conclusion)

Reading and Use of English Part 4

For questions 1 – 6, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. Do not change the word given. You must use between three and six words, including the word given. Here is an example (0).

0 Those working with pre-school age children will probably find the course interesting.
INTEREST
The course is likely ______ to be of interest to ______ those working with pre-school age children.

1 During the winter I prefer watching football to playing it.
SOONER
During the winter I __________________________ it.

2 Karen says it takes less than an hour to drive there, but I'm sure she has got it wrong.
MUST
Karen says it takes less than an hour to drive there, but she __________________________ a mistake.

3 Students wishing to enrol on the course should complete all sections of the application form.
REQUIRED
Students wishing to enrol on the course __________________________ in all sections of the application form.

4 I wish I had considered the question more carefully before answering.
THOUGHT
I should __________________________ the question more carefully before answering.

5 The factory has been able to reduce its CO₂ emissions by 50% in the last year.
SUCCEEDED
The factory __________________________ back its CO₂ emissions by 50% in the last year.

6 It's a long walk home, so I advise you not to miss the last train.
BETTER
It's a long walk home, so __________________________ the last train.
Nouns, agreement and articles

Compound nouns and noun phrases; subject-verb agreement; countable and uncountable nouns; articles

Context listening

1.1 Nazim has applied to do a college course in Environmental Science. You are going to listen to part of his interview for a place on the course. What questions do you think the interviewer will ask?

1.2 Listen and check whether you were right.

1.3 Listen again and write one word in each gap to complete the compound nouns.

1 climate change 2 _______ -making 3 rain _________
4 river _________ 5 _______ -saving 6 lighting _________
7 _________ scheme 8 the arms _________ 9 mountain _________

1.4 Which of the following forms do each of the compound nouns from 1.3 take?
noun + noun _______ 1. _______ -ing form + noun _________ 2. noun + -ing form _________

1.5 Ignoring the shaded parts for now, complete these pairs of sentences from the interview with a, the or – (=no article).

1 a There's been _______ drought there for a number of months, and river levels are low.
   b The main problem has been the effect of _______ drought on food supplies.

2 a And what are your plans for _______ future?
   b It's hard to imagine _______ future without farming in an area like that.

3 a What do you want to do after you've left _______ college?
   b Have you got any questions about the course here at _______ college?

1.6 Can you explain the difference in meaning of the shaded parts of the sentences?
2.1 Compound nouns and noun phrases

### Common compound noun patterns:

<table>
<thead>
<tr>
<th>Pattern</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>noun + noun</td>
<td>climate change</td>
</tr>
<tr>
<td>-ing form + noun</td>
<td>recycling scheme</td>
</tr>
<tr>
<td>noun + -ing form</td>
<td>energy-saving</td>
</tr>
</tbody>
</table>

Some compound nouns are usually written as one word (e.g. rainforest), some as separate words (e.g. river levels), and others with a hyphen (-) (e.g. decision-making).

The first noun in a compound usually has a singular form, even if it has a plural meaning: decision-making (not decisions-making).

Instead of a compound noun we can use:

- noun + 's + noun when the first noun is the user of the second noun:
  - a women's clinic, a boys' school
- noun + preposition + noun:
  - a book about energy conservation, a book about grammar (a grammar book is also common)

We can sometimes use noun + 's + noun or noun + of + noun with a similar meaning:

the charity's aim or the aim of the charity

We are more likely to use noun + 's + noun:

- when the first noun refers to a particular person or group of people or to talk about time:
  - Mike's job, next year's field trip
- when the second noun is a non-living thing:
  - the title of the CD
- when we talk about a process or change over time:
  - the destruction of the rainforest
- with a long noun phrase:
  - Mike is the brother of someone I went to school with.

Compounds often combine with other nouns or compounds to form longer combinations:

decision-making process, energy conservation scheme

### Subject–verb agreement

Some nouns with a singular form, referring to a group (e.g. government, class, department, team), can be used with either a singular or plural form of the verb, although in formal contexts a singular verb is often preferred:

The government has (or have) introduced some really interesting projects.

We usually use a singular verb:

- when names and titles (e.g. of countries, newspapers, books, films) ending in -s refer to a single unit:
  - The Netherlands has begun to tackle the problem.
- with a phrase referring to a measurement, amount or quantity:
  - Only a few miles separates the villages.
- after percent (also per cent or %) referring to a singular or uncountable noun:
  - ... 10% of the country's energy comes from wind power.
But if percent refers to a plural noun we use a plural verb:

... 60% of people there are malnourished.

We usually use a plural verb:

- with nouns that normally have a plural form: congratulations, outskirts, clothes. But note that the following nouns ending in -s take a singular verb – news, linguistics, mathematics, physics, politics, statistics and economics when they refer to the academic subject:
  Statistics is included in the course. (not Statistics are ...)
- after a/the majority of, a/the minority of, a number of, a lot of, plenty of, all (of), some of + a plural noun / pronoun:
  The majority of people there are farmers.
  But note that we use a singular verb with the number of:
  The number of people suffering from malnutrition is increasing.

The following verb must agree with the main noun in a sentence with a complex subject:
Levels of income from the sale of handicrafts have increased.

When the subject follows the verb, the verb agrees with the subject:
Among the projects invested in by the government is the use of low-energy light bulbs.

### 2.3 Countable and uncountable nouns

#### START POINT

Many nouns in English are uncountable: they are not used with a/an or in the plural. For example: advice, equipment, information.

Some nouns are used uncountably when we are talking about the general idea, but countably when we are talking about particular examples:

You'd be able to get by with a basic knowledge of some statistical techniques. But The desire for knowledge is a fundamental human instinct.

The charity's project has been a success. (= a particular example of success)

Financial success isn't everything. (= success in general)

Other nouns like this include: business, education, sound. Some of these (e.g. education) are only used countably in the singular.

Some nouns (e.g. accommodation, speech, work) have a different meaning when they are used countably and uncountably. Compare:

She gave a speech about global warming.

Children usually develop speech in their second year.

We can use a good / great deal of and amount of before uncountable nouns:

There's a great deal of interest in recycling in the country.

It's saving an enormous amount of waste.

Using these before a plural countable noun is incorrect and you should avoid it in exams. However, they are sometimes used in this way in informal contexts.

We use a number of before plural countable nouns:

There's been a drought there for a number of months.

and plenty of and a quantity of before either uncountable or plural countable nouns:

There was plenty of opportunity for me to travel around the country.

I saw a huge quantity of trees being cut down.
2.4 Articles

We use the:
- with singular, plural or uncountable nouns when we expect the listener or reader to be able to identify the thing or person referred to:
  * It's a project run by a European charity. The charity's aim ...
- when a following phrase or clause identifies what particular thing we are talking about:
  * the climate in this region, the impact of climate change, the ecology of mountain environments
- when we talk about things that are unique:
  * in one part of the world, the sky, the future; the first/next time; the only/main problem; the smallest improvement, the arms trade, the environment

Some 'unique' nouns can be used with a/an when we describe a type or aspect of the thing. Compare:
  * What are your plans for the future? and It's hard to imagine a future without farming in an area like that.

We use a/an:
- when a singular countable noun is introduced for the first time into a spoken or written text:
  * He's the head of a project run by a European charity.
- to talk about an unspecified person, thing or event:
  * I didn't have a shower for days.
- to describe someone/something or say what type of thing someone/something is:
  * It's a beautiful country. It's an international organisation.
- to say what a person's job is:
  * You think that as a politician, you'd be able to do this?
  * But note that we use the or no article to give a person's title or their unique position:
  * He's the head of a project there. or He's head of a project there.
- in number and quantity expressions:
  * a month or so, a couple of weeks, half an hour, three times a year, 50 cents a litre, a huge number of, a bit

We use no article:
- with uncountable and plural nouns when we talk generally about people or things rather than about specific people or things:
  * I've always been fascinated by plants and animals. They haven't had rain for months.
- with some singular nouns referring to institutions (e.g. school, college, hospital, prison, university, work) when we talk about them generally. Compare: after you've left college and the course here at the college
- with most countries: Brazil, Switzerland, Norway but the Netherlands, the USA, the UK, the Philippines, the Gambia
- with the names of months and days of the week: in June, on Monday; special times of the year: during Ramadan, at Easter; (or the) with seasons: I like to go skiing in winter or ... in the winter. However, we generally use the to talk about a particular month, day, etc.: I'm going to Nepal in the summer (= next summer)
- with meals when we talk about the next one: What's for dinner?; a recent one: What did you have for breakfast?; or a meal in general: I usually have toast for breakfast. However, we generally use articles to talk about a particular meal or particular meals: We had an early dinner, The breakfast in the hotel is great.
- with by to talk about means of communication and transport: by post/email/phone; by car/taxi/bus/plane/air/sea

### 3.2 Nazim has been accepted on the Environmental Science course (see 1.1). Read this email he sent to a friend during a field trip. Fill in the gaps with a present tense form of the verbs in brackets.

Hi Cathy,

Greetings from Nepal! I'm sending this from an internet café in a small town north of Kathmandu.

The town itself isn't very interesting, but the surroundings (1) are (be) beautiful – I can see the Himalayas through the café window!

The lectures here are brilliant. The Politics and Ecology courses are great, but Economics (2) is (be) really difficult – although maths (3) is (be) certainly not my strong point! I'm really learning a lot about the country and its environmental problems.

A lot of Nepal's population (4) live (be) in the mountainous parts of the country south of the Himalayas, and the majority of these people (5) depend (be) on growing crops and keeping animals. The standard of living in Kathmandu and the other cities (6) has (have) risen a lot recently, and the number of people likely to move into the cities (7) is (be) expected to increase. It's a real problem here. The Himalayan Times, the local English-language newspaper, (8) has (have) just published a survey showing that most young people would stay in their home villages if jobs were available.

I was planning on coming home at the end of June, but the college (9) has (have) arranged for a few of us to stay during the summer on a WWF conservation project in a region in the north called Helambu – there (10) is (be) just a few kilometres between the village where I'll be working and the border with China. Among the various projects that have been set up (11) is (be) a scheme for producing biogas locally – that's gas produced from plant and animal waste. All my living expenses (12) is (be) being paid for by the WWF.

Hope all is well with you. I'll send more news when I can.

Reading and Use of English Part 2

For questions 1 – 8, read the text below and think of the word which best fits each gap. Use only one word in each gap. There is an example at the beginning (0).

The origins of chess

A great (0) **deal** has been written about the origins of modern chess, and there
(1) ____________ still considerable debate about the subject. (2) ____________ theory most widely
accepted is that its earliest ancestor was Shaturanga, a game played in India from around AD 600.
(3) ____________ with modern chess, Shaturanga was played on a board with 64 squares. Pieces such
as kings, queens and knights were able to move in different ways with (4) ____________ aim of capturing
other pieces and, at the end of the game, the opponent’s king. Unlike chess, it was played by four people.
In the form in (5) ____________ it is played today, chess appeared in southern Europe around the end of
the fifteenth century. Today, chess has become one of the world’s (6) ____________ popular games. It is
played by millions of people both informally and in tournaments, and (7) ____________ number of people
playing online (8) ____________ increasing with access to the Internet.

Context listening

1.1 You are going to listen to three people talking about running. Make notes on three benefits and three possible problems of taking up running as a hobby.

1.2 Listen to three people giving their views on running. Which of the benefits and possible problems you have listed do the speakers mention?

1.3 Listen again and fill in the gaps.

1 a Until then I did a bit of sport at school, but I didn’t do much outside school at all. (Speaker 1)
   b In fact, I suppose I didn’t have any interests. (Speaker 1)

2 a Now I run a few kilometres a day. (Speaker 2)
   b You can be sure that one of us will have a really good time. (Speaker 3)

3 a Inevitably you get injuries, too – everyone gets aching muscles after a long run. (Speaker 3)
   b It’s one of the sports where no special equipment’s needed. (Speaker 2)

4 a I certainly go out a lot during the winter. (Speaker 3)
   b But surprisingly I seem to have fewer injuries now than when I was younger. (Speaker 3)

1.4 In which pair of sentences is each word or phrase possible in both gaps?
2.1 No, none, not a, not any

START POINT

No two pairs of running shoes are the same. (= not any)
None of them like the thought of running long distances. (= not any of)

We use neither of instead of none of when we talk about two people or things:
Neither of us did any exercise.

We don't usually use not a / not any at the beginning of a clause. Instead we use no and none of:
None of the runners is under 60. (not Not any of the runners ...)

If it is clear from the context what is meant, we can use none without a following noun:
I've had none so far. (= e.g. no injuries)

2.2 Much, many, a lot of, lots of

START POINT

Did you do much running last winter?
There could be many reasons for the current interest in running.
I get a lot of satisfaction out of it.
You get to meet lots of interesting people.

We use much (of) (+ uncountable noun) and many (of) (+ plural noun) particularly in negative sentences and in questions. In positive sentences we usually use a lot (of) or lots (of). However, in more formal contexts we usually prefer much (of) and many (of).

If the meaning is clear from the context, we can use much and many without a following noun:
I didn't do much outside school at all.

We can use much of and many of to mean 'a large part of' or 'a large number of':
I used to spend much of my free time sitting around.
I was in first place for much of the race.

We use many rather than a lot of or lots of with time expressions (e.g. days, minutes, months, weeks, years) and 'number' + of (e.g. thousands of dollars):
I spend many hours training.
Running clubs often have many hundreds of members.
2.3  All, both, whole

**START POINT**

All (of) my friends like watching sport on TV.
I suppose all exercise carries some risks.
By the time we got to the bus stop both of us were completely exhausted.
I thought the whole event was brilliant.
Sometimes I go whole weeks without running.

We usually put all after the verb be or after the first auxiliary verb:
Next spring we’re all going to Madrid.
They could all have been Olympic athletes.
If there is no auxiliary, we usually put all before the verb:
We all went running together.

We sometimes use all after the noun it refers to:
My friends all think I’m crazy. or All my friends think I’m crazy.

To talk about two things or people we use both (of) in positive sentences or neither (of) in negative sentences:
We certainly both got a lot fitter. Both of us were completely exhausted.
Neither of us did any exercise. (not Both of us didn’t do any exercise.)

Before singular countable nouns we usually use the whole rather than all (of) the:
I thought the whole event was brilliant.

Before day / week / night / month / summer, etc. we prefer all rather than the whole:
After I’ve been sitting at my computer all day I can’t wait to go out for a run.
I might go all week without a run.

We can use all the or the whole before way and time:
I was really surprised when I managed to run all the way. or ... the whole way.

2.4  Every, each

**START POINT**

I go running on Wednesday and on Friday, and I try to run ten miles each day. or ... every day.
Every one of us will have a really good time. or Each one of us ...

Before a singular countable noun, we use each (of) to talk about two or more things or people, and every to talk about three or more. Sometimes we can use either every or each with little difference in meaning.

We use every:
- with almost, nearly, practically, virtually to emphasise we are talking about a group as a whole:
  Now I run nearly every day.
- to talk about events at regular intervals: every other kilometre, every single day, every few weeks, every six months:
  I go out running every couple of days.

We use each:
- when we talk about both people or things in a pair:
  I had to wear a bandage on each knee. or ... on both knees.
- as a pronoun:
  We were each given a medal for completing the 5-kilometre fun run.
A few of my friends are quite good at team sports. I seem to have fewer injuries now than when I was younger. There is little evidence that running causes major problems. You should eat less protein as you prepare for a race. There’s not much you can do about it. (See 2.6 for more on much (and many)).

Few (of) and little (of) are often rather formal. Less formally, we use phrases such as not many and not much.

We often use a few and a little to suggest that a small quantity or amount is enough, or more than we would expect:

He’s won a few medals. I’ve been starting to get a little pain in my knees.

In formal contexts, we often use few and little to suggest that a quantity or amount is not enough, or is surprisingly low:

Before I joined the club I had very few friends who lived nearby.

In comparisons, we use less with an uncountable noun, and fewer with a plural noun:

I should eat less chocolate. You should eat fewer biscuits.

The opposite of both less and fewer is more:

I should eat more chocolate. You should eat more biscuits.

In conversation, some people also use less (than) before a plural noun referring to a group of things or people:

There were less than 20 competitors.

This is grammatically incorrect and would be marked wrong in a formal written exam. Fewer (than) should be used instead:

There were fewer than 20 competitors.

When we talk about a period of time, a distance or a sum of money, we use less than:

My aim is to complete the course and do it in less than six hours. (not ... fewer-than-six-hours.)

Much, many, both, all, each, none, few, little + (of)

We usually need to put of after these words when they are followed by:

• a pronoun: We know that not all of us will finish the course.

• a determiner: Few of the runners were under 65.

• a possessive form: Many of Alice’s friends are runners.

Informally after both and all we can leave out of before the, these, those; this, that (with all); possessive pronouns (e.g. my, mine) but not before them, you, us; it (with all):

I’ve been running regularly all of my life or ... all my life.

Both of us decided to do more exercise. (not Both-us-decided ...)

'5 PORTIONS A DAY' FALLS ON DEAF EARS

Despite the government's '5 portions a day' recommendation to eat more fruit and vegetables, a recent study has found that ________ British teenagers are taking its advice. A thousand teenagers were questioned in the survey, ________ them between the ages of 14 and 17. While ________ said they knew about the campaign, ________ the young people questioned, just 5%, said it had influenced their eating habits. In answer to the question 'How many pieces of fruit have you eaten in the last week?', an incredible 50% responded ________.

Sam Brown, 15, and Sarah Goodall, 16, were among the young people who took part in the survey. ________ them conceded that fruit and vegetables didn't figure greatly in their diets. Sam admitted: 'I don't eat ________ fruit at all, maybe just an apple sometimes. I don't think ________ my friends are different.' Sarah felt that the busy lifestyle of today's teenagers was partly to blame: 'I'm not into vegetables, and ________ the time I'm too busy to eat fruit after dinner. I've got homework to do or friends to see.' ________ agreed that the government's campaign wouldn't affect what they ate. Sam said: ' ________ the posters and adverts are hard-hitting enough. Their message is just 'Eat fruit or veg with ________ meal.' If they want teenagers to eat more fruit and vegetables, they've got to convince us that it's really important.'

______ scientists have warned that failure to eat fruit and vegetables, particularly by young people, can lead to obesity, cancer and a host of other diseases. Professor Jess Adams from Queen's Hospital said: ' ________ the research points to a close relationship between levels of fruit and vegetable consumption and health, but surprisingly ________ this research is reported in the press or on television. This means that the message is not getting across. The government tries to highlight the problem with its campaigns, but unfortunately there is ________ sign that they have any long-term impact. Ultimately, however, it's up to ________ us to think about what we eat and make healthy choices.'

3 I was happy to teach during the day.
4 It felt fantastic having my first book published.
5 I've just finished his excellent novel Restless. ✗
6 I felt bad leaving the children.
7 There are a lot of historical links between Norway and the north of Scotland.
8 My mother was a rather gentle woman and always calm.
2.1 Position of adverbs

START POINT

There are three main positions in a clause for adverbs:

- **front position** (before the subject):
  
  *Normally, I write for about six hours a day.*

- **mid position** (between the subject and verb, immediately after *be* as a main verb, or after the first or second auxiliary verb):
  
  *I usually start work by about 8.00. I'm generally up at about 7.00. I had never been to Norway before.*

- **end position** (after the verb; either immediately after it or later in the clause):
  
  *He writes simply.*

Many adverbs can go in any of these positions, depending on the context or style of writing:

*Gradually, they grow into real people.* or *They gradually grow ....* or *They grow gradually ....*

Some adverbs tend to appear in particular positions:

- **Always, never; adverbs of indefinite frequency** (hardly ever, often, rarely, regularly, seldom); and degree adverbs (almost, hardly, nearly, quite, rather, scarcely) are usually put in mid position:
  
  *I rarely have a clear idea. I always know how a book is going to end.*

- **Constantly, continually, regularly; absolutely, completely, entirely, greatly, perfectly** are usually put either in mid or end position, but not in front position:
  
  *I greatly admire William Boyd. or I admire William Boyd greatly. (not Greatly I admire ...)*

- **Adverbs of place** are usually put in end position:
  
  *I work upstairs. (not Upstairs I work. I upstairs work.)*

- **Adverbs of definite time and frequency** are usually put in end position:
  
  *I finished my previous book last January. (not Last January finished ...)*

- **Adverbs of time or frequency consisting of more than one word** (e.g. as a rule, from time to time, every so often) are usually put either in front or end position, but not mid position:
  
  *As a rule, I prefer finding information from books. (not As a rule prefer ...)*

We avoid putting an adverb between a main verb and a direct object, or following an -ing form or to-infinitive:

*I still speak Swedish quite well. (not I still speak quite well Swedish;)*

*I started writing professionally. (not I started professionally writing;)*

*I'd like to go back again. (not I'd like to go again back;)*

In end position we usually put adverbs of place before adverbs of time:

*I hadn't been to Norway before. (not I hadn't been before to Norway;)*

2.2 Quite, rather; already, yet, still; even, only; really

- **Quite, rather**

  The usual position for *quite* is before *a/an* and an adjective, where it means 'moderately':

  *Elsa is quite a dominant figure.*

  Less often, *quite* is used between *a/an* and an adjective, where it means 'completely':

  *It's a quite remarkable story.*
Adverbs and adjectives

The usual position for rather is between a/an and an adjective. Less often, but with a similar meaning, rather is used before a/an and an adjective:

My mother was a rather gentle woman. or My mother was rather a gentle woman.

- Already, yet, still
Already can go in either mid or end position:
I'd already decided that I wanted to write ... or I'd decided already ...
Yet is usually put in end position in negatives, questions and expressions of uncertainty:
I don't know if I can tell you yet.
Still usually goes in mid position:
I'm still sketching out the plot.

- Even, only
Even and only usually go in mid position:
He can even speak Swedish.
but if they refer to the subject they usually come before it:
Sometimes even I'm surprised. Only my close family had read anything I'd written.

- Really
The meaning of really can change according to its position in a sentence. Immediately before an adjective it means 'very'. In other positions it can mean 'actually' or 'in fact':
I'd been feeling really tired.
My friends thought I was joking but I really had decided to leave teaching.

## 2.3 Position of adjectives

**START POINT**

His excellent novel. His novel is excellent.

Many adjectives can be used either before the noun they describe, or following the noun and a linking verb such as be, become, feel and seem that connects a subject with a word or phrase that describes the subject.

The following adjectives can be used immediately after a noun:

- many participle adjectives (i.e. adjectives that end with -ing or -ed. See Unit 12, 2.1 for more on participle clauses):
  There'll be a lot of people waiting eagerly to get hold of it. (= a lot of people who will be waiting)
  Some of the geographical settings used in A Woman Alone are based on places I visited. (= settings which are used in A Woman Alone)

- adjectives used after indefinite pronouns (e.g. something, nothing):
  I really don't think it was anything special.
  There was nothing extraordinary about my first novel.

## 2.4 Gradable adjectives

If an adjective is gradable, we can say that a person or thing can have more or less of the quality referred to (e.g. ambitious, busy). Gradable adjectives can be used with adverbs such as extremely, slightly or very:

somewhat ambitious, extremely busy, slightly different, very rich, pretty strong

If an adjective is non-gradable, we don't usually imagine degrees of the quality referred to (e.g. huge, impossible).
To emphasise the extreme or absolute nature of non-gradable adjectives we can use adverbs such as absolutely, completely or totally:

absolutely huge, completely impossible, practically unknown, almost unique, totally useless
Some adjectives have both gradable and non-gradable uses:

- some (e.g. common) have gradable and non-gradable uses with different meanings:
  
  Bardreth isn’t a very common surname. (gradable: common = frequent)
  Elsa and my mother have certain common characteristics. (non-gradable: common = similar)

- some (e.g. diplomatic) have gradable and non-gradable uses with related meanings:
  
  You’re being very diplomatic. (gradable because it refers to the quality the person has)
  He worked as the diplomatic correspondent of a national newspaper. (non-gradable because it refers to the type of correspondent he is)

### 2.5 Patterns after adjectives

When an adjective comes after a linking verb, we can use a number of patterns after the adjective, including a to-infinitive or an -ing form:

- I was unwilling to leave teaching.
- It felt fantastic having my first book published.
- Some of my close friends thought I was mad to give up my job. or ... was mad giving up my job.

Many adjectives can be followed by a that-clause, including some that can also be followed by a to-infinitive or an -ing form:

- I was aware that I needed rest.
- I was greatly relieved that my subsequent books sold quite well. or ... was greatly relieved to find ...
- I felt bad that I was leaving the children or I felt bad leaving ...

### Grammar exercises

3.1 Complete the sentences by writing the words in brackets in the correct order. Give alternatives where possible.

1. Not wanting to wake the children, I climbed _____ the stairs quietly ____. (quietly – stairs – the)
2. She ______________________ her parents. (ever – hardly – visits)
3. When I bumped into his car, he began __________________ at me. (angrily – shout – to)
4. Juan thinks we should sell our car and buy bikes instead, and __________________ with him. (absolutely – agree – I)
5. Natalie is on a working holiday in New Zealand. She ______________________ and should be home at the end of June. (last – left – week)
6. _______________________ for a meal after work to catch up on news. (go – occasionally – we)
7. We ______________________ to see a film. (go – out – seldom)
8. As I walked out of the room, she ______________________. (loudly – singing – started)

For questions 1 – 8, read the text below. Use the word given in capitals at the end of some of the lines to form a word that fits in the gap in the same line. There is an example at the beginning (0).

Sleep patterns

It is estimated that around one in five people have a sleep 
(0) disorder of some kind, affecting their ability to get 

enough sleep. In particular, people who are (1) weigh – an increasing problem around the world – often suffer from sleeping 
difficulties. Most of the results of this lack of sleep are relatively minor, 
such as tiredness, irritability and (2) forget, and the 
effects are not long-lasting. However, longer-term sleep deprivation can 
have more serious consequences and can be (3) harm to physical and mental health. For example, it can result in high blood 
pressure and can affect a person's (4) alert, reducing 
their ability to think and respond quickly. 

Recent (5) science research has shown that people 
need seven to eight hours of sleep on average, although this figure is 
(6) depend on such factors as age and health. For 
example, for infants the (7) require is much higher, about 
16 hours a day, while older people tend to sleep less deeply and for a 
shorter time, often needing about the same amount of sleep as they do 
in late (8) child.

Comparison

2.2 Superlatives: special cases

**START POINT**

That’s the most convenient of the flights from London ...
It’s one of the most famous buildings in the world.
They’re right next to the best beach on the island.

After a superlative we usually use of before plural words and in or on before singular words for places or groups.

For emphasis we can put an of-phrase at the beginning of the sentence:
Of the flights from London, that’s the most convenient ...
In informal contexts we sometimes leave out the after a linking verb (e.g. be, become, feel), particularly when the superlative is at the end: Which one’s cheapest?

2.3 Comparisons with as ...

**START POINT**

Isn’t Corfu likely to be as hot as Athens at that time of the year? (= equally hot)
Getting to Corfu is just as easy as getting to Athens. (= equally easy to get to)

Before the first as we use words and phrases such as about, almost, just, just about, nearly, and informally not anything like, nothing like, nowhere near, not nearly to indicate degree of similarity:
The heat is nowhere near as bad as people say. (=informal)
In negative forms we can use not as in informal contexts, or less commonly not so:
Corfu is certainly not as quiet as it used to be. or ... not so quiet as it used to be.

We use as much/many as or as little/few as to say that a quantity or amount is larger or smaller than expected:
There are reasonable hotel rooms for as little as 40 euros a night.
There are as many as 12 flights a day to Athens from London.

We also use as much/many as with a noun phrase, a clause or the words ever, possible and usual:
We want to see as much as possible.

We can put a singular noun between an adjective and the second as:
We want as cheap a flight as possible.
Notice that we use a/an in front of the noun.

The negative form of sentences like this can use either not as or not such:
Getting there is not as big a problem as you might think.
That’s not such a bad idea.
Notice that we use not as + adjective + a/an + noun but not such a/an + adjective + noun.

- As + clause
  We can use a clause after as to compare two situations:
  Maybe we could hire a car, as we did last year.
- As or like
  When followed by a noun, as is used to describe the job or role of someone, or the function of something:
  My friend Mark used to work there as an English teacher.
  Like is used to say that one person or thing is similar to another:
  I stayed in a hotel like that one last year.
2.4 **Comparisons with so ..., too ..., enough**

Comparative clauses with so, too and enough are followed by clauses beginning that or to-infinitive.

- **so + adjective + that-clause**
  
  *It gets so hot* (comparative clause with so) *that a lot of people leave the city.* (that-clause)
  
  More formally we can use so + adjective + as + to-infinitive with a similar meaning. Compare:
  
  *The difference in price is so small as to not be worth bothering about.* (formal)
  
  *The difference in price is so small that it's not worth bothering about.* (informal)

- **too + adjective + to-infinitive**

  *If we don't decide soon, it'll be too late (for us) to get anywhere to stay.*

- **adjective + enough + to-infinitive**

  *It's easy enough to get into the centre from there.*

1.2 The lecturer tells the students about the first five
lectures in the course. Here are the titles of these lectures. Listen and
number them in the order they will take place.

Language learning problems: what and why? _______
Listening and learning: the interrelationships _______
Early communication: parents and play _______
Patterns of communication: learned behaviour? _______
Private conversations: talking to toys _______

1.3 Listen again and fill in the gaps.

- I recently (1) bought my two-year-old daughter a cuddly elephant, and it has become the 'person' she talks to each morning lying in bed.
- The first stage of interactive play might be a child (2) or (3).
- A broken toy handed to a parent with an 'Aaa' might mean (4) _______
- (5) _______ is a similarly important part of this process of listening and understanding.
- Dr. Jackman will be (6) _______ in detail in later talks.

1.4 Which of the following patterns do the phrases you have written have?

a) verb + person/people + thing(s) _______ and _______
b) verb + thing(s) + for + person/people _______ and _______
c) verb + thing(s) + to + person/people _______ and _______

1.5 Decide whether the phrases in 1.3 could be rewritten using the other patterns.

1. a) $\checkmark$ = bought my two-year-old daughter a cuddly elephant
   b) $\checkmark$ = bought a cuddly elephant for my two-year-old daughter
   c) $\times$ = bought a cuddly elephant to my two-year-old daughter
Interactions between infants will often copy parental speech. (transitive)
Fetch me your hat. (transitive)
Infants are keen to interact with others. (intransitive)
A verb is transitive if it can be followed by one object (e.g. copy parental speech) or two objects (e.g. Fetch me your hat). If a verb has two objects, the first (the indirect object) is usually a person or group of people and the second (the direct object) is a thing. If a verb can't be followed by an object it is intransitive (e.g. interact) and it can't have a passive form.

### Verbs with two objects

After many verbs with two objects, we can reverse the order of the objects if we put for or to before the indirect object:

I recently bought my two-year-old daughter a cuddly elephant. or I recently bought a cuddly elephant for my two-year-old daughter.

A child might offer their mother some food. or A child might offer some food to their mother.

We often use this pattern (with for or to) to focus particular attention on the indirect object or when the indirect object is much longer than the direct object:

She lent the book to one of the students who asked for some additional reading. (not She lent one of the students who asked for some additional reading the book.)

We use for + indirect object with verbs such as build, find and get:
Go to the toy box and find the car for me. or Go to the toy box and find me the car.

We use to + indirect object with verbs such as give, offer and show:
She gave a toy to me. or She gave me a toy.

We can use either for or to + indirect object with verbs such as play, read and write. Often there is a difference in meaning:

I couldn't find her email address, so I had to write a letter to her.
She was too young to write herself, so I wrote the letter for her. (= instead of her)

Sometimes the meaning is very similar:

Reading stories for/to young children is an important part of this process.

Some verbs with two objects cannot have their objects reversed with for/to, including ask, guarantee and refuse:

Most parents ask themselves the question: 'Did they copy that from us?' (not ... ask the question for/to themselves ...)

If the direct object is a pronoun, we usually use direct object + for/to + indirect object:

I bought it for my daughter. Give it to me.

While I bought my daughter it and Give me it might be heard in informal speech, this pattern is usually considered to be bad style and should be avoided in writing and in Cambridge English: Advanced.

Some verbs can only have two objects in the pattern direct object + for/to + indirect object:

- for (These verbs include collect, fix and mend.)
  Mend this for me. (not Mend me this.)
- to (These verbs include describe, explain and mention.)
  Dr Jackman will be describing this process to you in detail. (not Dr Jackman will be describing you this process in detail.)
2.2 Verb + object + adjective

Some verbs (e.g. believe, consider, prove) can be followed by an object + adjective:

*We might consider first language learning natural...* (object = first language learning; adjective = natural)

2.3 Verb + reflexive pronoun

**START POINT**

Let me introduce *myself*. I'd like to talk about what I call *private* conversations – children talking to *themselves.* When the subject and the object of a sentence refer to the same person or thing, we use a reflexive pronoun as the object rather than a personal pronoun. The reflexive pronouns are: *myself, yourself, herself, himself, itself, ourselves, yourselves, themselves.*

After some verbs we can use a reflexive pronoun or leave it out with little difference in meaning. These include *acclimatise to, adapt to, (un)dress, move, prepare for, shave and wash:*

As my three year-old daughter dresses *(herself)*, she likes to talk.

We include the reflexive pronoun for emphasis. In this example, we might include *herself* to emphasise that she dresses without help.

A few verbs are very often used with a reflexive pronoun followed by a particular preposition: *busy ... with, distance ... from, pride ... on:*

*When children appear to be busying themselves with their toys...*

Some verbs are rarely or never used with a reflexive pronoun in English, but often are in other languages. These include: *complain, concentrate, get up, get hot, get tired, lie down, meet, relax, remember, sit down and wake up:*

*From the moment they wake up ...* (not *From the moment they wake themselves up ...*)

With verbs followed by direct object + preposition + indirect object we usually use a personal pronoun, not a reflexive pronoun, as indirect object:

*Parents sometimes hide an object behind them.* *(not Parents sometimes hide an object behind themselves.)*

If we need to make it clear that the subject and indirect object refer to the same person, we use a reflexive pronoun. Compare:

*Maria didn't buy the teddy bear for her.* *(her = could mean either Maria or someone else)*

*Maria didn't buy the teddy bear for herself.* *(herself = Maria)*

2.4 Verb + each other / one another

Compare the use of verbs with reflexive pronouns and *each other / one another:*

*Sara and Noel blamed themselves when their daughter broke her arm.* (= they said it was the fault of both of them)

*Sara and Noel blamed each other / one another when their daughter broke her arm.* (= Sara said it was Noel's fault and Noel said it was Sara's fault)

With some verbs (e.g. agree, coincide, play) we have to use the preposition with before *each other / one another:*

*It is wonderful to see two small children playing with each other peacefully.*

After the verbs embrace, fight, hug, kiss, marry and meet we can use *each other or (with) one another,* but this can be omitted:

*Two small children at a nursery school might hug (each other / one another) when they meet.*

Context listening

1.1 Listen to part of an interview from a radio travel programme. The reporter is talking about his recent visit to the island of Lombok in Indonesia. Which of these problems did the reporter encounter on his trip?

- seasickness
- shark attack
- passport left at home
- volcanic eruption
- hurricane
- missed flight
- stung by jellyfish
- missed boat

1.2 Listen again and fill in the gaps.

1. I'd been so anxious to get into the taxi that I'd forgotten to pick it up.
2. We were outside the harbour for hours.
3. A number of people went to the coral reefs off the northwest coast.
4. When I was younger I used to in the sea.
5. As it swam past I me across the stomach.
6. I really me so well.
7. As we the amazing sunset, it was almost possible to believe it.
8. I the camera in my mobile phone, but the quality was pretty poor.

1.3 Notice that in each space in 1.2 you have written two verbs, and that the second verb has either a to-infinitive or an -ing form.

1. In three of these sentences you could use the other form of this verb and still have a correct sentence. Which three? , ,
2. In only one of these three would the sentence have a similar meaning with either a to-infinitive or an -ing form. Which one?
Verb patterns (2)

2.1 Verb + to-infinitive / -ing

Some verbs can be followed by either a to-infinitive or an -ing form with little or no difference in meaning:
I started to scream. or I started screaming.

Other verbs like this include: begin, not bother, cease, continue. We normally avoid using two -ing forms together:
I was beginning to feel quite at home there. (not I was beginning feeling ...)

After the opinion verbs hate, like, love and prefer we can use either a to-infinitive or an -ing form with little difference in meaning. However, we prefer a to-infinitive when we say we do something regularly. Compare:
When I was younger, I used to hate to swim in the sea. (= implies regular swimming)
When I was younger, I used to hate swimming in the sea. (= implies swimming in general)

After would (2) with hate, like, love or prefer, we use a to-infinitive, not an -ing form:
I'd love to think that it could avoid a huge expansion in visitors.

Some verbs can be followed by either a to-infinitive or an -ing form but the meaning of the verb is different:
I came to realise that the Lombok people are very kind. (= talking about a gradual realisation)
It came swimming towards me. (= saying that something swam in your direction)

We use an -ing form after the preposition to:
I'd really been looking forward to staying at the Hotel Sanar in Mataram. (not looking forward to stay...)

and after the preposition of a phrasal verb:
I put off going home for as long as possible. (not I put off going...)

In negative sentences, the position of not can influence meaning. Compare:
I regretted not speaking the local language. (= I didn't speak the language and I regretted it)
I didn't regret speaking the local language. (= I spoke it and I didn't regret it)
I was told not to exercise. (= they said I shouldn't exercise)
I wasn't told to exercise. (= they didn't say I should exercise)

2.2 Verb + (object) + bare infinitive

When let and make have an object, this is followed by a bare infinitive:
They made us wait outside the harbour for hours.

But we use a to-infinitive after a passive form of make:
We were made to wait outside the harbour for hours.

When the verbs of perception feel, hear, notice, observe, overhear, see, watch have an object, this is followed by an -ing form or a bare infinitive:
I felt it stinging me across the stomach. or I felt it sting me across the stomach.
I sat on the beach and I watched the sun setting or I watched the sun set and then went home.
We usually prefer an -ing form when the action is in progress or we want to emphasise that it continued for some time, and a bare infinitive when an action is complete or we want to emphasise that it lasted for a short time.

We use a bare infinitive in certain idiomatic phrases with dare, make, let and hear:

- I dare say you're tired after your journey. (= I think this must be true; see Unit 4, 2.7 for more on dare.)
- I had to make do with a less luxurious hotel.
- I had to let go of the rope.
- He let slip that he hadn't got a driving licence.
- I heard tell there were sharks around.

After help we can use either a bare infinitive or to-infinitive:

Some of the villagers helped carry me back to my taxi or Some of the villagers helped to carry me back to my taxi.

**2.3 Verb + object + to-infinitive / -ing**

After some verbs we have to include an object before a to-infinitive in active sentences:

A number of people had encouraged me to go to the coral reefs off the northwest coast of the island.

Other verbs like this include: advise, persuade, tell.

Some verbs can't include an object before a to-infinitive:

I decided to go ahead.

Other verbs like this include: agree, guarantee, refuse.

With some verbs we have to include the preposition for before an object + to-infinitive:

I arranged for the taxi to collect me.

Other verbs like this include: advertise, apply, campaign, pay, wait.

(See Unit 24, 2.2 for more on prepositions after verbs.)

Some verbs are only followed by an -ing form when they have an object:

I saw the jellyfish coming towards me.

Other verbs like this include: feel, find, hear.

**2.4 Verb + object/possessive + -ing**

Some verbs can be followed either by an object or, more formally, a possessive form:

I really appreciated them looking after me so well or I really appreciated their looking after me so well.

Other verbs like this include verbs of (dis)liking (e.g. appreciate, detest, (dis)approve of, (dis)like, enjoy, hate, love, object to) and verbs of thinking (e.g. forget, imagine, remember, think of).

We can only use a possessive form to talk about a person or a group of people:

I'll never forget it swimming towards me. (not ... its swimming towards me)

We don't use a possessive form if the object is complex:

I really enjoyed Arun and his sister showing me around. (not ... Arun's and his sister's ...)

**2.5 Other patterns after verbs**

The to-infinitive can also have perfect, passive and continuous forms.

- Verb + to have + past participle

We use forms of the perfect infinitive to talk about an event that happened earlier or is complete:

The Sasaks are thought to have originally come to Lombok from India or Burma.

This is particularly used to talk about actions that did not happen or may not have happened:

I was supposed to have arrived on the 14th October.

I was supposed to have been flying from London to Singapore.

The mountain's thought by some to have been created by the god Batara.
Verb patterns (2)

- Verb + having + past participle
  We use the perfect -ing form to emphasise that one action happens before another:
  
  *I really regret not having taken my camera with me.*
  
  This form is most often used with the verbs admit, deny, forget, recall, regret and remember.

- Verb + to be + present/past participle
  Future actions can also be indicated using the continuous infinitive (verb + to be + present participle) and the passive infinitive (verb + to be + past participle):
  
  *I hope to be going back again.*

  More flights to the island *are expected to be introduced* next year.

My life as a human speed bump

Giving up a car has not been quite the liberating experience that George Monbiot had hoped.
Seventeen years after giving up my car, I still feel like a second-class citizen. I am trying to do the right thing, but the United Kingdom just isn’t run for people like me. Take our bus services. My home city, Oxford, has invested massively in a park-and-ride scheme: buses carry people into the centre from car parks on the outskirts. At first I thought this was a great idea. Now, having stood for what must amount to weeks at bus stops, watching the full double-deckers go by every couple of minutes without stopping, I realise it’s not just the roads which have been taken over by drivers, but also the public transport system.

Or take the bike lanes. Most consist of lines painted on the road where it is wide and safe, which disappear as soon as it becomes narrow and dangerous. One of them, in Oxford, has been surfaced with small stones, which shows that the people who designed them have never ridden a bicycle. When we asked for a bike lane on one of the city’s busiest streets, the council chose instead to narrow the street and widen the pavements, in the hope that the bicycles would slow down the cars. The cyclists, reluctant to become human speed bumps, started travelling down the pavement.

Now there is almost nowhere reserved for people like me. Out of political cowardice, councils and the police have given up enforcing the law. Preventing people from parking on the pavement would mean cutting the number of parking places, as the streets are otherwise too narrow. In one part of Oxford they have solved the problem by painting parking places on the pavement. Since my daughter was born, and I have started pushing a pram, I have been forced to walk in the middle of the road. In one respect this makes sense: the pavements are so badly maintained that she will only sleep when she’s being pushed down the smooth grey carpet laid out for the cars.

My problem is that by seeking to reduce my impact on the planet, I joined a political minority that is diminishing every year. As car ownership increases, its only remaining members are a handful of strange people like me, the very poor and those not qualified to drive. None of these groups have political power. Our demands run counter to the usual wish to be successful, and have a better home, job and car, and are therefore of little interest to either politicians or the media.

Now, to my horror, I find I am beginning to question even the environmental impact of my 17 years of moderation. It is true that my own carbon emissions have been reduced. It is also true that if everyone did the same thing the total saving would be enormous. The problem is that, in the absence of regulation, traffic expands to fill the available space. By refusing to own a car I have merely opened up road space for other people, who tend to drive more fuel-hungry models than I would have chosen. We can do little to reduce our impacts on the environment if the government won’t support us.

There are some compensations, however. About three or four times a year I hire a car. When I stop at motorway service stations, I am struck by the staggering levels of obesity: it appears to be far more prevalent there than on trains or coaches. People who take public transport must at least walk to the bus stop. The cyclists among us keep fit without even noticing.

Being without a car in Oxford has forced me to become more engaged with my home town. It throws me into contact with far more people than I would otherwise encounter. There are a couple of routes which make cycling a real pleasure: the footpath along the River Thames, for example, takes me most of the way to the station. But overall, as far as self-interest is concerned, I would struggle to claim that giving up my car was a wholly positive decision.
1 In the first paragraph, the writer says his view of the Oxford park-and-ride scheme is that
A it has actually encouraged people to drive into town.
B it has been an unqualified success.
C it has had insufficient funding.
D its popularity has become problematic.

2 The writer thinks that cyclists started travelling down the pavement in one of Oxford's busiest streets because
A the council put in a speed restriction measure.
B the pavement is very wide.
C there is no bike lane.
D in the bike lane cyclists are too close to cars.

3 In the third paragraph, the writer says he believes that Oxford city council has shown 'political cowardice' because it
A is reluctant to stop cars being left in pedestrian areas.
B doesn't want cyclists on the city's roads.
C has narrowed some roads to discourage cyclists from using them.
D is unwilling to improve the standard of pavements.

4 In the fifth paragraph, the writer suggests that the effect of his actions has been to
A discourage the government from giving support.
B lower maintenance standards for pavements.
C create more room on the road for other cars.
D encourage others to drive bigger cars.

5 The writer's observations at motorway service stations suggest to him that
A car drivers are more overweight than public transport users.
B people who own cars are thinner than people who hire them.
C people who use public transport don't get enough exercise.
D cyclists ride bikes in order to keep fit.

6 According to the writer, being without a car in Oxford
A has been a completely positive experience.
B has increased the number of acquaintances he has made.
C has made him stay at home more.
D has been a complete mistake.
Context listening

1.1 You are going to hear part of a commentary from an audio-guide in a museum of science and technology. Before you listen, look at these photos. What do you think the commentary is about?

a) vacuum tubes
b) Hertz's experiment
c) wireless telegraph

1.2 Listen to the commentary. Number the photos in the order they are mentioned.

1.3 Listen again and fill in the gaps.

1. He devised an experiment _____ in which _____ a spark jumped across a gap in a metal ring when a sparking coil was held a few metres away.

2. For most people, however, it is the Italian Guglielmo Marconi ______ name is mainly associated with the development of radio.

3. The first public demonstration of the power of radio came in 1901, _______ Marconi announced that he had received a transmission from across the Atlantic.

4. There are just a few of the 'wireless telegraphs' that the factory produced left in the world, an example ______ you can see in Case 2.

5. Radio waves could not carry speech until a method had been developed ______ the low-frequency waves produced in a microphone could be combined with high-frequency radio waves.

6. In Britain, the popularity of radio increased until 1952, ______ four out of five households owned one.

1.4 What do the words in the gaps in 1.3 refer to?

1. He devised an experiment _____ in which _____ a spark jumped across a gap in a metal ring when a sparking coil was held a few metres away.
2.1 Defining and non-defining relative clauses

START POINT

The old photograph that you can see ahead of you shows Marconi at Signal Hill. (defining relative clause)
The story of radio probably begins with Heinrich Hertz, who was the first to produce radio waves in a laboratory. (non-defining relative clause)
Relative clauses give more information about someone or something referred to in the main clause.
Defining relative clauses specify which (or which type of) person or thing we mean.
Non-defining relative clauses simply add extra information about a noun.

We put a relative clause as close as possible to the noun it refers to:
There are just a few of the wireless telegraphs left in the world, rather than There are just a few of the wireless telegraphs left in the world that the factory produced.

Some relative clauses refer back to the whole idea in the previous clause, not just the previous noun. Most of these begin with which:
The owner of the old radio claims that it is in excellent condition — which is obviously not the case.

2.2 Relative pronouns

Adding information about people

- defining relative clause (subject pronoun — the relative pronoun is the subject of the relative clause):
  There were many people who doubted that Marconi would ever succeed.
  (Or informally: There were many people that doubted Marconi would ever succeed.)

- defining relative clause (object pronoun — the relative pronoun is the object of the relative clause):
  Augusto Righi, who Marconi studied with in the 1890s.
  (Or informally: an Italian physicist that Marconi studied with.)
  We can leave out the relative pronoun if it is the object of a defining relative clause.

- non-defining relative clause (subject pronoun):
  The story of radio probably begins with Heinrich Hertz, who was the first to produce radio waves in a laboratory.

- non-defining relative clause (object pronoun):
  Augusto Righi, who Marconi respected greatly, guided his research.
  (Very formally: Augusto Righi, whom Marconi respected greatly, guided his research.)
  Note that whom is now used only in very formal styles, mostly in writing.
Adding information about things or animals

- defining relative clause (subject pronoun):
  The invention that made this possible was the vacuum tube. More formally: The invention which made this possible ...

- defining relative clause (object pronoun):
  The model (that) you can see in Case 1 shows how this works. More formally: The model which you can see ...

- non-defining relative clause (subject and object pronoun):
  Marconi opened a 'wireless telegraph' factory in England, which employed around 50 people. Marconi's 'wireless telegraph' factory, which he set up in England, employed around 50 people. Although some people use that here, it is grammatically incorrect and should be avoided in Cambridge English: Advanced.

In both defining and non-defining relative clauses we can often use who, that or which with collective nouns referring to groups of people (e.g. company, government, orchestra):
The company who/which/that made the first radios was set up by Marconi.

[2.3] Other words beginning relative clauses

We often use when after a noun referring to a time, or words such as day, period, time:
The first public demonstration of the power of radio came in 1901, when Marconi announced that he had received a transmission from across the Atlantic.

More formally, we can often use a preposition + which:
It was a period during which they met very infrequently, or ... a period when ...

Less formally, we can use that or no relative pronoun in defining relative clauses:
I can still remember the time (that) I first watched television, or ... the time when ...

We often use why after reason:
You can probably guess the reason why radio began to lose some of its popularity, or informally ... the reason (that) radio began to lose ...

We often use where after a noun referring to a location, and after the words case, condition, example, experiment, instance, point, process, situation and system:
Move now to room 36, where you can find information and displays.
Marconi's goal was to find a system where telegraphic messages could be transmitted.

More formally, we can use a preposition + which:
He devised an experiment in which a spark jumped across a gap in a metal ring.

We use whose + noun to talk about something belonging to or connected with a person, town, country or organisation:
For most people, however, it is the Italian Guglielmo Marconi whose name is mainly associated with the development of radio.

In formal uses, noun + of which can sometimes replace whose + noun:
Project Geneva is a computing project, the purpose of which is to analyse very large amounts of data on environmental change. or Project Geneva is a computing project whose purpose is to analyse large amounts of data on environmental change.
2.4 Prepositions in relative clauses

**START POINT**

These early radio systems could only be used for Morse code, in which each letter of the alphabet is represented by a combination of dots and dashes. (These early radio systems could only be used for Morse code. In Morse code, each letter of the alphabet is represented by a combination of dots and dashes.)

A preposition usually comes before the relative pronoun in formal styles:

*In 1901 Marconi made the announcement for which he will always be remembered.*

After a preposition we usually use *whom* rather than *who* in formal styles:

*Augusto Righi, with whom Marconi studied in the 1890s, was a physicist.*

*A preposition usually comes at the end of the clause in less formal styles:

*In 1901, Marconi made the announcement which he will always be remembered for.*

*Augusto Righi, who Marconi studied with in the 1890s, was a physicist.*

We can use of which and of whom (or very informally of who) after all, both, each, many, most, neither, part, several, some; a number (e.g. one, the first, half) and superlatives:

*Radio entertainers, many of whom became household names, were highly paid.*

We can use a preposition, usually from, with where and when:

*Marconi set up a transmission station in Cornwall, from where the first transatlantic radio message was sent.*

Context listening

1.1 You are going to hear an interview with a food photographer. Which of these items do you think she uses in her work and what for?

1.2 Listen and check whether you were right.

1.3 Listen again and fill in the gaps at the end of each sentence with what the speakers actually said.

1.4 Look at your answers for 1.3. In which did the speakers use:

1. present participle (-ing form)? 1 , 2 ,
2. past participle (-ed form)? , ,
3. to-infinitive? ,
I started using an old camera belonging to my father.
The food in photographs used to illustrate cookbooks and magazine articles isn't always entirely authentic.
And then we put in some material to substitute for the food.

We can often reduce a defining relative clause so that it begins with a present participle (-ing), past participle (-ed), or to-infinitive.

-ing clauses correspond to defining relative clauses with an active verb, and -ed clauses correspond to defining relative clauses with a passive verb:
The editor working on the cookbook or magazine is often there, too. (= The editor who is working ...)
A challenge facing food photographers is how to keep food looking fresh. (= A challenge which faces ...) The big problem is the heat produced by the lights. (= ... the heat that is produced ...)
 Personally, I prefer food not made of cardboard! (= ... food which is not made of cardboard)

Verbs which are not normally used in continuous forms may be used in reduced relative -ing clauses.
This spray bottle contains glycerine mixed with water. (not ... is-containing ...)
However, we can say:
I generally have with me a spray bottle containing glycerine and water.
Other verbs like this include belong to, comprise, consist of, constitute, equal, own, possess, resemble, result from, surround.

It is not always possible to use a reduced form of a relative clause.
- We can't use a reduced form when the first verb in the relative clause is a modal verb:
  A technique that might be used in photographing meat is to use a glycerine spray.
  Food that can't be frozen is particularly difficult to photograph.
- We can't use an -ing reduced form when we talk about a single, completed action. Compare:
  Sometimes the chef who created the dish in their restaurant comes to the studio.
  (not ... the chef creating the dish ...)
The chef preparing the food today works in a well-known restaurant.
  (= The chef who is preparing the food today ...)

Reduced relative clauses can also be used instead of non-defining relative clauses, particularly in written English:
Her photographs, taken in her studio in California ... (= ... which were taken in her studio in California ...)
My parents - not having much money - rarely took us to restaurants. (= ... who didn't have much money ...)
These are usually written between commas (,) or dashes (—).

2.2 To-infinitive clauses
We often use a to-infinitive clause instead of a relative clause after:
- a superlative + noun (phrase):
  I was the youngest person in the competition to win any of the major categories.
- the first/second, etc. + noun (phrase):
  She was really the first person to encourage me to take up food photography.
- the only / the next / the last / another / one + noun (phrase):
  By the time we photograph the food, it's completely cold. The only thing to do in that case is to create steam from elsewhere.
Often we can use an active or passive to-infinitive clause with little difference in meaning:
The only thing to do in that case is to create steam from elsewhere. or The only thing to be done ...

### 2.3 Adjective phrases

Adjectives and adjective phrases can be used after nouns with a meaning similar to a relative clause. Often the adjective is followed by a to-infinitive or preposition, or used with an adverb:

- It was easy to find a photographer willing to take an assistant for no pay! (= a photographer who was willing to take an assistant for no pay!)  
- It’s a job difficult for even a skilled photographer. (= a job which is difficult for even a skilled photographer.)  
- Glycerine’s a liquid, completely colourless, that’s often used to sweeten food. (= a liquid which is completely colourless.)

A few adjectives (e.g. affected, available, present) can be used alone after a noun with a meaning similar to a relative clause:

We use cardboard or any other material available. or ... material which is available.

(See Unit 7, 2.3 for more on the position of adjectives.)

### 2.4 Prepositional phrases

We can give additional information about a thing or person using a prepositional phrase. Often these have a meaning similar to a relative clause:

The vegetables around that succulent piece of meat could be made from plastic. (= The vegetables which are around ...)

Monitors to cut home electricity use

Monitors which show the real-time cost of electricity use are to be provided free of charge to homes across the UK in an effort to slow down climate change. Under the new government proposals, from next year electricity suppliers will have to provide the devices – which have cut power use by up to 6.5% in Canada – to all customers who want them. Domestic appliances which are left on unnecessarily are estimated to waste 000 million of electricity a year.

Traditional electricity meters are usually kept out of sight in cupboards. However, the monitors, which use microchip technology and a digital display, are intended to be placed in full view as a constant reminder of the electricity that is being used in a house at any given moment.

The Environment Secretary said: ‘People want to do their bit to help protect the environment as well as save money, and visual display units that are provided free of charge will help people do both.’ A spokeswoman for the Electricity Consumer Council said it supported any plan that would give customers access to free monitors. The shadow environment secretary said: ‘Although it is an interesting and welcome measure, there are still many details that should be considered, not least the reliability of these meters.’

However, the Energy Retail Council has criticised the proposal, saying that it did not go far enough. In a statement, their chief executive said: ‘We had hoped the government would recommend the introduction of ‘smart meters’ – which communicate electricity consumption to both the customer and the energy supplier – rather than meters that are only able to do half the job.’

Should children be taken to art galleries?

The debate about taking young children to art galleries has a long history. On one side are traditionalists — conservators and keen gallery-goers — who disapprove of the noise and disruption caused by children and worry about damage to fragile paintings and sculptures. In opposition are the progressives — educationalists and parents — who contend that viewing art enriches the lives of children. This dispute has resurfaced in the media recently following a claim by the visual artist Jake Chapman that dragging children round galleries is “a total waste of time”. Parents are “arrogant”, he says, for thinking children could understand the work of such complex artists as Jackson Pollock and Mark Rothko.

Current thinking, of course, sides with the progressives. Early exposure to art widens children’s horizons, develops their curiosity about the world, and boosts their creativity. Further, it significantly increases the chances that they will have a life-long interest. With this in mind, many galleries have adopted a more child-friendly approach, encouraging parents to bring their children by arranging special events and handing out quizzes and worksheets to children as they arrive. From this perspective, expecting children to conform to adult behaviour in galleries is a form of punishment, which should be subverted at every turn.

But maybe Chapman does have a point. Developmental psychology suggests that before the age of 8 or 9 children view art only for what it represents in the real world. It is only in their early teens that children begin to go beyond representation and understand that art is created to express certain meanings and values beyond the literal. Art education is necessary before the adolescent can appreciate stylistic elements and develop a critical facility, making their own judgments about the merits of a piece. Faced with abstract expressionism such as Pollock’s drips and looping swirls or Rothko’s rectangles of colours, it’s no wonder that young children quickly lose interest. We shouldn’t be surprised if most prefer the joys of running up and down the polished gallery floors as they search the paintings for answers to worksheet questions, or even, heaven forbid, run their sticky fingers over priceless masterpieces. Should children be allowed to ruin other visitors’ experience by causing a din among the Pre-Raphaelites? Of course not.

Against this, I think back to my own experience of viewing art as a young child. I was taken to galleries regularly — but for short visits to see just a handful of paintings each time. My parents would talk about each of the paintings and always ask me what I liked most about it. I wouldn’t say that I understood everything they said, but through this exposure, over time I came to learn something about the subject matter of art, artistic techniques and, above all, the experience of viewing: what’s most important is how a piece of art makes you feel. I was lucky enough, though, to have knowledgeable and sensitive parents, and local galleries available that we could visit again and again. Access to art has undoubtedly improved my quality of life, and I only have to watch a child engaging with a painting to realize it is the same for many others.

Jake Chapman was right to reignite the debate, but his conclusion is wrong. We shouldn’t be excluding children from art galleries. Instead, we should be educating parents, helping them to improve the experience of their children’s gallery visits — good both for their children and other visitors. First, parents should know some simple ground rules of gallery behaviour and make sure they and their children stick to them: don’t touch paintings and sculptures (it can cause damage); don’t have loud phone conversations (it’s annoying for everyone else); and don’t take photos of the artworks (paintings are meant to be looked at, not posed next to — buy a guidebook afterwards if you want a record of what you’ve seen). More importantly, though, they need advice on how to encourage their children to look at and talk about artwork. The worksheets given to children could be replaced with ones for parents, including relevant information and suggested discussion topics to share with their children. Through interaction of this kind, children will grow up believing that art is for all, not just for adults or for some exclusive group of ‘art appreciators’ to which they do not belong. And by being involved, interest and enthusiasm will replace boredom.
1 What view does the artist Jake Chapman put forward about art galleries?
   A Parents think they are too difficult for children to understand.
   B Parents overestimate their value.
   C Children learn little about art by visiting them.
   D Children tend not to enjoy visiting them.

2 According to the writer, 'progressives' believe that galleries
   A should be organized with children in mind.
   B should prioritize children over adults.
   C should encourage children to paint more themselves.
   D should not restrict how children behave.

3 In the third paragraph, the writer says that very young children
   A can be taught to judge the quality of a painting.
   B are not ready to appreciate abstract art.
   C are reluctant to criticize paintings.
   D are attracted only to paintings showing scenes of real life.

4 During the writer's visits to art galleries as a young child
   A her parents told her which paintings were noteworthy.
   B she accumulated knowledge of a large number of paintings.
   C she was surprised at her parents' knowledge of art.
   D she was encouraged to evaluate art.

5 What point does the writer make in the fifth paragraph?
   A Parents need to learn more about art appreciation.
   B Gallery rules need to be enforced more strictly.
   C Not all parents can appreciate art.
   D Adults should be more tolerant of children's behaviour in galleries.

6 An idea recurring in the text is that
   A both adults and children behave badly in galleries.
   B children know as much about art as their parents.
   C it takes time for children to learn to appreciate art.
   D galleries are not doing enough to help children understand art.

1. Food with substances added to it to preserve it or to give it a new colour or taste.
2. A meal cooked before you buy it so that you only have to heat it before eating.
3. A combination of the correct quantities and sorts of food eaten every day.
4. The process of getting the right sorts of food and drink in order to keep you healthy.

1.2 ▶️ Listen to the interview and fill in the gaps.

1. At the weekend I like to make something myself _______ so as not to _______ eat processed food all the time.
2. We'll usually go out to eat _______ none of us likes cooking.
3. She also talked to me about the food she made _______ I'd learn about diet and nutrition.
4. If I get hungry, I'll eat some fruit, _______ at school I'd buy a bar of chocolate.
5. I don't eat much for breakfast _______ I'm always in a rush.
6. I have to get out by 7.30 _______ catch my bus.
7. Sometimes I get up in the night and have a snack, _______ I know it's bad for me.
8. I was absolutely exhausted _______ I had to run for the bus yesterday.
9. I don't have the opportunity to go shopping _______ I'm working.
10. It's very hard to put a healthy diet into practice _______ I know all about the theory.

1.3 Look at the word or phrase you wrote in sentence 5 in 1.2. What other word or phrase you wrote in 1.2 has a similar meaning? What other words or phrases are similar to the one in sentence 7?
2.1 Adverbial clauses: general

START POINT

I seem to eat less healthily as I get older. Although I’d like to eat more fresh food, I don’t have time to prepare meals in the evenings. An adverbial clause adds extra information to a main clause about things such as time, reason or purpose. Most adverbial clauses begin with a conjunction (e.g. as, although) and can come before or after the main clause.

An adverbial clause must be connected to a main clause; we can’t use it as a separate sentence: I don’t eat much for breakfast because I’m always in a rush. (not I don’t eat much for breakfast. Because I’m always in a rush.)

We only use one conjunction to connect an adverbial clause and a main clause: (not Because I’m always in a rush, so I don’t eat breakfast.)

2.2 Time clauses

START POINT

I generally have a sandwich and a packet of crisps as/when/while I’m sitting at my desk. We can use as, when or while to talk about something that happens when something else takes place. As can sometimes mean either ‘because’ or ‘during the time that’:

I opened the window as I was cooking. (= ... because I was cooking or ... while I was cooking)

We don’t use will in a clause with a time conjunction (e.g. before, until, when) to talk about a future action or an action that is completed before another in the main clause:
Id like to have something more substantial before I leave home in the morning. (not ... before I will leave home in the morning.)
When I’ve written up the research, I’ll let you have a copy. (not When I will have written up the research, ...)

We use when (not as or while) at the beginning of an adverbial clause which:

- refers to a point in time:
  I remember once I was eating some sweets in my bedroom when my mother walked in.
- describes the circumstances in which the event in the main clause happens:
  When I get home late, I take a ready meal out of the freezer.
- refers to a past period of our lives:
  When I was younger, my mother used to keep an eye on what I ate.
- talks about ‘every time’ something happens:
  When/Whenever I’ve had one of those ready meals, I feel hungry by the time I go to bed.

We prefer as to show that one thing changes at the same time as another:
As I put on weight, it gets more and more difficult to exercise. (rather than When/While I put on weight)

We can use as or when to highlight the moment that something happens:
As/When I turned the corner, the bus was just pulling up ... (not While I turned ...)
13 Adverbial clauses

2.3 Contrast and concession clauses

We use although or, less formally, though to say that there is a contrast between what happens in the main clause and the adverbial clause:

Sometimes I get up in the night and have a snack, although I know it's bad for me.

or to introduce a concession clause that suggests the opposite of the main clause:

Although I don't enjoy cooking, I prepare a meal for myself every evening.

We can use though at the end of a clause:

In some ways, it's better now, though. (not ... it's better now, although.)

We can use despite the fact that / in spite of the fact that or despite / in spite of + -ing with a similar meaning to although:

Despite the fact that I know all about the theory of a healthy diet, it's very hard to put it into practice. or In spite of the fact that I know ...

Despite (my) knowing all about the theory of a healthy diet, it's very hard to put it into practice. or In spite of (my) knowing ...

We can use while or whereas to say that there is a contrast with something in the main clause. The while/whereas clause may come before or after the main clause:

If I got hungry at school, I'd buy a chocolate bar, whereas nowadays I'll eat some fruit. or ... while nowadays ...

Whereas nowadays I'll eat some fruit, at school I'd buy a chocolate bar. or While nowadays ...

We can use whilst as a more formal alternative to while.

(See also Unit 14, 2.3 Even if and even though.)

2.4 Reason clauses

START POINT

I must be eating too much because I've been getting a bit overweight recently.

Because it's so easy to buy ready meals from the supermarket, it makes me quite lazy.

I have to get out by 7.30, so I really don't have time.

A very common way of giving a reason or explanation for something, particularly in speech, is to use an adverbial clause with because. A clause beginning so is also often used to express a similar meaning.

Most recipes in magazines are no use to me because of the time they take.

Because of can also be used before a noun or noun phrase to give a reason for something.

Formal alternatives to because are as and since:

She made a particular effort because/as/since I was often ill as a child.

Informal alternatives to because are seeing that and seeing as:

We'll usually go out to eat seeing that/as none of us likes cooking.

2.5 Purpose and result clauses

To talk about the purpose of an action we can use in order / so as + to-infinitive:

I have to get out by 7.30 in order to catch my bus. or ... so as to catch ...

Informally, it is more common to use a to-infinitive to express the same meaning:

I have to get out by 7.30 to catch my train.

In negatives we prefer in order not / so as not + to-infinitive rather than not + to-infinitive:

I like to make something myself so as not to / in order not to eat processed food all the time.

We also use in order that and so that to talk about a purpose:

She also talked to me about the food she made in order that I'd learn about diet and nutrition. or less formally ... so (that) I'd learn about ...
We often use modal verbs after in order / so that:
It'll be interesting to read the results of the research so that I can see how typical my diet is.
She also talked to me about the food she made so that I’d learn about diet and nutrition.

When (5) you will get / you get the chance, give me a ring and we'll sort out another time to meet. Bye for now.
Life in Spain

Spain is a vast and varied country, and its people have (0) _few_ things in common (1) _for their friendliness, sociability, and hospitality_. Spaniards have a reputation for not letting work get in the way of enjoyment, and for spending as (2) _as possible_ time and energy as on their social lives. Their frequent use of the word _mañana - leave things (3) _tomorrow - is seen as being characteristic of this tendency_. While this may be a stereotypical view of Spanish life, it is true that many people organise their working hours (4) _as to make the most of their free time_. Spaniards are sociable (5) _that they like nothing better than spending time with friends and relatives_. Eating together is an important part of social life, and large groups often (6) _up for dinner_. Not (7) , Spain is thought to have more restaurants per head of population than any (8) _European country_.

For questions 1 - 8, read the text below and think of the word which best fits each gap. Use only one word in each gap. There is an example at the beginning (0).

1.1 Look at these photos of places where wild animals can be seen. Which places are shown here?

a. [Image of a polar bear]
b. [Image of a giraffe]
c. [Image of a safari vehicle]

1.2 Listen to part of a radio discussion programme where three people are being interviewed about the opening of a new zoo. Which speaker or speakers (Liam, Nadia or Mariam) make these points?

1. Most people don't have the opportunity to see wild animals in their natural environment. **Liam and Mariam**
2. Captive breeding programmes are important in preserving wild animals. ________________
3. Animals may suffer when they are being taken to zoos. ________________
4. Many animals now in zoos were born there. ________________
5. It is unacceptable to keep animals in cages or small enclosures. ________________
6. Safari parks haven't always looked after animals well. ________________
7. The main purpose of zoos and safari parks is to make money. ________________
8. Game reserves need to be supported by governments in developed countries. ________________

1.3 What word or phrase did the speakers use to link these ideas? Listen again if you are not sure.

1. we didn't have zoos + most people would never see wild animals in real life __________ if
2. we expand captive breeding + many more animals will die out ________________
3. wild animals are born in a zoo + it's still cruel to keep them in a small enclosure ________________
4. I'm all in favour of safari parks + the animals are well looked after ________________
5. they say they are concerned about the welfare of animals + they are still businesses mainly out to make a profit ________________
6. developed countries put money into these reserves + species will be preserved ________________

1. If we didn't have zoos, most people would never see wild animals in real life.
Real and unreal conditionals

**START POINT**

Conditional sentences may suggest that an event or situation is real – it is true, generally happens, has happened or is likely to happen; or unreal – it is imaginary or untrue, did not happen or is not likely to happen.

**Real conditionals**

*If there is a health problem, vets deal with it quickly.* (if + present simple, + present simple)

*Before safari parks were opened, if people wanted to see lions and giraffes, they had to go to a zoo.* (if + past simple, + past simple)

*If we don't provide safe havens for animals, many will die out.* (if + present simple, + will + bare infinitive)

**Unreal conditionals**

*If they were in the wild, they would have more space to roam free.* (if + past simple, + would + bare infinitive)

*If we had introduced captive breeding programmes sooner, we would have prevented the extinction of a number of animals.* (if + past perfect, + would have + past participle)

**Real conditionals**

We can use a wide variety of other patterns in the if-clause and the main clause:

*If we're going to protect animals in Africa, we'll need to invest much more money* ... (if + going to, + will + bare infinitive)

*If we close zoos, we might deprive people of the opportunity of seeing wild animals.* (if + present simple, + might + bare infinitive)

*If you think closing down zoos will improve the chances of survival of endangered species, you're making a big mistake.* (if + present simple, + present continuous)

We don't usually use will in the if-clause:

*If they're not eaten by the larger animals first, they'll be killed by visitors' cars.* (not if they won't be eaten ...)

However, we can use will in the if-clause:

*when we talk about a result of something in the main clause:*

... we should have captive breeding programmes if it will help save species. or ... if it helps ... .

*when we want to show that we strongly disapprove of something:*

A: That zookeeper was really annoyed with me.
B: Well, if you will throw stones at the animals, it's not surprising!

**Unreal conditionals**

We can use modals other than would in the main clause:

*If we'd introduced captive breeding earlier, animals now extinct might have survived.*

We don't usually use would in the if-clause:

*If we had more funding, we would be able to do even more* ... (not if we would have more funding ...)

**Mixed conditionals**

We can sometimes vary conditionals by mixing the tenses:

*if + past tense, would have + past participle*

*If it wasn't so expensive, we would have opened many more safari parks around the country.* (= it is very expensive, so we didn't open any more)
Conditionals

14

• if + past perfect, would + bare infinitive
  
  If game reserves had been set up earlier, there would now be fewer animals in danger... (= game reserves were not set up earlier, so more animals are in danger)

  In formal contexts we can use were instead of was in the if-clause:
  
  If it were not for zoos, most people would never see wild animals or less formally If it was not for...

  We prefer to use were in the expression if I were you ... for giving advice.

  We can use if ... were + to-infinitive rather than if + past simple to talk about imaginary future situations:
  
  If the government were to ban zoos, it would put captive breeding programmes at risk. Or if the government banned zoos...

  We don't usually use this pattern with state verbs (e.g. belong, doubt, know, understand):
  
  If we understood more about animal behaviour we would be in a better position to protect them. (not If we were to understand more about ...)

2.2 If ... not and unless

START POINT

In real conditional sentences, we can often use either unless or if ... not when the meaning is 'except if':

Unless we expand captive breeding, many more animals will die out or If we don't expand ...

We usually use if ... not instead of unless:

• when we say in the main clause that an event or action in the if-clause is unexpected:
  
  I'll be surprised if we don't get permission to build the zoo.

• usually in questions:
  
  How will children learn about wild animals if they don't see them in zoos?

• when the meaning is similar to 'because ... not' rather than 'except if':
  
  If developing countries don't have the money to establish nature reserves, more developed countries must offer help.

• in unreal conditional sentences:
  
  If we didn't have zoos, most people would never see wild animals.

We use unless instead of if ... not when we introduce an afterthought:

We must have zoos if we want children to learn more about wild animals - unless their parents are rich enough to go on holiday to Africa, of course.

2.3 Even if and even though

We can use even if to mean 'whether or not' and even though to mean 'despite the fact that':

Even if wild animals are born in a zoo, it is still cruel to keep them in a small enclosure. (= whether or not animals are born in a zoo)

Even though they say they are concerned about the welfare of animals, they are still businesses mainly out to make a profit. (= despite the fact that they say they are concerned)

2.4 If only and wish

We can use if only / wish + past simple to say that we want a present situation to be different, and if only / wish + past perfect to say that we regret a past event:

I wish the situation was/were different, or If only the situation was/were different.

If only we had acted sooner, or I wish we had acted sooner.
We can use *if only* / *wish + would* to criticise someone, to say that we want someone to change their behaviour or that we want something to change:

I wish Nadia Muller and the people in *Save the Animals* would read the scientific research ...

We can't say *I wish I would* ...

I wish I *worked* in a zoo or *I wish I could work* in a zoo. (*not I wish I would work* ...

### 2.5 Other conditional expressions

A number of other expressions are used at the beginning of conditional clauses:

*I'm all in favour of safari parks provided (that) / providing (that)* the animals are well looked after.

*So long as / As long as* developed countries put money into these reserves, species will be preserved.

*I'm willing to support the proposal on condition that* animals are kept in large enclosures.

*In the event of* the alarm sounding, visitors should leave the zoo by the nearest exit.

*Supposing* the proposal is rejected, what will you do then?

*An alarm will sound in case of* animals escaping from the safari park.

*We must protect natural habitats, otherwise more animals will become extinct.*

*But for* the existence of zoos, many people would never have seen wild animals.

### Grammar exercises

#### 3.1 Underline the correct answer(s) in (b) to make a second sentence with a meaning as close as possible to the sentence in (a).

1. **a** With a student card you can get a discount at the bookshop.
   
   **b** If you *will have / have* a student card you can get a discount at the bookshop.

2. **a** I didn't know you were a vegetarian, otherwise I wouldn't have cooked lamb.
   
   **b** If I *know / had known* you were a vegetarian, I wouldn't have cooked lamb for dinner.

D  an author  Speaker 4  4
E  a lawyer  Speaker 5  5
F  a teacher
G  a lorry driver
H  an unemployed person

**TASK TWO**
For questions 6 – 10, choose from the list (A – H) what each speaker is expressing.

A  admiration for people who can cook well  Speaker 1  6
B  a pride in their cooking ability  Speaker 2  7
C  a reluctance to cook  Speaker 3  8
D  a criticism of current trends in cooking  Speaker 4  9
E  a desire to learn to cook  Speaker 5  10
F  a wish to try food from other countries
G  an awareness of their poor diet
H  a dislike of unfamiliar food
Participle, to-infinitive and reduced clauses

Participle clauses including present participle (-ing) clauses, past participle (-ed) clauses, participle clauses after conjunctions and prepositions, to-infinitive clauses, reduced clauses

Context listening

1.1 Sam Green has taken three months off work to do a sponsored walk through Italy raising money for charity. Each week he sends an article to his company for its newsletter. Listen to two of his colleagues talking about Sam's latest article. Which of the problems does Sam talk about?

1.2 Listen again and complete the sentences with the exact words Sam uses.

1 Having fallen over a number of times, I was feeling thoroughly miserable.
2 by a difficult few days, I was only interested in finding a bed for the night.
3 Naples, I bought yet more walking socks.
4 the sprawl of the city behind me, I walked up into the hills.
5 my sleeping bag, I discovered a scorpion.
6 by a scratching sound, I found a large rat trying to get into my backpack.
2.1 Participle clauses: general

A participle clause usually refers to the subject of the main clause:

**Snarling aggressively, the dogs were pretty terrifying at first.** (= the dogs were snarling and the dogs were pretty terrifying)

We avoid using a participle clause when the subjects are different:

**Snarling aggressively, I kept away from the dogs.** In this example, the writer is trying to say that the dogs were snarling and he kept away from them. However, it sounds as if he was snarling! The more accurate alternative is: **The dogs were snarling aggressively, so I kept away from them.**

In formal English, a participle clause can sometimes have its own subject, which is often a pronoun or a noun phrase including a pronoun:

**Scorpions in North Africa, some measuring up to 20 centimetres, can kill adults.** (Scorpions in North Africa = subject of the main clause; some = subject of the participle)

When we use **not** in a participle clause it usually comes before the participle:

**Not wanting to carry my backpack any further, I went to the first hotel I came across.**

2.2 Present participle (-ing) clauses

We can use a present participle clause to talk about something that takes place at the same time as, or just before, an action in the main clause:

**Opening up my sleeping bag, I discovered a scorpion.**

A present participle clause can be used to give background information:

**Living mainly in warm climates, scorpions have existed for over 400 million years.**

and after quoted speech, to say what someone was doing while they were talking:

‘Wait for me here,’ said Frank, running out of the house.

Present participle clauses can also be used to talk about a reason or result:

**Arriving in Amalfi early in the afternoon, I had time to look around the town.** (= because I arrived in Amalfi early in the afternoon)

2.3 Past participle (-ed) clauses

We can use a past participle clause to talk about reasons and conditions:

**Made from the softest leather imaginable, they are as comfortable as a pair of slippers.** (reason = because they are made from the softest leather imaginable)

**Sold in Britain, the boots would have cost a lot more.** (condition = if they were sold in Britain)

Past participles combine with forms of **be** and **have** to create passives and perfect forms:

**Having fallen over a number of times, I was feeling thoroughly miserable.** (= I was feeling thoroughly miserable because I had fallen over a number of times)
We can use either *having + -ed* or a present participle with a similar meaning to describe events that follow one after another. However, *having + -ed* emphasises that the action in the participle clause is complete before the action in the main clause begins:

**Having climbed** to the top of the hill, I could see all the way to the Mediterranean. or *Climbing* to the top of the hill, ...

**Being made** so welcome at the hotel, I was reluctant to leave. (= because I was made so welcome)

**Having been woken up** by a scratching sound, I found a large rat trying to get into my backpack. (= after I had been woken up)

### 2.4 Participle clauses after conjunctions and prepositions

We can use a present participle clause after a number of conjunctions and prepositions, including: *after, before, by, in, on, since, when, while, with, without, unless, until*:

**Before leaving** Naples, I bought yet more walking socks. or less formally **Before I left** Naples, I bought yet more walking socks.

We can also use *with* (or informally *what with*) to introduce a reason for something in the main clause. Notice that a subject has to come between *with* and *-ing*:

**With Naples being** such a busy city, I was surprised to find a hotel room so easily.

**What with sleeping** badly, and some very steep hills to walk over, it was quite a relief to get to Amalfi this afternoon. (= because I had slept badly)

In formal contexts we can use a past participle after (*al)though, as, if, once, when, while, unless and until*:

**Walking through Italy was a fantastic experience, but if asked, I'm not sure I'd do it again.** or ... **but if I was asked** ...

### 2.5 To-infinitive clauses

We can use a clause beginning with a to-infinitive to talk about purpose, result or condition:

I *walked up into the hills to avoid* the long trek around the coast. (= purpose)

I *got to* the hotel early, *only to find* that I couldn't check in until later. (= result)

**To hear** him grumbling last week, you'd think he was about to get on the next flight home (= if you had heard him grumbling)

### 2.6 Reduced clauses

We can sometimes use a *reduced* clause beginning with a conjunction or adjective, but with no verb. Reduced clauses are usually fairly formal:

**While in Naples, I did what all visitors do.** or **While I was in Naples, ...**

**Exhausted by my walk, I went straight to bed.** or **Because I was exhausted ...**
Grammar exercises

3.1 Complete the participle clause at the start of each sentence using the information in brackets.

1. Swimming strongly, she was able to cross the river in just a few minutes. (She swam strongly.)
2. In oil, Colin got out from under the car. (He was covered in oil.)
3. In Latin, the two letters were sent in 1406 to the French king. (They were written in Latin.)
4. Them twice this year already, Bayern Munich are favourites to win again against Real Madrid. (They have beaten them twice this year already.)
5. How to use the software, I found it easy to design my own website. (I was shown how to use the software.)
6. Eaten anything for hours, I was starting to feel a bit faint. (I hadn't eaten anything for hours.)
7. Her glasses, she began to read her speech. (She put on her glasses.)
8. Portuguese, I found travelling in Brazil difficult. (I can't speak Portuguese.)

3.2 Read this extract from a blog about a visit to London. Rewrite the underlined parts using a participle clause, to-infinitive or reduced clause.

While I was in London I just had to go to the British Museum. There's so much to see and I only had time to spend a few hours there. First, I went to the collection of clocks and watches. When I saw the pocket watches, I was reminded of the old watch my grandfather used to wear. I don't think I ever saw him without it. Then I went to the Money Gallery. They've got an incredible collection of coins, and some of them are over 2,000 years old. Next stop was the Chinese collection. Because I'd lived in Hong Kong for so many years, I was very interested in this. Some of the jade objects were stunning. After I looked at the Chinese collection, I had hoped to see the Mexican collection. Unfortunately, when I got there I found that it was closed. Because I'd spent the whole morning walking around the museum, I decided that I wanted to do something very different in the afternoon. So I went to the London Eye in order that I could get a bird's-eye view of the city. When they are looked at from the top of the Eye, some of the biggest buildings appear quite small — even St Paul's Cathedral, across the river. After that, because I was tired from all the walking, I went back to my hotel room and slept for a couple of hours before I went out to have dinner.
3.3 In these sentences, is the subject of the participle and the main clause the same (S) or different (D)? If it is different, think about how you could rewrite the sentence correctly.

1 Painted bright yellow, I could see the signs clearly from a distance. **D**
2 Hearing a noise from one of the bedrooms, I quietly climbed upstairs. 
3 Laughing at her new hat, Jing looked really angry with me. 
4 Kept in the fridge, the cheese should stay fresh for weeks. 
5 Holding her umbrella tightly, she went out into the storm. 
6 Talking to each other in the library, I asked them to keep quiet. 
7 Caught in traps put on the riverbed at night, many fishermen depend on crayfish for their livelihood. 
8 Worried that Zahra hadn't arrived, I decided to phone her home. 
9 Because the signs were painted bright yellow I could see them clearly from a distance.

3.4 Complete each sentence using one of the words in the box and an appropriate form of the verb in brackets. Use either an -ing, an -ed or being + -ed verb form.

- although
- before
- if
- once
- since
- while
- with
- without
- unless
- until

1 **Unless** otherwise **stated**, all software contained on the CD is for demonstration purposes only. *(state)*
2 **my book on the European Union, I interviewed more than a hundred members of the European Parliament. (research)*
3 **no longer** in the day-to-day running of the business, Mr Chen retains a keen interest in its development. *(involve)*
4 **Defence Minister, he was head of the army for five years. (make)*
5 **her parents, she took their car and drove into town. When they found out, they were furious. (ask)*
6 Not **school had anyone told me to 'sit down and be quiet.' (leave)*
7 The virus doesn't have serious effects, but **it remains in the body for life. (catch)*
8 **the wind hurricane force, ships have been advised to head for land. (reach)*
9 I slept deeply **by a fire engine going past the house. (wake)*
10 **guilty, she could face ten years in prison. (find)*
Access to a clean, (0) reliable water supply is essential to our survival. (1) over 70 percent of the earth's surface, water is apparently (2) . But in fact, less than 1 percent of all the water on earth is accessible for human use in lakes, rivers and reservoirs. (3) by rain and snowfall, this water supply is available to us as a finite but (4) resource. As the demand for access to this limited supply increases, it is thought that as many as 3.5 billion people could experience water (5) by 2025. A worldwide water management plan is vital. An international campaign must be introduced both to raise public (6) of the importance of conserving and (7) this precious resource. Furthermore, industry and agriculture must be made to reduce their water (8) . Only in this way can water-related international conflicts be avoided.
Context listening

1.1 You are going to hear Joe Simpson, head of the Norton Wildlife Trust (NWT), encouraging some residents of Norton to volunteer for projects. Before you listen, look at these pictures and identify the activities.

1.2 Listen to the talk. Which of the activities are mentioned?

1.3 Listen again and decide whether these statements are true (T) or false (F).

1.4 Listen again and complete these extracts with the words you hear.

1.5 Look at your answers to 1.4. What words begin each clause you have written?
What you’ve told us is very interesting. (= The information is very interesting.)

You’ve probably also heard that the Marsh has been given to the NWT to look after. (= You’ve probably also heard this report.)

Nine o’clock is when we usually meet. (= Nine o’clock is our usual meeting time.)

A noun clause functions in a sentence in a similar way to a noun (e.g. information, report) or noun phrase (e.g. our usual meeting time). Noun clauses usually begin with that or a wh-word (e.g. what, when, where, which, who, why; also whether, whatever, how).

2.1 That-noun clauses

In informal contexts we often leave out that at the beginning of a that-noun clause:

It’s also good to know that they’re helping the environment. or ... to know they’re helping ...

I can guarantee that you’ll make a lot of new friends. or I can guarantee you’ll make ...

We usually use the fact that (rather than that):

- when the noun clause is subject:
  The fact that you’re not a member of the trust makes no difference. (rather than That you’re not a member of the trust makes no difference.)

- after a preposition or after verbs such as change, face (up to) and overlook:
  We have to face (up to) the fact that we don’t have enough resources at the moment.

We can often use words like argument, assumption, belief, claim, idea, notion and view instead of fact:

The idea that it’s all hard work is just wrong.

2.2 Wh-noun clauses

When a wh-noun clause follows certain nouns (e.g. example, problem), we often have to include of before the wh-word:

We’d like to follow the example of what they’ve done at Broadstone Park.

Some verbs (e.g. advise, teach) must have an object before the wh-word:

I’ll be happy to advise you when to come.

Noun clauses beginning how are commonly used after certain verbs (e.g. decide, know):

It’s entirely up to you to decide how much time you can give.

We can use a wh-noun clause, but not a that-noun clause, after a preposition:

If you’ve got any questions about what I’ve said so far, I’d be happy to answer them. (not ... about that I’ve said so far ...)

We can also use noun clauses beginning with whatever (= anything, or it doesn’t matter what), whoever (= the person/group who, or any person/group who) or whichever (= one thing or person from a limited number) to talk about things, people or times that are indefinite or unknown:

We will be very grateful for whatever time people can spare.

You can phone whoever is in charge of arranging lifts on the weekend you want to come.

Rather than a wh-noun clause, we can often use a noun or pronoun which has a meaning related to the wh-word:

Why most people volunteer is that they want fresh air and exercise. or The reason (why that) most people volunteer ...

Clearing the vegetation is what is urgently needed. or Clearing the vegetation is something which/that is urgently needed.
Other words used in this way include the place (rather than where), the time (rather than when), the way (rather than how) and somebody/someone (rather than who).

### 2.3 Whether and if

We can use whether as the wh-word in a noun clause when we talk about possible choices. Whether has a similar meaning to if:

*I can't remember whether it runs on Sundays.*

Notice the difference between sentences with whether- and that-noun clauses:

*I didn't know whether/if the bus service had been cancelled.* (= it may or may not have been cancelled)

*I didn't know that the bus service had been cancelled.* (= it was cancelled; now I know)

In more formal contexts, particularly in writing, we can use as to with a meaning similar to 'about' or 'concerning' before a whether-noun clause:

*There was some debate as to whether he could legally give us the land.*

We use whether, not if:

- before or not:
  
  *I don't know whether or not I'd be able to come on a regular basis.*
  
  *However:
  
  I don't know whether/if I'd be able to come on a regular basis or not.*

- before a to-infinitive:
  
  *I can't make up my mind whether to help.*
  
  *You can think about whether you'd like to be involved.*

- usually after a preposition, and also after the verbs advise, choose, consider, debate, discuss, enquire, question:

  *You can think about whether you'd like to be involved.*

- in a clause acting as a subject or complement:

  *Whether you help with the outdoor or indoor work depends on you.* (= subject)

  *What I'm not clear about is whether we can get a lift to the reserve.* (= complement)

### 3.1 Read these comments by a resident, a fire officer and a climate change expert about a recent flood. Complete each text with that or the fact that.

**Resident:** Nobody really thought (1) __________ that flooding this bad would happen again, but as the river level rose, we had to face up to (2) __________ we'd have to leave our home. Personally, I blame the fire service. (3) __________ it's been raining heavily here for five days should have meant that they were better prepared to help us.

**Fire officer:** I really feel (4) __________ some of the criticisms of my fire officers are unfair, although (5) __________ today is a public holiday did mean that many of our staff weren't here to help with the rescue. However, we warned residents yesterday (6) __________ they might have to evacuate their houses with little notice, and the difficulty in evacuating people from their houses wasn't helped by (7) __________ they wanted to take large amounts of personal belongings with them.

**Climate change expert:** We can't ignore (8) __________ climate change is going to increase the risk of flooding, and a number of studies have suggested (9) __________ winter river levels throughout the country will be much higher than in the past. Unfortunately, the situation in this area is complicated by (10) __________ so many trees have been cut down on the hills around here and rainwater flows more quickly into the rivers. So there's a real possibility (11) __________ serious flooding could now happen here every winter.
I rented a car yesterday and drove about 50 miles from Paris to Chartres. The area around Chartres is very flat. That's probably the reason why it was built there. It dominates the landscape from the way you approach it. At first, I wasn't sure of the cathedral. I'm pretty independent and like to wander around on my own. But this time I decided to go for it, and I'm really glad I did—the guide was excellent! She talked a lot about it was begun before 1200—it was begun before 1200—and told us who it was built for. Some of the stone was transported from hundreds of miles away—I'll never understand how. Apparently in those days architecture was a cooperative effort by the stonemasons working on the site. She also gave us some idea of whatever it was. It sounds like an incredibly hard life. I thought the stained-glass windows were awesome. I was so impressed with whoever created and it creates patterns on the cathedral floor. After the tour, I looked again at my guidebook and noticed that it mentioned the 'easy climb' up the north tower, so off I went. But whoever must have been super-fit. For me it was a long, exhausting climb, and there were times when I didn't know why. The magnificent view was certainly worth the effort when I got to the top, but be warned!

Context listening

1.1 Which of these do you think learner drivers find most difficult?
- reversing around corners
- overtaking
- parking
- starting on a hill
- getting into the correct lane
- changing gear
- driving at night
- using the rear-view mirror

1.2 Listen to Sahar and Claudio talking about their experiences of learning to drive. Which of the things in 1.1 were particular problems for them?

1.3 Listen again.

1 In what order does Sahar mention these advantages of being taught by a professional instructor?
- he passed on useful tips
- he was always encouraging
- he used a dual-control car
- he could tell when she was ready to take her test

2 In what order does Claudio mention these advantages of being taught by his mother?
- she was calm most of the time
- he got lots of time to practise
- she knew a quiet place to practise
- he didn’t have to pay for lessons

1.4 What words or phrases are used to connect these ideas?
- I stalled in the middle of a busy road + my instructor stayed completely cool even if
- I had the mirror positioned + I just couldn’t judge where the back of the car was
- it was disappointing to have replacement instructors + the replacements were patient and helpful
- it’s expensive to have driving lessons + I would recommend it
- my mum doesn’t have a professional qualification + she has lots of experience
- I didn’t do anything stupid + she stayed calm

1 Even if I did something incredibly stupid like stalling in the middle of a busy road, he’d stay completely cool.
2.1 Sentence connectors and conjunctions: general

**START POINT**

My mum used to come and collect me from college in the car and I'd drive home. **What's more,** she'd let me drive when we went shopping.

A sentence connector (e.g. *what's more*) links one sentence with another.

*My mum taught me to drive because* I couldn't afford to pay for driving lessons.

A conjunction (e.g. *because*) links clauses within a single sentence.

To link two clauses, we use only one conjunction, not two: **Although** it's expensive having driving lessons, I'd really recommend it. (**not** Although it's expensive having driving lessons, but I'd really recommend it.)

We usually put a comma between clauses linked by a conjunction: **As long as** I didn't do anything stupid, she stayed pretty calm.

However, when *because* or *while* (referring to time) begin the second clause in a sentence, we don't need a comma.

Sentence connectors usually come at the beginning of a sentence and less often at the end or in another position. The only ones that can't come at the beginning are *too* and *as well:*

*You can spend a lot more time practising, as well.*

We usually put a comma after a sentence connector at the beginning or end of a sentence: **My mum thought I was ready to take my driving test. However,** I failed first time.

When a sentence connector comes elsewhere in a sentence, punctuation is more variable.

*There are lots of advantages in having your parents teach you. There's the cost, for instance ...*

Sentence connectors can be used to link clauses in a sentence if the clauses are joined with *and, but, or, so,* or a semi-colon (;), colon (:) or dash (—):

*My instructor was very experienced and, as a result, he had lots of useful tips to pass on. Having a professional teach you to drive is best; however, it can be very expensive.*

### 2.2 Conjunctions: before, until

Sometimes we can use either *before* or *until* with little difference in meaning:

*She wouldn't let me drive on busy roads before/until I could control the car well.*

We use *until,* not *before,* when an action continues to a particular time and then stops:

*I just carried on having lessons until my instructor said I was ready to take the driving test.*

### 2.3 Conjunctions: hardly, no sooner, scarcely

After *hardly* and *scarcely* the second clause usually begins with *when* or *before; after* *no sooner* it begins with *than* or *when:*

*We'd hardly driven out of our road before we were shouting at each other. I'd no sooner passed my test than/when my friends started asking me for lifts.*

We often use the past perfect in a clause with *hardly, no sooner* or *scarcely* and a past simple in the other clause. (See Unit 21, 2.3 for word order in sentences with *hardly, no sooner* and *scarcely.*)
2.4 Sentence connectors: *first(ly), at first; last(ly), at last*

We use *first* or *firstly* to label the first point in a list and *last* or *lastly* to label the final point. We use *at first* to indicate that there is a contrast between two past situations, and *at last* to show that something happened later than hoped or expected:

- *Firstly*, cars like the one I learnt in have dual controls.
- *At first*, I couldn't get the hang of this at all.
- *I passed my driving test at last*, after taking it five times.

We don't use *at last* to label the last point in a list:

- *First*, I had to practise starting on a hill ...
- *Finally/Lastly*, the instructor made me reverse around a corner.

(Not: *At last, the instructor made me reverse...*)

2.5 However

*However* is often a sentence connector, but can also be used:

- as an adverb when it is followed by an adjective, adverb or *much/many*:
  
  - *My instructor never got annoyed, however badly I was driving* (= despite how badly)
- as a conjunction when it means 'in whatever way':
  
  - *However I had the mirror positioned, I just couldn't judge where the back of the car was.*

2.6 Even so (sentence connector), even though (conjunction)

*Even so* has a meaning similar to *however*. We use it to introduce a fact that is surprising given what has just been said:

- *He was great and I didn't want to be taught by anyone else. Even so, I always found the replacements very patient and helpful.*

We use *even though* to say that a fact doesn't make the rest of the sentence untrue:

- *Even though she doesn't have a professional qualification, she's got lots of experience to pass on.*

2.7 Sentence connectors: *on the other hand, on the contrary*

We use *on the other hand* when we compare or contrast two statements. We sometimes introduce the first statement with *on the one hand*:

- *It may be that the quality of the tuition is better with a professional driving instructor. On the other hand, it's cheaper if your parents teach you.*

*On the contrary* emphasises that we reject the first statement and accept the second:

- *Some people say that it's more expensive to be taught by a driving instructor than a friend or relative. On the contrary, it works out cheaper.*

2.8 Prepositions commonly confused with conjunctions and connectors

These are prepositions, and can't be used as conjunctions or sentence connectors:

- *As well as* being calm and patient, he was always very encouraging. (*not As well as he was calm ...*)
- *Apart from* the cost of insurance, I think it's much better to be taught by your parents. (*not Apart from the insurance costs were high ...*)
- *I think there's a lot of other good things about having your parents teach you, besides saving money.* (*not ... besides you can save money.*)
- *I'd recommend professional driving lessons despite / in spite of the expense.* (*not ... despite / in spite of they are expensive.*)
- *The lesson was cancelled due to the heavy rain. (not ... due to it was raining heavily.)*
- *We used to stop driving at some point during the lesson, and he would ask me how I felt I'd improved.* (*not ... at some point during we were having the lesson...*)

You are going to read four reviews from a website in which different writers give their views on a book about what the Earth would be like if people disappeared from it. For questions 1 - 4, choose from the reviews A – D. The reviews may be chosen more than once.

---

**The World Without Us**

*Four reviewers comment on author Alan Weisman’s book called The World Without Us.*

**A**

Alan Weisman imagines what the Earth would be like if humans were suddenly and completely wiped out. This starting point ignores the fact that nothing is likely to kill us off completely, at least not without taking a large part of the rest of life with us. Even if a virus appeared with a 99.99 percent kill rate, it would still leave more than enough naturally immune survivors to repopulate the Earth to current levels in 50,000 years. This said, Weisman’s book is fascinating, readable and thought-provoking. The mass of scientific evidence of human impact that he compiles is mind-boggling. I did not know, for instance, that there are one billion annual bird deaths from flying into glass in the United States alone; or that graphic designers have been called in to imagine what warnings against approaching nuclear waste containers will be comprehensible 10,000 or more years from now. His solution is a mandatory one-child limit for all families worldwide. Radical, but undoubtedly necessary, as he convincingly argues.

---

**B**

Alan Weisman’s ‘thought experiment’ in *The World Without Us* is to imagine what the world would be like if every human vanished tomorrow. But he offers no real context for the book, no rationale for exploring this fantasy other than his unsubstantiated belief that people find it fascinating. Perhaps they do, and we might guess their reasons. But none emerges in any compelling way to explain why it is important to know, for instance, that the Great Wall of China will crumble in a few centuries. Much of the book comprises revelations of this kind, but there is little information here that is all that new. If you follow environmental issues, nothing in *The World Without Us* is likely to shock or astound you. The way to avoid the apocalypse, so Weisman believes, is to limit to one child every human female on Earth. However, his draconian solution is only briefly described and comes much too late in the book to be convincing.

---

**C**

What Alan Weisman does is imagine what would happen to the world if we were all wiped out. And it is quite understandable, as we learn during the course of this book, to take this as a realistic prospect as we are very, very bad for our own environment. What starts out with promise continues disappointingly. For those well versed in the science of environmental degradation, the book provides numerous anecdotes about our appalling impact on the Earth that sound all too familiar. Personally, I found Weisman’s journalistic style increasingly irritating as the book progressed. Is it really necessary to know that his interviewees include a ‘curly-haired young director’ or someone ‘trim and youthful in their early fifties’? His most extreme solution, to limit families to one child, is unrealistic. Although readers might agree that there are too many of us, few will share Weisman’s certainty that to trade a child for more birdsong is a good bargain.

---
What would the Earth be like if everyone was killed off by an astronomical event or disease? Such thought experiments are the stuff of Alan Weisman's new book *The World Without Us*. Weisman's argument would be an interesting read if it weren't for the nagging suspicion that there is something rather ludicrous about its very premise: that a world without human beings could possibly matter to us. The themes in Weisman's interviews with people from around the world are familiar. Over-harvesting, over-farming and over-industrialisation are destroying the planet. Unless we change our ways, we are doomed. But there isn't much new evidence to throw into the debate. The book is saved, however, by Weisman's writing. His engaging journalism makes for a gripping fantasy that will make most readers hope that at least some of us can stick around long enough to see how the journey of the human race on our planet turns out.

Which reviewer

has a different opinion from the others on how relevant Weisman's imagined situation is? 1

supports reviewer A's opinion on Weisman's writing style? 2

has a different view from the others on the originality of Weisman's evidence? 3

takes a similar view to reviewer C on Weisman's proposed solution? 4
The passive

Using the passive; active and passive verb forms; passive forms of verbs with two objects; get + past participle; get/have + object + past participle

1.1 You are going to hear an interview with a government minister talking about crime statistics. Before you listen, look at these newspaper headlines and match them with the crimes they refer to.

1. burglary  
2. firearm offences  
3. street crime  
4. car crime  
5. vandalism  

1.2 Listen to the interview. Which crimes are mentioned?

1.3 Listen again. According to the minister, are these statements true (T) or false (F)?

1. The chance of being a victim of crime has fallen by 40% in the last ten years. T  
2. Peter Miles appointed a new head of the police service.  
3. The government has spent a lot of money on CCTV.  
4. The government copied the Make Amends scheme from another country.  
5. More people get mugged now than ten years ago.  
6. More people sell drugs now than ten years ago.  
7. The figures in the report are completely accurate.  
8. Violent crime is on the increase.  

1.4 Listen again and complete these extracts with the exact words used in the recording. Are the verbs you have written in an active form or a passive form?

1. Yes, indeed, I was delighted when I _______________ the figures.
2. This has meant that a much higher proportion of offenders _______________ during the last ten years than ever before.
3. People _______________ less graffiti in city centres, for example.
4. These _______________ a particular target for street robbers.
5. Well, it's certainly true that more people _______________ selling drugs.
6. If I can give a personal example, my house _______________ only last week.
2.1 Using the passive

**START POINT**

The government has published a report today. (active: focus on the government)
A report has been published by the government today. (passive: focus on a report)

We often use passive verbs:
- when the agent (the person or thing that performs the action) is not known: *My house was broken into only last week.*
- when the agent is 'people in general': *The details can be found at the back of the report.* (= anyone can find these details)
- when the agent is unimportant, or is obvious: *A much higher proportion of offenders have been arrested.* (= the agent is clearly the police)
- when we don’t want to say who the agent is: *It may be that some minor mistakes were made in collecting the figures.* (= she might not want to say who was responsible for the mistakes)
- to describe procedures or processes, focusing on what was done rather than who did it: *The figures were collected over a ten-year period.*
- to avoid repeating the agent in a description or narrative: *The police have made good use of CCTV. It’s been introduced into many city centres.*

In informal contexts we often use active sentences with a subject such as *people, somebody/someone, something, we, they or you* even when we do not know who the agent is. In more formal contexts we often use a passive to avoid mentioning an agent:

*People are seeing less graffiti in city centres.* or more formally *Less graffiti is being seen ...*

Some verbs describing states (e.g. *have, become, seem*) are not usually made passive:

*Other countries have a similar policy.* (not *A similar policy is had by other countries.*)

However, other verbs describing states can be passive (e.g. *intend, know, own*):

*Our latest poster campaign is intended to reassure people.*

2.2 Active and passive verb forms

Compare these passive forms of active verb patterns.

<table>
<thead>
<tr>
<th>Active</th>
<th>Passive</th>
</tr>
</thead>
<tbody>
<tr>
<td>They started to keep records ten years ago.</td>
<td>Records started to be kept only ten years ago.</td>
</tr>
<tr>
<td>This figure is expected to fall as they start using new technology to trace stolen phones.</td>
<td>This figure is expected to fall rapidly as new technology starts being used to trace stolen mobiles.</td>
</tr>
<tr>
<td>They made them repair the damage.</td>
<td>People found guilty of vandalism are made to repair the damage they’ve caused.</td>
</tr>
<tr>
<td>The police caught them selling drugs.</td>
<td>More people were caught selling drugs.</td>
</tr>
<tr>
<td>We expect the figure to fall rapidly. We want the crime rate to fall still further.</td>
<td>This figure is expected to fall rapidly. Some verbs in this pattern have no passive: The crime rate is wanted to fall still further.</td>
</tr>
</tbody>
</table>
Perfect passive forms are also possible: *More people claim to have been the victims of crime. More people have been caught selling drugs this year than ever before. This figure is expected to have fallen by next year.*

Most passives with modal verbs are formed with modal + be + past participle or modal + have been + past participle:

*The reason for this can be found in the huge increase in the number of mobile phones.*

*Some of the fall might have been caused by lower rates of reporting.* (past)

### 2.3 Passive forms of verbs with two objects

**START POINT**

*I was delighted when our crime statistics department gave me the figures.* (active)

*I was delighted when I was given the figures by our Crime Statistics Department.* (passive) or

*I was delighted when the figures were given (to) me by our Crime Statistics Department.* (passive)

(See Unit 9, 2.1 for more on verbs with two objects.)

Verbs followed by object + complement in the active have one passive form:

*Attitudes have changed significantly since Peter Miles was appointed head of the police service.*

#### 2.4 Get + past participle; get/have + object + past participle

**START POINT**

*It's true that more people get mugged today than they did ten years ago.* or ... *are mugged ...*

*People think more carefully about committing a crime if they know they might get caught or ... might be caught.*

Particularly in speech, we can use get + past participle instead of be + past participle.

Get + past participle is most commonly used to talk about unwelcome events (e.g. get mugged), but we can also use it with positive events: *When we got elected ten years ago ...*

We don't use get + past participle with verbs describing states:

*He was known to be a highly effective senior police officer.* (not He got known to be ...)

We can use either have + object + past participle or (more informally) get + object + past participle:

- to say that someone arranges for someone else to do something for them:
  *Virtually every person in my road has had/got a burglar alarm fitted recently.*

- to say that something unexpected, and usually unpleasant, happens to someone:
  *I had my TV and stereo taken.* or very informally *I got my TV and stereo taken.*

We use a reflexive pronoun with get to suggest that the subject is responsible for their actions.

*People will think more carefully if they know they're going to get themselves arrested.*

   The surgery has been declared a complete success.

7. My English teacher suggested the idea to me.
   I was suggested the idea by my English teacher.

8. My uncle bought me this necklace when he was in Zimbabwe.
   This necklace was bought for me when my uncle was in Zimbabwe.

3.3 Complete the conversations using the pairs of verbs in the box. Use be + past participle, get + (object) + past participle, or have + (object) + past participle. Add the object in brackets where this is supplied and give alternatives where possible.

   own - break into  rob - steal  cut - clean  wake up - throw out

1. A: Did you hear about Natasha?
   B: What happened?
   A: She was got robbed on her way to college.
   B: No! Is she okay?
   A: Yes, she's fine, but she threw out her handbag.

   B: I was woken early by my neighbour's dog.
   A: Don't they keep it inside at night?
   B: Usually, yes, but I think it must have broken because it was barking so much.

3. A: Stefan looked different somehow.
   B: He'd cut his hair.
   A: Yes, and I think he'd cleaned his jacket. It looked much smarter!
4 A: What an amazing house!
   B: It ______________ by Jason Norman. You know, the rock singer.
   A: I know him, yes.
   B: The problem is, he's never there, and it keeps ______________.

3.4 Rewrite the underlined part of the sentence using a passive form where possible. If it is not possible, write 'No passive'.

1 When they invited Hugo to give the main presentation at the conference he was delighted and wrote immediately to accept.
   Hugo was invited to give

2 During our military training they made us run five kilometres before breakfast.

3 Ella felt that the pay and conditions at Trimco were unsatisfactory, and many of her colleagues seemed to support her.

4 We wanted Julia to come to the party.

Alexander McCall Smith: Terrible Orchestra?

Bestselling author Alexander McCall Smith explains why he started a band for useless musicians.

There are two emotions a parent can feel when watching the school orchestra perform. One is pride – the most common emotion in the circumstances – and the other is envy. Wouldn’t it have been great fun to be in an orchestra and now ... it’s too late. Or is it?

These musical islands are full of amateur orchestras, but most of these are really rather good. We wanted something that would cater for those who really were very weak players, those who might have got as far as Grade 4 on their instruments and hovered around that level for years. So we formed the Really Terrible Orchestra in Edinburgh, a city known for having a number of fine amateur orchestras. The name was carefully chosen: what it said was what you would get.

Those who joined generally lived up to the name. Some, though, stood out for their musical weakness. One cello player some years ago even had the notes played by the open strings written in pencil on the bridge of the instrument. Another – a clarinetist – had had only three or four lessons and could not go above the middle B flat. He played only the bottom notes, and not very well.

Our heads turned, we decided to hold a concert at the Edinburgh Festival Fringe. The important thing about the Fringe is that anybody can perform, with the result that there are always a certain number of appalling performances which attract tiny audiences.

The fortunes of the orchestra continued to improve, even if its playing did not. We presumed to make two CDs, which somehow got into the hands of radio stations abroad. We have now been played more than once by the Australian Broadcasting Corporation, by the Canadian Broadcasting Corporation, and by National Public Radio in the United States.

Even if the orchestra never gets to New York, that will be enough. Of course New York was where the famous Florence Foster Jenkins would appear, at the Carnegie Hall, and torture her audience with her terrible singing. Perhaps it’s ready for an orchestra that will live up to her.

Which makes one wonder: what is it that makes people want to listen to a group of extremely bad musicians torturing a piece that most of them cannot play? Is there something about failure and its cheerful acceptance? Whatever it is, there’s certainly something quintessentially British about it. And the orchestra does a very fine ‘Land of Hope and Glory’ – a semitone flat.
The response was overwhelming, particularly from clarinetists. I suspect that a very high proportion of the population is exposed to the clarinet at some stage and that British attics are crammed full of forgotten clarinet cases. Many of these were dusted off for the first meeting of the Really Terrible Orchestra, as were various other instruments. We appointed a professional conductor, Richard Neville Towle, a well-known Edinburgh musician and founder of the ensemble Ludus Baroque, and we began to rehearse. The result was cacophony.

The Really Terrible Orchestra, however, was an immediate hit. The concert sold out well in advance, as it has done every year since, attracting an audience of more than 500 people, some not actually related to the players.

'Ve are pretty awful,' admitted one of the bassoonists. There is a very wide range of playing abilities, she added, noting that she herself had only passed Grade 3, the examination normally taken by 11-year-old British schoolchildren.

Eight years ago my wife and I decided that we would do something about never having played in the school orchestra. We are both very challenged musicians: at the time she played the flute - hesitantly - and I played the bassoon - extremely incompetently.

Now what has become the world's most famous amateur orchestra is about to perform in London. The Cadogan Hall is the site of this imminent musical disaster, and all 800 tickets vanished in a trice.

An orchestra needs to perform, and we decided to hold a concert. Wisely, we took the view that the audience should be given a glass of juice, or even more than a glass, before the concert. This assisted their enjoyment and understanding of our idiosyncratic performance. Virtually every piece we played was greeted with shouts of applause and a standing ovation.

The orchestra's fame spread. Earlier this year the New York Times, for a mention in which many professional musicians would sell their souls, devoted a quarter of a page to an article about the Really Terrible Orchestra. A few days after the appearance of the article the orchestra's chairman, Peter Stevenson, received an approach from the same New York impresario who had first taken the Beatles to the US.
Reporting

Structures in the reported clause: that-clause, to-infinitive and -ing; verb tenses in reporting; modal verbs in reporting; reporting questions; should in that-clauses

Context listening

1.1 If you lived close to an airport, what problems would you be most concerned about?

1.2 There are plans to expand the small airport near the village where Leyla and Magnus live. Leyla has been to a meeting to discuss the plans, and she tells Magnus about it. Listen to their conversation. Identify three advantages and three problems of the airport expansion that were mentioned at the meeting.

Advantages

Disadvantages

1.3 Listen again and complete these extracts with the words you hear.

1. They told us that the expansion would create around 2,000 jobs directly.
2. They a growing number of people in the local area supported the expansion.
3. They us informed about future developments.
4. They there and look at the plans in detail.
5. She the airport authorities were not telling the truth.
6. She to our local politicians with our objections.
7. She also suggested inviting the Minister for Transport to hear our complaints. I to her.

1.4 Put the past tense verbs you have written in one of the columns according to the pattern that follows them. Which one of the verbs can also be followed by one of the other patterns?

We often report in our own words what people think or what they have said: 'There will be a public enquiry.'

Mr Kelly announced that there would a public enquiry.

**2.1 Structures in the reported clause: that-clause**

Reporting verbs can be followed by a number of structures in the reported clause. The most important ones with that-clauses are given below:

- **verb + that**
  
  *Sue reckoned that the expansion would damage tourism.*

- **verb + object + that**
  
  *He convinced me that noise wouldn't be a problem for us.* (not *He convinced that...*)

- **verb + (object) + that**
  
  *She warned (us) that the airport authorities were not telling the truth.*

  Compare the use of *tell* and *say* in the reported clause:
  
  *They told us that the expansion would create around 2,000 jobs.* (*tell + object + that*)
  
  *They said (to us) that it might increase tourism in the region.* (*say + (to + object) + that*)

- **verb + that + verb or verb + object + to-infinitive**
  
  *I found that his reassurances were quite convincing, or more formally I found his reassurances to be quite convincing.*

- **verb + (to/with + object) + that**
  
  *I agree (with the anti-expansion group) that the plans will change the area.*

We often leave out *that* in informal contexts, particularly with the most common reporting verbs (e.g. *reckon, say, tell, think*). However, we don't usually leave it out if the *that*-clause doesn't immediately follow the verb:

*Sue reckoned (that) the expansion would actually damage tourism.*

*I agree with the anti-expansion group that the plans will change the area.*

**2.2 Structures in the reported clause: to-infinitive and -ing**

These are the most important structures with a to-infinitive or -ing form in the reported clause:

- **verb + to-infinitive**
  
  *I've decided to wait and see what happens next.*

- **verb + object + to-infinitive**
  
  *They encouraged us to go to the village hall.*

- **verb + (object) + to-infinitive**
  
  *I expected them to be confrontational, or I expected to hear more objections.*

- **verb + to-infinitive or verb + that**
  
  *They promised to keep us informed, or They promised that they would keep us informed.*

- **verb + object + to-infinitive or verb + object + that**
  
  *She advised us to write to our local politicians with our objections, or She advised us that we should write to our local politicians with our objections.*

- **verb + -ing or verb + that**
  
  *She suggested inviting the Minister for Transport to hear our complaints, or She suggested that we should invite the Minister for Transport (not She suggested to invite ...)*
2.3 Verb tenses in reporting

**START POINT**

When reporting, we often change the tense that was in the original.

'The airport authorities are not telling the truth.' → She warned that the airport authorities were not telling the truth.

'We carried out the trial flights last month.' → Mr Kelly said that they had carried out the trial flights last month, or Mr Kelly said that they carried out ...

We don't usually change a past perfect verb:

'We had hoped for more support.' → He said they had hoped for more support.

We can use a present tense verb for a situation that still exists when we report it:

'Magnus said he's worried about the nuclear power station on the coast.' → He said he was worried ...

We usually use a past tense in the reporting clause. However, we can use the present simple to report current news or views, what is always said, or what many people say:

'I hear that Boeing 737s will be landing there. Everyone I've spoken to thinks it's awful.'

2.4 Modal verbs in reporting

A modal verb in the original sometimes changes in the report.

- **will** changes to **would**, **can** to **could**, and **may** usually changes to **might**:

'It may increase tourism in the area.' → They said it might increase tourism in the region.

However, if the situation we are reporting still exists or is in the future, modals don't change if there is a present tense verb in the reporting clause:

'We'll be displaying copies of the plans in the village hall.' → They say they'll be putting copies of the plans in the village hall.

We can use either form if there is a past tense verb in the reporting clause:

'The expansion will create 2,000 jobs.' → They told us that the expansion will/would create around 2,000 jobs.

- **shall** changes to **would** to talk about the future, and to **should** to report suggestions, recommendations and requests for advice:

'I shall decide later.' → He said he would decide later.

'What shall we do next?' → He asked what they should do next.

- **must** doesn't change or changes to **had to** when it is used to say it is necessary to do something:

'You must look at the plans before making any decisions.' → He said I must / had to look at the plans before making any decisions. (Had to is more natural in speech.)

- **could**, **should**, **would**, **might**, **ought** and **used to** don't usually change in the report:

'We ought to write to our local politicians.' → She suggested we ought to write ...

2.5 Reporting questions

**START POINT**

'What are your views on this?' → They asked what our views were. or They asked (for) our views.

'Have you got any more questions?' → They wanted to know if/whether we had any more questions.

(See Unit 16, 2.3 for more on the choice between whether and if.)
The usual word order in the reported wh-, if- or whether-clause is the one we would use in a statement, and we don't use a question mark or the do auxiliary:

'How exactly will it boost tourism?' → I asked how exactly it would boost tourism.
'Where did you get your figures from?' → She asked where they had got their figures from.

We can use a negative form of do to report a negative question:

'Why don't you want the airport to expand?' → He asked why I didn't want the airport to expand.

If the original question begins what, which or who, followed by be + complement, we can put the complement before or after be in the report:

'Who's Sue Ray?' → He asked who Sue Ray was or He asked who was Sue Ray.

To report a question with should asking for advice or information, we can use a to-infinitive:

'What should we do to protest?' → Someone asked Sue what to do to protest or ... what we should do to protest.

We don't use a to-infinitive to report a why question:

'Why should we believe them?' → She wanted to know why we should believe them. (not She wanted to know why to believe them)

## Grammar exercises

### 3.1 Complete the sentences with an appropriate form of the reporting verbs in the box. Add a preposition or pronoun if necessary.

- check
- claim
- commiserate
- emphasise
- explain
- grumble
- persuade
- reassure
- reveal
- whisper

1. Before I parked my car outside Diego's house, I **checked with** him that it was okay.
2. It took ages to feed all the customers, and by the time we got around to the last ones they **complained** that their food was cold. But I just ignored their complaints.

4. The company hadn't paid me for the work I'd done for them, but when I phoned, they **promised** that my payment was on its way.
5. Carlson didn't want to speak to the police yet. He didn't want to **reveal** anyone that he knew who the murderer was until he had concrete evidence.
6. Teresa gave me the report but said it was only a first draft. She **said** that it should remain confidential until the statistics had been checked.
7. Just before I stood up to make my speech, my friend Jamir came up close and **whispered** me that my shirt was hanging out at the back.
8. Terry said that he was going to re-paint the car himself, but I managed to **persuade** that this was a bad idea.
9. When I heard about her disastrous job interview, I phoned Martha to **comfort** her.
10. At first, the security guard stopped me going in, but when I **promised** him that I had an appointment he let me through the barrier.
Stephen is an engineering student who has applied for a job when he leaves university. Complete these extracts from Stephen’s letter of application using the notes in brackets. Use a that-, to-infinitive or -ing clause in your answer and give alternatives where possible.

Dear Mr Clarke,
I am writing with reference to the post of Senior Research Engineer advertised in Engineering Monthly. I assume that the post is (the post) still vacant. My supervisor, Professor Ken Newton, has advised (apply) and has assured (my research), which is described in detail in the attached documents, will be of interest to you.
I expect (complete) my PhD by the end of the year, and I propose (publish) the findings of my research soon afterwards.
I believe (my qualifications and experience) appropriate for the post.
I hope (hear) from you in the near future.

Yours sincerely,
Stephen Finch

Stephen Finch

Stephen got an interview, but wasn't offered the job. Complete his account of the interview to his supervisor.

They asked me to explain (explain) the main purposes of my research. I admitted (have problems) in the early stages of the work. They were very helpful. They suggested (look at) Chris Hume's work at the University of Harford. They agreed (me / my research) has many practical applications. They even invited (visit) their laboratories if it would help in my research. Although they didn't offer me the job, they recommended (write) to them again after I've finished my PhD, and in the meantime they agreed (contact) if any other similar jobs come up. Of course, they couldn't guarantee (offer) a job in the future, but they were very encouraging.

1. 'I broke my leg when I was skiing.' → She said (that) she broke / had broken her leg when she was skiing.

1.1 You are going to listen to two college friends talking about adventure holidays. What activities are shown in these pictures?

1.2 Listen to the conversation. Which of these items does Alison advise Ben to take with him?

- air tanks for scuba diving
- insect repellent
- plastic trainers
- a sun hat
- cooking equipment for camping
- leather trainers
- a sleeping bag
- a tent
- a face mask
- a life jacket
- a snorkel

1.3 Listen again. Change these sentences to show exactly what Alison or Ben said.

1. I went for the adventure holiday based in Brisbane.
2. One of the local organisers met me at the airport.
3. They should provide all the equipment.
4. But you don’t have to be a very good swimmer.
5. Preferably plastic trainers.
6. By the end of the holiday I was exhausted, but I was very fit!
7. You’ll certainly need some insect repellent.
8. I don’t imagine you’ll need to take a tent and cooking things.
Grammar

2.1 Substitution: one/ones

START POINT

They do diving holidays in quite a few places. I went for the one based in Brisbane. (one = diving holiday; one replaces a singular countable noun or a noun phrase)

Take a couple of pairs of old trainers - preferably plastic ones. (ones = trainers; ones replaces a plural noun)

We don’t usually use one/ones:

• to replace an uncountable noun. Instead we use some:
  Don’t forget insect repellent. You’ll certainly need some. (not... need-one:)

• to talk about a specific item. Compare:
  Do you know anyone who’s got a sleeping bag? I was hoping to borrow one.
  Have you still got your sleeping bag? Can I borrow it? (= a particular sleeping bag)

• after the, unless it follows an adjective:
  ‘Are these your trainers?’ ‘No, the leather ones are mine.’
  or unless there is a descriptive phrase after one/ones:
  They had a number of adventure holidays on offer, and I chose the one that was cheapest.
  I went for the one based in Brisbane.

• after a possessive adjective (e.g. my). Instead we prefer a possessive pronoun (e.g. mine) or a phrase with an adjective:
  You can borrow mine. or You can borrow my old one. rather than You can borrow my one.
  However, one/ones is sometimes used after a possessive adjective in informal speech.

We don’t usually use ones on its own to replace a noun phrase. Compare:
  ‘You’ll need trainers.’ ‘Okay, I’ll bring some.’ or I’ll bring some old ones. (not I’ll bring ones.)

We can either include or leave out one/ones after which, whichever; superlatives; either, neither, another, each (but not every); the first/second/last; the other; this, that, these, those; and often after colour adjectives:
  I can’t decide whether to go on the adventure holiday to Thailand or Australia. I’m sure you’ll enjoy whichever one you go on.

Get your own face mask. Buy the best one you can afford.
I’ve had three holidays with TransWorld Adventures, but the first one was the best.
I’ve got these two sleeping bags, but this one is rather dirty. (these ones and those ones are only used in informal speech)

We had two small boats to practise sailing in. One was green and the other one was red. I used to sail in the green one.)
Substitution and ellipsis

2.2 Substitution: so + auxiliary verb + subject; neither, nor, not ... either

START POINT

'Was diving as difficult as you expected?' ‘Perhaps even more so.’ (so = difficult; replaces an adjective)

TransWorld Adventures provides all the equipment – at least I presume so. (so = TransWorld Adventures provides all the equipment; replaces a clause)

We can use so instead of a clause after certain verbs to do with opinions (e.g. expect, suppose, think), but not after others (e.g. accept, know, be sure, hear):

'Will I be met at the airport?' ‘I expect so.’

'The mozzies are really bad at that time of year.’ ‘I’ve heard that, too.’ (not ‘I’ve heard so, too’)

Some verbs are commonly used before not or in not ... so in short, negative replies:

‘You won’t need a sleeping bag if it’s really hot.’ ‘I suppose not.’ or ‘No, I don’t suppose so.’

Other verbs like this include: appear, seem; believe, expect, imagine, think. (With the last four verbs we prefer not ... so in informal contexts):

‘Do you think I’ll need to take a tent?’ ‘I don’t imagine so.’ or formally ‘I imagine not.’

Before not we can use be afraid (= showing regret), assume, guess, hope, presume, suspect:

‘Do they offer any holidays in Africa?’ ‘I’m afraid not.’ (not ‘I’m not afraid so’)

We can use so + auxiliary verb + subject to say that a second person does the same thing as a person already mentioned. In the negative we use neither, nor or not ... either:

‘I’d like to go to Tasmania.’ ‘So would I.’

‘I’m not really a very good swimmer.’ ‘No, neither am I.’ or ‘Nor am I.’ or ‘I’m not either.’ or ‘I’m not a very good swimmer either.’

2.3 Substitution: do so

We can use a form of do so to replace a verb and the word or phrase that follows it to complete its meaning:

When asked whether they intended to offer holidays in Africa, TransWorld Adventures said they had no plans to do so. (do so = offer holidays in Africa)

He planned to go to Australia this year, but now that he has lost his job he has little chance of doing so. (doing so = going to Australia)

We can use do so where the verb describes an action, but avoid it with verbs that describe states and habitual actions:

We went down the river by boat, and saw a lot of wildlife while doing so.

Some people didn’t enjoy the hard work, but I did. (not ‘but I did so’)

Less formally, we use do it or do that with a similar meaning:

We put up our tents by the side of the river. We did that at about four o’clock every afternoon. or formally

We did so ...

We use do (rather than do so) in informal English, especially after modals or perfect tenses (but note that we can often leave it out):

‘Do they provide all the equipment?’ ‘They should (do).’

‘Could you have gone to Thailand instead?’ ‘Yes, I could have (done).’
2.4 **Ellipsis: leaving out words after auxiliary verbs and after to**

### START POINT

'Have you decided yet?' 'Yes, I have.' (= Yes, I have decided.)

A lot of people go to the Great Barrier Reef when they're in Australia. Were you able to? (= Were you able to go to the Great Barrier Reef?)

We often leave out or change verbs to avoid repeating them.

We can sometimes use to instead of a clause beginning with a to-infinitive when it is clear what we are talking about:

I'd certainly like to go back to Australia. I hope to next year. (= to go back to Australia)

We can use to or leave it out:

- after certain verbs (e.g. agree, promise, start):
  
  I want to read a lot about Australia before I go. I've started (to) already.

- after most nouns (e.g. idea, opportunity) and adjectives (e.g. frightened, willing) that can be followed by a to-infinitive clause:
  
  I've always wanted to go, but I've never had the chance (to) before.

- after want and would like in if-clauses and wh-clauses:
  
  We must talk about it more. You can come over whenever you'd like (to).

- after verbs (e.g. expect, mean, need) which must have a complement:
  
  You can borrow mine if you need to.

- after a negative:

  You don't have to sail on your own if you don't want to.

When have (got) is a main verb in the first clause or sentence, we can often use either have (got) or do to avoid repetition in the following clause or sentence:

Have you got a sleeping bag? I'm sure you have. (= I'm sure you have got a sleeping bag.) or I'm sure you do. (= I'm sure you do have a sleeping bag.)

When have is followed by a noun to describe an action (e.g. have a shower, have a shave, have a good time) we usually use do:

I wasn't really expecting to have a good time, but I did.
3.1 Read the underlined parts of these dialogues. Cross out the words which can be left out.

1 A: What was wrong with Sue?
B: She was frightened, or at least she appeared to be frightened.

2 A: You should have asked me. I could have given you a lift into town.
B: Thanks, but I didn’t like to ask you. I know how busy you are.

3 A: Has Sarah eaten anything today?
B: No, I don’t think she has eaten anything today.

4 A: My grandmother would have been shocked by all the changes in the village.
B: Yes, I’m sure she would have been shocked.

5 A: Don’t forget we’re going out tonight. Can you leave work early?
B: Okay, I’ll try to leave work early.

6 A: We could get to the island across the new bridge.
B: But it hasn’t been opened yet.
A: I thought it had been opened.

7 A: I hope I get promoted this time.
B: You certainly deserve to get promoted. You work really hard.

8 A: I didn’t know you were getting married.
B: Sorry. I thought you did know I was getting married.

3.2 Replace the underlined word(s) with one or ones where possible. If it is possible to omit one or ones, put the words in brackets.

1 A: Do you want one of these sweets?
B: Are there any green sweets left?
A: No, they’ve all gone.

2 A: It’s about time we got some new curtains.
B: Okay, well, let’s go out and buy some new curtains.

3 A: I know it’s muddy outside, but shall we go out for a walk?
B: But I haven’t got any boots.
A: You can wear my old boots.

4 A: To get to your house, do I take the first or second turning?
B: You can take either turning.

5 A: Why did you buy those green apples?
B: They were the cheapest apples I could find.
Have you seen the car keys? I can't find the car keys anywhere.

That mirror is like the mirror my parents have got in their sitting room.

This glass has got a crack in it. Have you got another glass?

I dropped my brother's mobile phone and had to buy him a new mobile phone.

We've got chocolate biscuits or these biscuits. Which biscuits would you prefer?

3.3 Complete the sentences where possible with so, do, do so or so do, using an appropriate form of do.

If it is not possible, suggest an alternative.

1 She stood up slowly, and was obviously in pain as she did so.

2 A: Miller played really badly, didn't he?
   B: But did the rest of the team.

3 A: Are you going to Spain again for your holidays?
   B: I might . I haven't decided yet.

4 Louise will be meeting us at the airport. At least, I hope .

5 A: Apparently, Harun's dropped out of college.
   B: Yes, I'd heard too.

6 We do more or less the same job, but he earns much more than I .

7 A: We can take a shortcut if we wade across the stream.
   B: What's the point of ? The bridge isn't far.

8 He has yet to win a tournament, but he came close to in Monaco.

9 A: Do you really think she'll lend you the money?
   B: I'm sure .

10 Megan loves horse riding, and Victor.
Hi Chris,

I tried phoning you earlier, but you must have been out. But I just have to tell somebody about the terrible day I’ve had : - ( !

It started badly and got worse! When I got up the kitchen was flooded – I’d left the freezer door open! I’ve never (1) left the freezer door open before. By the time I’d finished mopping up all the water it was getting late. I was going to take my big handbag to work, but I was so rushed I picked up my (2) small handbag by mistake, leaving my purse behind so I didn’t have any money. Luckily, I bumped into Bob at the station and he was able to lend me (3) some money. My office key was also still at home, so when I got to work I had borrow (4) an office key.

Then I had to get to an important meeting. Our company is hoping to do some business with a Japanese firm. My boss thinks we have a good chance of signing a deal soon, but I don’t think (5) we have a good chance of signing a deal soon. I thought the meeting was on the fourth floor – in fact, I was certain (6) it was on the fourth floor. But it had been rearranged and nobody had bothered to tell me.

So I was 20 minutes late. I wasn’t very happy, and (7) my boss wasn’t very happy either. To make matters worse, I’d been hoping to run through my presentation over breakfast, but I’d had no (8) time to run through my presentation over breakfast. So my talk went really badly. Afterwards, my boss said she was disappointed with the way the meeting went. But (9) I was disappointed with the way the meeting went, too.

After such a dreadful day, I was hoping I’d have a quiet evening, but I (10) didn’t have a quiet evening. When I got home I found that my cat had knocked over some glasses – you remember the beautiful old Swedish (11) glasses that my parents gave me? I wonder if I’ll be able to replace them? I (12) don’t expect I’ll be able to replace them.

The only good thing is that it’s the weekend. Come over whenever you (13) want to come over. In fact, are you able to come over tomorrow? If you (14) ’re not able to come over tomorrow how about Sunday? Or are you still too busy decorating the house? I (15) hope you’re not too busy decorating the house. But give me a call and let me know.

Love,
Beth x
Listening Part 3

You will hear part of a radio interview in which David Evans, a chef in a British school, is talking about his work. For questions 1 – 6, choose the answer (A, B, C or D) which fits best according to what you hear.

1 What was the students' initial reaction to the food they were served?
   A They didn't like being the subjects of an experiment.
   B They would rather have eaten traditional British food.
   C They were not sure whether it was good or bad.
   D They felt that it was an adventure for them.

2 According to David, why do some students have difficulty in accepting the 'restaurant system'?
   A They are uncomfortable eating meals with adults.
   B They are not used to having meals with others.
   C They don't like talking about food.
   D They have to wait too long to be served.

3 What main role do the staff play in the school restaurant?
   A They check that students are eating their meals.
   B They find out about the students' home lives.
   C They deal with students' complaints about the food.
   D They help students find out about a balanced diet.

4 According to David, where does most of the food served in the restaurant come from?
   A anywhere that can provide fresh ingredients
   B the school grounds
   C all over the world
   D suppliers close to the school

5 In David's view, which of his previous jobs prepared him best for his work as a school chef?
   A teacher
   B manager
   C waiter
   D cook

6 Why does David think that his approach could be difficult to introduce in other schools?
   A Students tend to be resistant to change.
   B Not all students see healthy eating as important.
   C Other schools don't see healthy eating as a priority.
   D Parents would be unwilling to accept it.

1.2 Listen to this speech made in honour of Maria Adams, a music teacher. Which of the qualities and characteristics in 1.1 does the speaker use to describe her?

1.3 Listen again and say whether these sentences are true (T) or false (F). If a sentence is false, say why.

1. Maria was a violinist before she became a conductor. T
2. In the Music in Schools project the council gives children musical instruments.
3. Musicians are not paid to take part in the Music in Schools project.
4. Children in city schools now have to pay for their music lessons.
5. Maria helps children go to other countries to play music.

1.4 These ideas are expressed in a different way by the speaker. Listen again and write down exactly what he said.

1. We first met in the mid-1990s.
   It was in the mid-1990's that we first met.
2. She sees making music as a fundamental part of a child's development.
3. The way she calmly and clearly argued her case impressed us most.
4. I have rarely met anyone with such passion for their beliefs.
5. The council has tried to make changes to the Music in Schools project a number of times in order to save money.
6. The council backed down only after Maria threatened to withdraw her support from the project.

1.5 What difference do you notice between the sentences given and the ones you have written in 1.4?
Word order and emphasis

2.1 Fronting

We can emphasise a particular part of a sentence by moving it to the front of the sentence, changing the usual word order:

She sees making music as a fundamental part of a child’s development. → Making music she sees as a fundamental part of a child’s development. (fronting of object)

She resisted this. → This she resisted. (fronting of object)

Maria had been writing to me for some weeks. → For some weeks Maria had been writing to me. (fronting of adverbial)

2.2 Cleft sentences

START POINT

It’s among children from poorer backgrounds that the Music in Schools project has had most impact. (emphasising among children from poorer backgrounds)

What impressed us most was the way she calmly and clearly argued her case. (emphasising the way she calmly and clearly argued her case)

An it-cleft has the structure it + is/was + emphasised part + relative clause. The relative pronoun can be that, which, who or no relative pronoun. When and where are used only in informal English:

It was in the mid-1990s that we first met, or informally ... when we first met.

A sentence with a wh-cleft usually has the structure what-clause + is/was + emphasised part. Sometimes we use all instead of what:

What she was suggesting was that members of the YCO would volunteer their services.

All she ever wanted to do as she was growing up was play the violin. (= the only thing she ever wanted to do)

After the what-clause we usually use a singular form of be (is or was). However, informally, a plural form (are or were) is sometimes used before a plural noun:

What she hopes to see is/are children who enjoy a wide range of musical styles.

We can sometimes put a wh-cleft at the end of a sentence:

The way she calmly and clearly argued her case was what impressed us most.

The Music in Schools project is what came out of our meeting.

To emphasise an action we can use a wh-cleft with what + subject + form of do + form of be + (to) + infinitive:

What she did was (to) convince us of the value of a musical education.

2.3 Inversion

START POINT

In front of the committee sat Maria. (= verb + subject)

Seldom did she raise her voice. (= do + subject + verb)

Never have I heard such a persuasive speaker. (= auxiliary + subject + verb)

Word order is inverted after certain words and phrases when these are put at the beginning of a sentence or clause in order to emphasise them. This kind of inversion is found mainly in formal speech and writing.
Inversion occurs after words and phrases with a 'negative' meaning:

- the negative adverbs never (before), rarely, seldom; barely/hardly/scarcely ... when/before; no sooner ... than; nowhere; neither, nor:
  Rarely have I met anyone with such enthusiasm.
  No sooner had Maria walked through the door than she started to talk about her proposal. 
  I hadn't met Maria before, and nor had the other members of the committee.
  (See also Unit 17, 2.3 for more on hardly, no sooner and scarcely.)

- only + a time expression (e.g. after, later, then) or a prepositional phrase:
  Only after Maria threatened to withdraw her support did the council back down.

- the prepositional phrases at no time, on no account, under/in no circumstances; in no way (or no way in informal language):
  At no time has she ever accepted payment for her educational work.
  She argued that under no circumstances should children from poorer backgrounds be made to pay for music lessons.

- expressions with not: not only, not until, not since, not for one moment, not once, not a + noun:
  Not only has she persuaded YCO members to give up their time, but she has also encouraged visiting musicians to give free concerts in schools.

- little with a negative meaning:
  Little did she realise when she set up the project that it would be so influential.

Inversion also occurs after:

- time sequence adverbs such as first, next, now, then with be or come:
  And then came an invitation to be a special adviser to the government on music education.
  If there is a comma (,) or an intonation break in speech after the adverb, normal word order is used:
  Then, an invitation came from the government. 
  (not Then came an invitation ...)

- so + adjective ... that, emphasising the adjective:
  So successful has Music in Schools been that those involved in music education around the world have visited the city to see the project in action.

- such + be ... that, emphasising the extent or degree of something:
  Such was her understanding of music education that the government wanted to draw on her expertise.
  (= Her understanding of music education was such that ...)

### 2.4 Inversion in conditional sentences

In formal or literary English, we can use clauses beginning were, should and had, with inversion of subject and verb, instead of a hypothetical conditional:

- Were she ever to leave the orchestra, ... (= If she left ... or If she were to leave ...)
- Were he here tonight, ... (= If he was/were here tonight ...)
- Should you need any more information about Music in Schools, ... (= If you need ...)
- Had Maria not been around, ... (= If she had not been around ...)

In negative clauses with inversion, we don’t use contracted forms:

- Had Maria not set up the Music in Schools project ... (not Hadn't Maria set up ...)

Grammar exercises

3.1 Write a new sentence with a similar meaning to the original. Emphasise the information underlined using an it-cleft or a wh-cleft at the beginning of the sentence. Sometimes both are possible.

1. I want you to hold the cat tightly while I put on this collar.
2. She announced she was going to join the air force at her 18th birthday party.
3. A: So how did you get the car out of the mud?
   B: We asked a farmer to pull us out with his tractor.
4. A: What do you think's wrong with the car?
   B: The battery could be flat.
5. This huge bunch of flowers arrived for me this morning. I don't know who sent them.
6. My parents must have given Wei my telephone number.
7. The research shows a link between salt intake and rates of heart disease.
8. His nervous laugh made me think he was lying.
1. What I want you to do is hold the cat tightly while I put on this collar.

3.2 Match the sentence halves. Write new sentences with a similar meaning starting Should ..., Had ... or Were ....

1. If you require further details, a she might have made a full recovery.
2. If today's match has to be postponed, b the insurance covers a full refund.
3. If anyone had been looking at Maria when the police arrived, c please contact our public information office.
4. If taxes were to be increased further, d there would be a huge public outcry.
5. If the doctors had operated sooner, e we would not have begun the climb.
6. If I were president, f it will be replayed next week.
7. If your flight is cancelled, g they would have noticed the expression of panic on her face.
8. If heavy snow had been forecast, h I would introduce three-day weekends.

1 + c Should you require further details, please contact our publication information office.
21 Word order and emphasis

3.3 Complete the sentences with appropriate words. Use three words only in each sentence.

1 I thought the insurance policy would pay my hospital fees. At no time was I told / was I informed that it did not cover skiing injuries.

2 Seldom piano playing of such maturity from someone so young. I'm very impressed indeed.

3 He felt someone bump against him on the crowded bus, but only later that his wallet had been stolen.

4 I found the old bracelet while I was walking along the beach. Little then that I had made one of the most important archaeological discoveries of recent years.

6 I asked her to describe her attacker, but only after several minutes me.

7 No sooner into bed than his flatmate started playing his drums.

8 The Atlantic crossing took eight days. I was in Isabella's company on several occasions, but not a word to me until near the end of the journey.

3.4 Rewrite the underlined parts of the conversation, emphasising the word(s) in italics. In each case use fronting, a cleft sentence or inversion.

A: I hear you and Anna didn't have a great holiday on the island.

B: No, not really, although we liked the island a lot. The hotel was the real problem.

A: Why? What was wrong with it?

B: Our room was just awful. The shower only had cold water and the air conditioning didn't work.

A: Didn't you complain?

B: Oh yes. Anna was pretty annoyed and went down to reception to complain. But they told her she was just being fussy and she got really furious about that. She insisted on seeing the manager, and demanded that something should be done.

A: And was it?

B: Well, we had a steady stream of workers coming into the room after that. An electrician came first and then the next day a plumber. But neither of the problems got fixed. It took them three days to decide that we needed another room.

A: You must have been fed up with the hotel by that time.

B: I think the attitude of the staff annoyed me most – they really just didn't care. I have never seen such a total lack of interest from people who are supposed to be providing a service. No one apologised once the whole time we were there ...

Reading and Use of English Part 4

For questions 1 – 6, complete the second sentence so that it has a similar meaning to the first sentence, using the word given. **Do not change the word given.** You must use between **three** and **six** words, including the word given. Here is an example (0).

0 He always calls his house his ‘castle’.

**REFERS**
He always **refers to his house as** his ‘castle’.

1 She was proud of her work, and she was also well respected by her colleagues.

**TAKE**
Not only **her work**, she was also well respected by her colleagues.

2 She hated publicity so much that she never gave any interviews to the media.

**HER**
Such **publicity**, that she never gave any interviews to the media.

3 During her illness, she realised that the only choice she had was to take early retirement.

**ALTERNATIVE**
During her illness, she realised that there **to take early retirement**.

4 I had only just complained about the new timetable when it was changed.

**MADE**
No sooner **about the new timetable** than it was changed.

5 I’m sure she would do an excellent job if she ever became head of department.

**WERE**
I’m sure she would do an excellent job **head of department**.

6 It is distinctly possible that I will get promoted in the near future.

**OF**
There is a **promoted in the near future**.
You are going to listen to a radio news report. Look at the photos. What do you think the report is about?

Listen and check whether you were right. As you listen, number these events in the order the reporter mentions them.

a Two power stations were built close to Lake Taal.
b People were evacuated from around Lake Taal.
c The Taal volcano erupted and around a hundred people were killed.
d Scientists found that the temperature of Lake Taal was increasing.
e The Taal Emergency Strategy was introduced.
f A state of high alert was declared.
g The Taal volcano erupted and over a thousand people were killed.

Listen again. Complete each extract from the news report with a noun in the first space and a preposition in the second.

1. The _breakdown_ in communication cost at least a hundred lives.
2. There has been an _increase_ in the number of people living close to the lake.
3. The _power stations would leave thousands of homes and businesses without electricity.
4. There was also a dramatic _increase_ in the level of radon gas in the soil.
5. Their concerns increased with the _disappearance_ of thousands of dead fish.
6. Two days ago the _disappearance_ of around 30,000 people began.

Write new sentences with similar meanings to those in 1.3. In each case, use a verb related to the noun in the first space.

1. Communication _broke down_ and this cost at least a hundred lives.
2.1 Nominalisation

**START POINT**

There has been an increase in the number of people living close to the lake. or The number of people living close to the lake has increased.
The danger of the situation made it necessary to bring in the army to oversee operations. or The situation was so dangerous that it was necessary to bring in the army to oversee operations.

We can sometimes use a noun or noun phrase for an idea usually expressed by a verb or adjective. This process is referred to as nominalisation. It is especially common in formal styles of writing.

An adverb modifying a verb changes to an adjective in a nominalised form:
Scientists noticed a sudden rise in the temperature of the lake. or Scientists noticed that the temperature of the lake had risen suddenly.

The main noun in a noun phrase is often followed by one or more prepositional phrases:
The industrial development of the area has increased the number of people living near the lake.
There was also a dramatic rise in the level of radon gas in the soil.

We use nominalisation for a number of reasons:
- to avoid mentioning the agent (the person or thing that performs the action); for example, if we want to be impersonal or to make the agent less important. Compare:
  Two days ago the authorities began to evacuate 30,000 people. (agent = the authorities)
  Two days ago the evacuation of around 30,000 people began. (no agent mentioned)
- to express two clauses more concisely as one clause:
  The building of two power stations just a few kilometres away was strongly criticised by environmentalists. or
  Two power stations were built just a few kilometres away. This was strongly criticised by environmentalists.
- to give a different focus to the sentence. Compare:
  The provision of temporary shelter in a safe location for those displaced is the army's top priority. (New, important information is usually placed at the end of the sentence or clause. The focus here is on the army's top priority.)
  Temporary shelter in a safe location for those displaced is being provided, and this is the army's top priority.
  (No particular focus: is being provided and the army's top priority are both in 'new information' position in their clause.)

2.2 Do, give, have, make, take + noun

We can sometimes use a form with do/give/have/make/take + noun instead of a verb:
The authorities took immediate action. or The authorities acted immediately.
The decision was made to evacuate the area. or It was decided to evacuate the area.

Often, the do/give/have/make/take + noun patterns are less formal than using a verb alone:
When my mother was ill, I had to cook for the family. (more formal)
I had to do all the cooking last week because Mum was away. (less formal)
Grammer exercises

3.1 Rewrite the sentences to remove the agent. Use a nominalised form of the underlined verb and make any other changes needed.

1. The government released the prisoners unexpectedly.
2. They organised the conference very professionally.
3. Spectators turned out in huge numbers for the match.
4. The army withdrew the troops immediately.
5. We need to shake up top management for the company to be successful again.
6. The banks increased interest rates for the third time in two months.
7. They agreed on extra funding for the project.
8. They decided to postpone the race at the last moment.

1. The release of the prisoners was unexpected. / There was an unexpected release of prisoners.

3.2 Rewrite each sentence using a nominalised form at the beginning. Leave out the agent.

1. After scientists identified the HIV virus in the mid-1980s, there were enormous efforts to produce a vaccine.
   The identification of the HIV virus in the mid-1980s led to / resulted in enormous efforts to produce a vaccine.
2. Johan is obsessed with cars, and this started when he was quite young.
3. The government has expanded the nuclear power programme, but this has been criticised by opposition politicians.
4. The petrol companies have reduced the price of petrol, which is good news for drivers.
5. The council abolished parking charges in the city centre, and as a result shops have reported increased business.
6. Parent organisations are demanding healthier food in schools, and this results from growing concerns about childhood obesity.
7. The train will depart half an hour late because of engine problems.
8. A new college principal has been appointed, and staff may leave as a consequence.
3.3 Complete the extracts from newspaper articles using the information in the box. In each sentence, use a nominalised form.

valuable books have disappeared
the English spelling system is complex
the damage to property is extensive
people have responded to its recruitment drive
people are strongly resisting increased taxation
the situation is threatening animal and plant species

1. Detectives were last night questioning a man about the disappearance of a number of valuable books from the National Library over recent months.

2. 'The teaching method we have developed acknowledges and guides children towards a better understanding in carefully controlled stages.'

3. The Health Service is hoping to appoint 480 new nurses. Last night the Health Minister said was 'excellent', with 7,000 applications in two days.

4. Chinese remedies are rooted in 4,000 years of tradition, but growing Western interest in alternative medicines has increased . Products confiscated by environmental officers included some using the seedpods of a rare orchid.

5. The extra public spending will need to be paid for and, with borrowing ruled out, that can only mean putting up taxes. Given , this could undermine the government's chances of being re-elected.

6. Residents of the south coast are beginning to return to their homes after the recent severe flooding. However, means that some will be living in temporary accommodation for many months.

3.4 Make these conversations more informal where possible, replacing the underlined parts with appropriate do/give/have/make/take + noun forms.

1. A: Have you (1) washed up yet?
   B: I've (2) started on it. But there's such a lot to do, and you know how much I hate it.
   A: Well, I'm going outside to (3) work in the garden.
   B: (4) Shout if you need any help.
   A: No, thanks. You just concentrate on the washing-up!

A  *A Monk and Two Peas* by Robin Marantz Henig

The work of an Augustinian monk from Brno laid the foundations of the science of genetics. Gregor Mendel was born in what is now the Czech Republic in 1822 and entered the monastery at the age of nineteen. In the mid-1840s he began to conduct a series of experiments with pea plants grown in the monastery garden and he continued these for twenty years. Over this period, by crossing pea plants which had clear differentiations in height, colour, etc and by carefully logging the results, Mendel was able to formulate the basic principles behind heredity. Mendel’s work was only published in obscure journals, he was eventually led away from science by administrative duties at the monastery and it was only some years after his death that the significance of his work was appreciated. Mendel’s life was a quiet one, but a very important one to the science of the twentieth century. *A Monk and Two Peas* tells the story very well, explaining clearly Mendel’s experiments and drawing out their significance.

B  *The Maths Gene* by Keith Devlin

For those who are mathematically challenged it’s an attractive notion that everybody possesses a latent talent for maths and that it is just a question of finding the right key to access it. Devlin, despite the title of his book, is not suggesting that there is a gene for maths that the Human Genome project might identify but he is saying that we have a natural ability to do maths, that it exists in everybody and there are sound evolutionary reasons why this is the case. The ability to do maths, clearly, means an ability to handle abstract ideas and relationships and this provides advantages in evolutionary terms. As human language emerged, so also did a new capacity for abstraction and this formed the foundations on which mathematical thought has been built. Some readers might find Devlin’s account of the evolution of language debatable but his ideas about the nature of our mathematical powers and his practical suggestions about how to improve them are constantly stimulating.

C  *Why Things Bite Back* by Edward Tenner

Subtitled ‘Technology and the Revenge of Unintended Consequences’, Tenner’s book is an entertaining look at the myriad ways in which advances in science and technology seem to recoil against us. What we gain on the roundabouts we lose on the swings. Antibiotics promise release from the perils of major diseases and end up encouraging microorganisms to develop resistance to them. Widespread use of air conditioning results in an increase in the temperature outdoors, thus requiring further cooling systems. American Football safety helmets become more efficient but this heralds an increase in more violent play and injuries actually rise. Tenner mounts up the evidence in a book designed to appeal to technophile and technophobe alike. And remember, the disaster at Chernobyl was triggered during a safety test. Ironies like that just aren’t funny.

D  *A Brief History of the Future* by John Naughton

So rapidly has the Internet become an integral part of many people’s lives that it is easy to forget that only a few years ago it was known to the general public, if at all, as a playground for nerdy academics and that it is one of the most astonishing of all man’s inventions. John Naughton, fellow of Churchill College, Cambridge and regular journalist on *The Observer* and other newspapers, has been on the net for many years himself and is the ideal person to write a history of what he calls this ‘force of unimaginable power’. Starting with three little-known visionaries at MIT in the 1930s, Naughton traces the story through the engineers like Tim Berners-Lee who realised their vision, and on into what the future may hold. Written with the skill one might expect from a fine journalist and informed with the knowledge of an engineering professor, this is among the first histories of the net but is likely to remain among the best for some time to come.

Context listening

1.1 Liz is planning on moving out of her family home and buying her own apartment. What are the advantages and disadvantages of living in a town centre or on the edge of a town?

1.2 Listen to the conversation. Which of the advantages and disadvantages you thought of do Liz and her parents mention?

1.3 Listen again. Do these statements refer to the town apartment (T) or the out-of-town apartment in Canley (C)? (Ignore the letters a–m for now).

1. It's been on the market for a long time. ___ T ___
2. It's obvious why they've been having problems selling it. _____
3. It really shocked me to see how bad it was. ______
4. It's about 15 kilometres from there into the centre. _____
5. There's bound to be a regular bus service from there. _____
6. There's that lovely little river that runs nearby. _____
7. The rooms in it are quite dark and that made it feel cramped. ______
8. There is expected to be a lot of interest in the property. _____

1.4 Look again at the sentences in 1.3. Some of the examples of it and there (a–m) refer back to a thing or a place that has been previously mentioned. Which ones are they? What do they refer back to?

1. a - it = the town apartment
2. ______
3. ______
4. ______
23 It and there

Grammar

2.1 Introductory it as subject

START POINT

**Mother:** It struck me that the Conley apartment might be quite noisy with that busy road nearby.

**Liz:** But it's in such a lovely location. (it refers back to the noun phrase the Conley apartment)

*If it’s possible, I’d like to go back and look at the Conley apartment again.* (it refers forward to going back and looking at the Conley apartment again)

*It's going to be hard to choose between them.* (introductory it as grammatical subject)

*Living in town would make it so much easier to get to work.* (introductory it as grammatical object)

Introductory it as grammatical subject is commonly used:

- to talk about weather, time, distance and to describe situations:

  *It's raining again. It's five o'clock. It's quiet in this part of town.*

  *It's about 15 kilometres from the Conley apartment into the centre.*

- as an alternative to a that-, wh-, -ing or to-infinitive clause as the subject of the sentence:

  *It's a pity that the town apartment is so small.* rather than *That the town apartment is so small is a pity.*

  *It's obvious why they've been having problems selling it.* rather than *Why they've been having problems selling it is obvious.*

  *It's certainly an advantage being able to walk to work.* rather than *Being able to walk to work is certainly an advantage.*

  *It really shocked me to see how bad it was.* rather than *To see how bad it was really shocked me.*

It is more usual to use introductory it in these contexts, although in formal language the alternative with a that-, wh-, -ing or to-infinitive clause as subject is often used.

In writing, we don't usually use introductory it as an alternative to a noun as subject:

*The town apartment is more expensive.* (not *it is more expensive, the town apartment.)*

However, this is quite common in informal speech in order to clarify what is being talked about:

*It'd be good to live near work, but it's more expensive, the town apartment.*

We often follow introductory it with be + adjective/noun, but other patterns are possible:

- *it + verb + to-infinitive clause:* *It might help to run through the pros and cons.*

- *it + verb + object + to-infinitive clause:* *It shocked me to see how bad it was.*

- *it + verb + that-clause:* *It appears that they're having trouble selling the apartment.*

- *it + verb + object + that-clause:* *It struck me that the Conley apartment might be quite noisy.*

In formal contexts, a common way of reporting what is said by an unspecified group of people is to use it + passive verb + that-clause or it + passive verb + wh-clause:

*It is said that the cost of accommodation in the town centre will rise,* or less formally *They say that the cost of accommodation in the town centre is going to go up.*

*It was explained how difficult it is to prevent flooding in the area,* or less formally *They explained how difficult it is to prevent flooding in the area.*

2.2 Introductory it as object

We can use it as the object of a verb in a number of patterns:

- *verb + it + that-/if-/wh-clause*

  *I wouldn't like it if I had to get up at 6 o'clock.*

  *I couldn't believe it when the agent said the decoration was 'in good condition'.*
would appreciate + it + if-clause
I would appreciate it if you could send me further details of the apartment.

verb + (it) + that-clause
We've just got to accept that neither of the apartments is perfect. or informally We've just got to accept it that neither of the apartments is perfect.

verb + it + adjective + that-/wh-/to-infinitive clause
The owner didn't make it clear whether they were included in the price.
I think it's highly unlikely ... (informal) I think it highly unlikely that the seller will reduce the price. (formal)

leave/owe + it + to somebody + to-infinitive
I think we should leave it to the estate agent to talk to the owner about whether curtains are included.

verb + it + as + adjective + that-/if-/wh-clause
I see it as essential that there should be somewhere to park.

2.3 There

START POINT

There's a bus stop just outside the apartment block.
There are lots of new apartments being built in the city centre.

Because we use there to introduce topics, the noun after there + be often has an indefinite meaning, so we often use a/an, no article, any(one) + noun or some(thing), not(body):
There's a car park behind the Conley apartment block (not There's the car park ...)
There's something about parking in the information the estate agent gave us.

We use there, not it:

• to say or ask if people or things exist or are found in a particular place:
  There's nowhere to park. (not It's nowhere to park.)
  Was there a dishwasher in the kitchen? (not Was it a dishwasher in the kitchen?)

• to introduce information about quantities and amounts:
  There's a big grassy area at the back of the block. There wasn't much space in the bathroom.

There + be is often followed by:

• noun + that-/wh-/ing/to-infinitive clause
  There's a chance (that) he might include carpets and curtains.
  There are plans to build new apartments not far from the one we looked at.

• bound/certain/(un)likely/supposed/sure + to be
  There's bound to be a regular bus service from there.

There is also often followed by is, are, was or were. However, also common are:

• there + auxiliary/modal verb + be
  There must be someone we know who would redecorate it.

• there + seem/appear + to be
  There seem to be good and bad aspects of each apartment.

• there + passive reporting verb + to be
  There is expected to be a lot of interest in the property.
  Other reporting verbs commonly used in this pattern are estimate, find, reckon, report, say, think.

• verb + there + to be
  I wouldn't expect there to be many people interested in buying the apartment. or I wouldn't expect many people to be interested ...
23 It and there

If the noun after there is singular or uncountable, the verb is singular; if the noun is plural, the verb is usually plural (although there's is often used in informal speech):

There's a supermarket within walking distance.
There are so many things to think about; or informally There's so many things...

If a noun phrase after there consists of two or more nouns in a list, we use a singular verb if the first noun is singular or uncountable, and a plural verb if the first noun is plural:

There was just a bed, a small wardrobe and some bookshelves.
There were just some bookshelves, a bed and a small wardrobe; or informally There was just some bookshelves...

2.4 Common expressions with it's no and there's no

Common expressions with it's no include: it's no secret that, it's no surprise that, it's no use/good + -ing, it's no coincidence/accident that, it's no longer necessary to, it's no bad thing to, it's no doubt true that, it's no doubt the case that, it's no exaggeration to say that.

It's no wonder they've been having problems selling the apartment.

Common expressions with there's no include: there's no doubt that, there's no chance/denying that, there's no choice/alternative but to, there's no chance/hope of + -ing, there's no need to, there's no point in + -ing, there's no question of + -ing, there's no reason to, there's no harm in + -ing.

There's no hurry to decide.

5. ... so when you've checked [1] (2), I suggest you get a meal there.
7. Relax on Thursday morning and walk [1] [1].

In which of the extracts can you reverse the order of the words in the first space and the words in the second space?
2.1 Complex prepositions

Prepositions can be either simple (one word) or complex (two or more words):

- I'm really, really sorry about this. (simple)
- The bus will only take you as far as the main square. (complex)

Common examples of complex prepositions include: in accordance with, as against, along with, with effect from, in the event of, in exchange for, irrespective of, on the part of, in place of, for the sake of, thanks to, by way of.

Some complex prepositions have a meaning similar to a simple preposition:

- I wasn't able to reschedule the meeting, in spite of my efforts. (= despite)
- All the people in front of me had been queuing for a long time. (= before)

2.2 Verb + preposition: common patterns

- verb + object + prepositional phrase:
  - I tried to reschedule the meeting for next week, but it's just impossible.
- verb + preposition + object + preposition + object:
  - She complained to the company about the unreliability of their bus service.
- verb + preposition + -ing:
  - Don't worry about getting lost.
- verb + object + preposition + -ing:
  - I'd advise you against catching the bus.
- verb + preposition + object + -ing:
  - You can depend on the train running on time.

2.3 Phrasal verbs: word order

- I've booked you into a hotel not far from the station. Book into is a transitive, two-word phrasal verb. The object here is you and the particle is into.
- While you're strolling around, look out for Café Mathis. Look out for is a transitive, three-word phrasal verb. The object here is Café Mathis and the particles are out and for.
- Something's come up at work. Come up is an intransitive phrasal verb. There is no object.

Some phrasal verbs can be used transitively or intransitively with the same meaning:

- Feel free to call me back if there's anything that's not clear about tomorrow.
- Call back later.
24 Complex prepositions and prepositions after verbs

Others have different meanings when they are used transitively and intransitively:
*I've looked up the online timetable.* (transitive verb = I've found the information)
The weather seems to be *looking up now.* (intransitive verb = improving)

With most phrasal verbs, the object can go before or after the particle:
*I'll sort out the bill when I pick you up on Thursday morning,* or *I'll sort the bill out when I pick you up on Thursday morning.*

With these verbs we tend to put the object after the particle if the object is long:
*You might want to take down some of the information I'm going to give to you,* rather than *You might want to take some of the information I'm going to give to you down.*

and we always put the object before the particle if the object is a pronoun:
*I won't be able to pick you up at the airport after all.* (not *I won't be able to pick up you at the airport after all.*)

If the object consists of two or more items connected with *and,* it can occur before or after the particle even if one or both of the items is a pronoun:
*When I'm next in London I'll look you and your wife up,* or ... *I'll look up you and your wife.* (look up = go and see them)

With some phrasal verbs, the object must go after the particle(s):
*When you've checked into the hotel, I suggest you get a meal there.* (not *When you've checked the hotel into ...*)

With a few phrasal verbs the object must go between the verb and the particle:
*Although she was the youngest in the class, she used to order the other children about.* (not ... *she used to order about the other children*)

A few three-word phrasal verbs have two objects, one after the verb and the other after the particles:
*I'll take you up on your offer to buy me a meal.* (verb = take up on; objects = you and your offer)

Grammar exercises

3.1 Complete the sentences using the notes in brackets. Use an appropriate tense for the verb. If two word orders are possible, give them both.

7. He lost his temper with me last week, so he gave me a box of chocolates **way**. (way)
8. The road will be closed for major repairs **effect**. (effect)

3.3 Complete these extracts from a radio news report by expanding the notes in brackets. Choose appropriate forms for the verbs and add prepositions and pronouns where necessary.

1. Police **have appealed to witnesses for information** about the fire which has led to the closure of the main east coast rail line at Crewbury. A factory next to the line was burned down yesterday, causing major damage to the track. Rail passengers are currently being **advised to use** the line.

2. In the first interview given by the Foreign Minister since newspapers reported that she personally approved illegal arms sales, she **dismissed the reports** ‘completely untrue’. She went on to say that the accusation would not **prevent her from doing** her job, and that she intended to continue in her post.

3. Ten youngsters between the ages of 12 and 16 met the Prime Minister today after they competed in the World Youth Maths Challenge. The Prime Minister **congratulated the winners** excellent results in the competition. He said that they **benefited from taking part** the After School Maths scheme set up by the government to encourage young people’s enthusiasm for the subject.

4. The Agriculture Minister, Mariam Haddad, **quarreled with European counterparts** the issue of fish conservation. During a discussion on the decline in fish stocks, Ms Haddad got into a heated argument, which **ended with walking** out of the meeting.
Dear Jodi,

Sorry I haven’t been (1) **in** touch (2) **you** for such a long time, but it’s been a busy few months.

Earlier this year I heard that my great-aunt had died. Apart (3) **seeing** her a couple of times at my parents’ house, I didn’t really know her. So you can imagine my surprise when I found (4) **she’d** left me a cottage along (5) **some** money in her will!

When I saw the cottage, I just fell in love with it. It’s close (6) **a** beautiful little village, and looks out (7) **the** sea. My great-aunt used it as a holiday home, and I’ve decided to do the same. Unfortunately, it’s been badly looked (8) **on**, so I’ve had to spend most weekends this year sorting the place (9) **out** .

I knew it was (10) **need** (11) **some** work, and at first I thought I could get away (12) **giving** it a quick coat of paint. But I soon realised it was a much bigger job. There were holes in the roof, and the window frames were so rotten some of the panes of glass were (13) **in danger** (14) **of** falling out.

I was walking around the village one Saturday, wondering what best to do, when who should I run (15) **into** but Barney Adams. Do you remember him from school? As luck would have it, he now works in the village as a builder and decorator. We got talking, and he said he’d come (16) **over** and look (17) **at** the house.

Naturally, I took him up (18) **on** his offer! He got really enthusiastic about it. He talked me (19) **through** replacing all the windows, and he’s put in a new central heating system (20) **in** place (21) **of** the old coal fires. I’ve had to prevent him (22) **from** extending the kitchen, which he was keen to do! He’s checked the roof (23) **for** , and fortunately that doesn’t need replacing. Thanks (24) **to** Barney, the house is now looking brilliant, and (25) **compared** to other builders, he doesn’t charge very much.

The next project for me is to clean (27) **up** the mess in the garden, as it’s completely overgrown. If you want to come (28) **over** and help me (29) **at** some time, feel free! You’ll always be very welcome.

Love,

Emily

1 influenced (verb - no preposition) + 10 influence on
Grammar

START POINT

I felt that there was a big demand for an online newspaper.
It was difficult to generate business at first.
Many nouns and adjectives are typically followed by particular prepositions.

2.1 Noun + preposition: related verbs and adjectives

Many nouns are followed by the same prepositions as their related verb or adjective:
We used to get quite a lot of complaints about our news coverage. or People used to complain a lot about our news coverage.
I wanted to increase young people’s awareness of current affairs. or I wanted to make young people more aware of current affairs.
A few are followed by different prepositions from their related adjective:
We take pride in the design of our website. or We are proud of the design of our website.
Some take a preposition where their related verb does not:
Young people may be able to have an influence on government policies. or Young people may be able to influence government policies.

2.2 Noun + preposition + -ing or noun + preposition + noun

Most noun + preposition combinations can be followed either by an -ing form or a noun:
There have been protests about locating a new nuclear power station on the east coast. or There have been protests about the location of a new nuclear power station on the east coast.
Some noun + preposition combinations are more often followed by a noun than an -ing form:
I felt there was a demand for the publication of an online newspaper. rather than I felt there was a demand for publishing an online newspaper.

2.3 Noun + of + -ing or noun + to-infinitive

Some nouns can be followed by either of + -ing or a to-infinitive with little difference in meaning:
The idea of setting up some kind of newspaper for young people came from that time. or The idea to set up …
I had the opportunity to do a course on website design. or I had the opportunity of doing a course on website design.
Some nouns have more than one meaning and are followed by either of + -ing or to-infinitive depending on which meaning is used:
Young people get the chance to contribute in various ways. (chance = opportunity)
The banks thought there was little chance of making it a commercial success. (chance = likelihood)
Some nouns can be followed by of + -ing, but not a to-infinitive:
The difficulty of persuading the banks to lend us money meant that we had to borrow money from our parents. (not The difficulty to persuade the banks …)
Some nouns can be followed by a to-infinitive, but not of + -ing:
We took the decision to work on it for six months. (not We took the decision of working on it …)
Prepositions after nouns and adjectives

2.4 Noun + in or noun + of
We use increase/decrease/rise/fall + in when we talk about what is increasing or decreasing, and increase/decrease/rise/fall + of to talk about the amount of an increase or decrease:
The recent increase in hits on the website means that we can charge more for advertising space. (not The recent increase of hits ...)
We've had an increase of about 50% .... (not We've had an increase in about 50% ...) Other nouns like this include: cut, decline, downturn, drop; gain, growth, jump, leap.

2.5 Adjective + preposition: expressing feelings
Many adjectives which refer to feelings or opinions are followed by particular prepositions:
Young people seem generally very enthusiastic about the site.
They were very wary of advertising on the site.

2.6 Adjective + preposition: different meanings
Some adjectives are followed by different prepositions, depending on meaning:
I knew they were concerned about what was going on. (concerned about = worried about)
We have a reviews section, which is concerned with films, CDs ... (concerned with = to do with)

Urban growth

1.1 Think of a city you know well. Which of these phrases do you associate with it? Put a (√).

an important commercial centre
a vibrant cultural centre
a major tourist attraction
a sprawling metropolis
gridlocked rush-hour traffic
accessible open spaces
run-down estates
affluent suburbs
steeped in history
seriously polluted
densely populated
friendly and welcoming

1.2 Choose the best words to complete the text.

Urban sprawl is the uncontrolled spreading of a city or its
(1) suburbs / residences. It often involves the (2) demolition /
construction of residential or commercial buildings in
(3) rural / environmental areas or otherwise undeveloped
land on the (4) outskirts / neighbourhoods of a city. Typical
(5) residents / commuters of these areas live in single-family
homes and travel by car to their jobs in the city. Concerns
over urban sprawl largely focus on negative (6) costs /
consequences for residents and the local
(7) environment / space. The tendency of people living in
these neighbourhoods to commute to work means that urban
sprawl is sometimes associated with increased air
(8) pollution / pollutant from car exhaust fumes.

1.3 Find words in the text which match these definitions.

1 related to towns and cities
2 related to trade or business
3 particular part of a place
4 not previously built on
5 people who live in a place

V Vocabulary note

This book draws attention to language chunks of the following types:

COLLOCATIONS = words frequently used together: densely populated, leafy
suburbs, open spaces, violent crime

COMPOUND NOUNS = nouns made up of two or more words: tourist attraction,
skyscraper, cost of living (See Unit 5, 2.1 for more on compound nouns.)

DEPENDENT PREPOSITIONS = some adjectives, nouns and verbs are followed by particular prepositions:
steeped in history, plagued by crime (See Unit 24, 2.1 and Unit 25, 2.2 for more on dependent prepositions.)

PHRASAL VERBS = two- or three-part verbs with idiomatic meanings: break
down, get around, look forward to (See Unit 25, 2.3 for more on phrasal verbs.)

IDIOMS = phrases with special meaning that cannot be understood from the individual words: go to town
on something, hit the road, cut and dried
1.4 Vocabulary note

Some adjectives have a special meaning as noun suffixes.

- **free** = without an undesirable thing: I always buy fat-free yoghurt.
- **friendly** = suitable for or welcoming of: Child-friendly software comes pre-installed.
- **mad** = liking or doing something obsessively: My husband is football-mad.

Note: The noun in these phrases is singular.

1.5 Complete the compound nouns in these sentences with words from the box.

The _______ explosive _______ growth in the number of closed-circuit television (CCTV) surveillance systems in recent years is transforming city centres in some countries. For some people, the cameras have a _______ benefit, as they take comfort in the _______ that they are being watched and protected. In some neighbourhoods, there are even socially _______ CCTV systems, which allow local _______ to tune in to community TV and watch what is happening outside their front doors. People know the cameras can be _______ in solving crimes, but are they right to believe that cameras are keeping them safer? According to one crime expert, they are not. He conducted a study of 14 CCTV systems and found that, in general, the _______ of cameras has _______ little impact on crime. In only one of the 14 areas could a _______ drop in crime levels be linked to CCTV.
Sigmund Freud once compared the human mind to the city of Rome. He was talking about its intriguing layers. Just as the mind has a build-up of memories, Rome has a history that goes deeper and deeper: every modern building is on top of a renaissance one, and under that you find the medieval buildings, and then ancient Rome itself. Freud might also have said that — just as with the mind — as you go deeper into the city you find the unpleasant parts like the slums as well as the clean, splendidly 'proper' parts.

Ancient Rome was home to a million people and was, in its time, the biggest city in Europe. Most of that million, from the dockworkers to the hairdressers, didn't live in spacious marble villas. They were packed into tower blocks that lined narrow streets, with hardly any public services. It must have been a tough place to survive in.

So where can you still find signs of these ordinary 'high-rise Romans'? Amazingly, the answer is 'all over the city'. You only need to know where to look, and keep your eyes open. My favourite remnant of ordinary ancient Roman life is still standing in the heart of tourist Rome. It's part of a tower block, still surviving to five storeys in a modern square — just underneath the Victor Emmanuel monument. Most of these blocks have fallen down, but this one was lucky: it survived because it was turned into a church.

It's easy to work out the basic organisation of the block. At street level, there are shops and workshops. The principle was 'the higher you went, the worse it got'. On the first floor you can see some spacious family flats; and above that, bedsits. The question is, how many people were squashed into these rooms? If they were for one person, then this was very ‘tight living’. But if they were single rooms without bathroom or cooking facilities, designed for whole families, they must have been really dreadful conditions.

And in ancient Rome — as this particular high-rise block reminds us — rich and poor lived and worked side by side. There weren't many zones given over exclusively either to the rich or the poor. In fact, if you look hard enough, you can find traces of ordinary people inside the most luxurious and ceremonial buildings of the city.

A visit to the ancient Roman Forum can be a disappointment. This was once the centre of Roman public life, where the senate met. It is now a rather mysterious set of ruins, with just a few standing landmarks: two splendid triumphal arches and the three vast columns of the Temple of Castor. The Forum becomes far more interesting if you also look down for the evidence of the ordinary men and women who shared this space with the great and the good — and who had their own things to do there, from a bit of gambling to basic dentistry.

Running along its south side are the now decidedly unimpressive ruins of what was once the splendid Basilica Julia, home of one of Rome's law courts, plus some government offices. Not much survives beyond the floor and the steps leading up to it. A barrier now prevents visitors from walking inside; but actually you don't need to. Look over the barrier on to the steps, and you will see the clear traces cut into the stone of scores of 'gaming boards'. We haven't a clue about the exact rules of the games, but never mind. It's clear that the Basilica Julia wasn't just a place for busy lawyers; go back 2,000 years and you would find the place littered with men with time on their hands, betting on some ancient equivalent of backgammon.
Next door to the basilica is the great Temple of Castor. Here you have to take your eyes off the columns, and look more carefully at the high platform on which they stand. Built into this is a series of little shops and storage units right underneath this grand monument. One of the corner units was a primitive dentist's surgery. Among the most memorable moments for me was going to see the almost 100 teeth discovered a few years ago in its drains, each one expertly extracted and rotten to the core. Each one a witness to human agony, I thought.

1. The main point the writer is making about ancient Rome is that
   A. it is completely hidden by modern buildings.
   B. traces of it can be seen everywhere.
   C. it was very similar to modern cities.
   D. it has had a long and fascinating history.

Writing Part 1 An essay

You must answer this question. Write your answer in 220 – 260 words in an appropriate style.

Exam tip

Make sure that you read the question and notes carefully, so that you know exactly what you have to do. When you answer the question, remember to deal with the three methods listed. If you want to make use of any of the opinions expressed, use your own words. It is always a good idea to start by making a brief paragraph plan so that you cover all the points in the question.

Look at the exam task and answer these questions.
1. How many of the ways listed in the notes do you have to refer to in your essay?
2. In what way is expressing an opinion not enough?
3. If you express one of the opinions listed, what should you do?

Your class has attended a panel discussion on ways in which historical information relating to your neighbourhood can be collected and recorded for future generations. You have made the notes below.

Ways in which information relating to your neighbourhood can be collected and recorded for future generations:
- consult written records
- record personal interviews
- collect old photographs

Some opinions expressed in the discussion:
"Written records can provide facts but not personal opinions or feelings."
"Old people's memories can be unreliable."
"Photographs may be in poor condition and therefore difficult to interpret."

Write an essay discussing two of the ways to collect and record information in your notes. You should explain which way you think would be more effective for collecting and recording information for future generations, giving reasons in support of your answer.

You may, if you wish, make use of the opinions expressed in the discussion, but you should use your own words as far as possible.
In 1.1 there are two adjectives which are often confused with similar words.

classical/classic

classical = traditional in style or form; of the ancient civilisations of Greece and Rome: **Classical literature** usually makes heavy reading.

classic = established over time as popular, the best or most typical of its kind: The little black dress is a classic look.

historical/historic

historical = connected with or based on past times: It's a historical novel about the Tudors.

historic = very important in history: These historic events will shape the nation's future.

V Vocabulary note

Notice that we use the definite article the with the names of most entertainment venues: the Sydney Opera House, the British Museum, the O2 Arena, the Odeon cinema.

(See Unit 5, 2.4 for more on the use of the definite article.)

2.3 Match these reviews with two of the events in 1.1.

1. Playing some of his better-known back-catalogue, the now 79-year-old free-jazz saxophonist Ornette Coleman proved to a capacity audience what a lasting genius he is. What was chaotic and painful to listen to in the 1960s sounds melodic 40 years on. The mood of the music alternates between euphoric and melancholic, but it is always exciting and often surprising.

2. Speaking an estimated forty percent of the lines in the play, Jude Law, as Hamlet, gives an exhilarating performance. He incorporates physicality throughout, and infuses a breathtaking amount of energy into the part. He also knows what he's talking about. There is no recitation or learning by rote here. It's plain that after the year he was given to prepare for this role, and after the three months of performance in London, Law has an intimate understanding of his character, the language and the play as a whole.

2.4 Find words and phrases in the reviews which match these definitions.

1. past recordings of a musician
2. largest crowd a venue can hold
3. pleasantly musical
4. words an actor has to say
5. role played by an actor

(1) ___________ settlers _______ are people who intend to live permanently in a new country. Most head for just a few main countries, for example, the USA.

Some will succeed in their aims and gain status as legal residents of the country they have moved to. These people are technically called (2) ___________ although this term is most commonly used by people from English-speaking nations to describe people from more developed nations living permanently abroad.

Migrants who leave their homes to escape danger or persecution may also be looking for a permanent new home. Until their claims are dealt with they are known as (3) ___________ and if their claims are accepted they will be classified as (4) ___________. In some cases of mass flight, when thousands of people escape across a border, they are immediately granted this status.

Looking for a job, a better income or perhaps just an experience, other migrants are admitted to countries as (5) ___________. They are allowed to stay in their destination country on the understanding that it is for a specific period. Some are seasonal employees. Others will stay in the new country for a year or more. These include employees of multinational corporations who are moved around from country to country. These people are often (6) ___________ , with specialist knowledge in their field.

Some migrants overstay their visas or work whilst in the country on tourist visas. When this happens they become (7) ___________ in the eyes of the officials. They may also try to enter an ‘immigration country’, often endangering their own lives, by being smuggled in by people they have paid for this service.

Vocabulary note

The prefixes en- and em- add the meaning ‘put into’, ‘cause to be’ or ‘provide with’ to verbs. So endanger means ‘to put in danger’. Other common verbs starting with en- include: encase, encircle, engulf, enable, enlarge, enliven, enrich, enclose

The prefix em- is used before words which begin with b or p: embed, embitter, embody, empower

1.2 Answer these questions.

2 hang-gliding  d  6 skydiving  
3 ice climbing  e  7 white-water rafting  
4 potholing  f  8 windsurfing  

1.2 Which of these sports have you done? Which would you try?

V Vocabulary note

The compound nouns for these sporting activities are formed using the -ing form. Some are written as two separate words, some have a hyphen (-) and others are one word.
(See Unit 5, 2.1 for more on compound nouns.)

1.3 Choose the best words to complete the text.

A defining feature of extreme sports for many people is their alleged capacity to (1) induce / install an adrenaline rush in (2) participants / patients. However, the medical view is that the 'rush' or 'high' (3) associated / imparted with an activity is not due to adrenaline being (4) resumed / released as a response to (5) flight / fear. Medical professionals now claim it is due to increased (6) levels / channels of dopamine, endorphins and serotonin resulting from extreme physical (7) exhibition / exertion. Furthermore, a recent study suggests that the link between adrenaline and 'true' extreme sports is (8) tentative / understated. The study defined 'true' extreme sports as leisure or (9) recreational / residential activities where the most likely outcome of a mismanaged (10) adventure / accident or mistake was death. This definition was designed to separate the marketing hype from the (11) action / activity itself. Another characteristic of these activities is that they tend to be (12) individual / lonely rather than team sports. Extreme sports can include both competitive and non-competitive activities.

1.4 Match these words and phrases from the text with their definitions. Use a dictionary to help you.

1 marketing hype  a result  
2 physical exertion  b exaggerated descriptions used in sales  
3 outcome  c poorly controlled or organised  
4 mismanaged  d movement of the body which raises the heart rate  
5 characteristic  e typical or noticeable quality

progress responsibility steps to sure use of

TAKE: action
MAKE: a choice

1.6 Complete these sentences with one of the collocations from 1.5.

1 I've only just started, but my ski instructor says I am making good progress.

2 If you want to take part in any sporting activity, you should exercise precautions
   from those who are more experienced than yourself.

3 It's important that participants in extreme sports exercise full responsibility for their own actions.

4 Some sports are extremely dangerous even if you do take part in the next Olympic Games.

5 I think you have to risk taking about the level of risk you find acceptable.

Risk-taking

2.1 You are going to hear a news report which says that certain groups of people are more likely to take risks than others. Choose the statement you think is correct (1–3). Listen and check.

1 Women are more likely to take risks than men.
2 Teenagers are more likely to take risks than children or adults.
3 People from difficult social backgrounds are most likely to take risks.

2.2 Listen again and complete these sentences with words or phrases used by the speaker. Write up to three words.

1 A US study set out to determine why people take risks.
2 The study sampled 500 participants, divided into _________________.
3 One option in the study was safer, but would result in a _________________.
4 The second option resulted in a two-thirds chance of _________________.
5 Gender was a ________________ predictor of a preference to avoid risk.
6 Older generations tend to ________________ when assessing risk.

2.3 What does the speaker mean by the onset of adolescence? Choose the best meaning.

V Vocabulary note

The speaker in 2.1 uses formal language in the report, e.g.

conclusion = decision

How to assess the risks in your workplace

Don’t overcomplicate the process. In many organisations, the risks are well known and the necessary control (1) measures / ways are easy to apply. You probably already know whether, for example, you have (2) employees / employers who move heavy loads and so could harm their backs, or the places where people are most likely to slip or trip. If so, check that you have taken (3) rational / reasonable precautions to (4) prohibit / avoid injury. If you run a small organisation and you are confident you understand what’s involved, you can do the assessment yourself. You don’t have to be a health and safety (5) expert / leader. If you work in a larger organisation, you could ask a safety adviser to help you. If you are not confident, get help from someone who is (6) competent / talented. In all cases, you should make sure that you involve your staff or their (7) agents / representatives in the process. But remember, you are (8) responsible / responsive for seeing that the assessment is carried out properly.

When thinking about your risk assessment, remember: a hazard is anything that may cause harm, such as chemicals, electricity, working from ladders, etc. The risk is the (9) chance / opportunity, high or low, that somebody could be harmed by these and other hazards, together with an indication of how (10) sensible / serious the harm could be.

3.2 Answer these questions about a place you know well.

1. What are the most hazardous areas and objects?
2. What are the riskiest activities carried out on the premises?
3. Who might be harmed by these hazards?
4. What precautions could be taken to prevent people being harmed?

Vocabulary note

- trip = to lose your balance after hitting your foot on something: I tripped while I was running for my train and fell flat on my face.
- slip = to slide unintentionally on something wet or smooth, so that you lose your balance: Several people slipped on the icy pavements and two were admitted to hospital with suspected fractures.
- stumble = to put a foot down awkwardly and because of this begin to fall: Running along the beach, she stumbled and fell on to the sand.
Should cyclists be forced to wear helmets?

A recent attempt in the UK to make cycling helmets compulsory failed. Now, after a serious crash that put one rider into a brain injury unit, the idea is back on the table. But how much protection do helmets offer?

1

When I was 13, with my helmet hanging from my handlebars, I wobbled out into the road and was hit by a car. Later that day I remember being told how lucky I was to be wearing it. I said nothing.

2

So if they can help reduce injury, shouldn’t they be compulsory, just like motorbike helmets? Australia tried it in the early 90s and the result was a 15 to 20 per cent drop in the number of hospital admissions for head injuries.

3

A recent study has shown that cycling has a positive health impact far greater than the potential for injury. Essentially, there’s a small chance that you’ll have an accident, but a very large chance that you’ll reduce your chances of suffering mental illness and heart disease.

4

A British cycling organisation has long argued against compulsory helmet laws for a similar reason.

5

It claims they would make cycling seem more dangerous than it actually is, and put people off. The evidence for this is complex and contradictory, providing as much support for those who are deeply sceptical of helmets as for those in favour of them.

6

There’s even evidence that wearing a helmet can put you at more risk. A study by Dr Ian Walker from the University of Bath found that drivers passed closer to cyclists who were wearing helmets when overtaking than they did to those without them. The driver’s subconscious obviously sees them as less vulnerable. Dr Walker, an enthusiastic cyclist, says: “It would be sensible, and would genuinely save a lot of lives, if everybody wore a helmet all of the time; but to suggest they are more necessary for cycling than a range of other activities – including walking down the street and driving a car – is misguided.”

Personally, I believe that wearing a helmet has more pros than cons, even though cycling is not as risky as many suggest. But there are those out there who would rather not ride than be made to wear a helmet, and for that reason the idea is a non-starter.
It's undeniable that compulsory safety devices such as seatbelts in cars have been significant lifesavers. But neither had the same potential for harmful side-effects: dissuade motorcyclists from riding and they'll buy a car, which is actually far safer.

Cycling should be promoted as an essentially safe, normal and enjoyable transport and leisure activity, which anyone can do in whatever clothes they prefer to wear, with or without helmets.

In addition to this, there's the problem of enforcing new laws. In the first year after the Australian State of Victoria made helmets compulsory, nearly 20,000 fines were issued. Do we want to tie up that much police time on a crime which has no negative impact on a third party?

Last year, however, I had a nasty fall and cut my face. If it wasn't for my helmet, I'm sure it could have been worse. So, personally, I now almost never ride without a helmet. I'd rather have it and not need it, than need it and not have it. Studies disagree on the benefits, but some suggest that most head injuries could be prevented in this way.

Most people would rather not wear a helmet, especially in hot weather. It's a practical decision: ride long and often enough and one day all those years of unnecessary sweaty-hat hair could pay off.

That means laws can actually be counterproductive; they may reduce cycling injuries, but only by reducing the number of cyclists, and those people then become more likely to come to some other kind of less-dramatic harm.

That would have been great, but it also reduced the number of cyclists by around 35 per cent. The annoyance and, for teenagers, embarrassment of wearing one steered people away from bikes and towards public transport and cars.
Language

1.1 Which of these job titles tell you the gender of the person? Write M (male), F (female) or N (neutral).

Maria Montessori was one of the most important early years (1) educators of the 20th century. She was the first woman to (2) graduate from the University of Rome medical school and became interested in education through her work as a doctor, treating children with special (3) needs.

When she went on to establish schools for the disadvantaged children of working parents in Rome, she approached their education as a scientist. She used the (4) laboratory as her laboratory for observing children and finding ways to help them to achieve their full (5) potential.

It soon became apparent that Dr Montessori had developed a highly effective teaching (6) method which could be used with great success with each and every child. She began to travel the world, establishing schools, lecturing about her discoveries, and writing articles right up to her death in 1952. She was a true pioneer of (7) education. Her innovative classroom practices and ideas have had a profound (8) influence on the education of young children all over the world.

Montessori saw that children learn best by doing and that happy self-motivated learners form positive (9) images of themselves as confident, successful people. She created specially designed resources to (10) foster independence and a love for learning from an early age.

The Montessori approach is holistic, that is, it aims to develop the (11) whole child. Fundamental to this approach is the belief that a child’s early life, from birth to six years old, is the period when they have the greatest (12) potential to learn.

Reading and Use of English Part 6

You are going to read four reviews of a book about bringing up children. For questions 1 – 4, choose from the reviews A – D. The reviews may be chosen more than once.

How children succeed

Four reviewers comment on a book called Helping Children to Succeed

A
I expected this book to enlighten me about why some children succeed at school and find work, while others drop out of education early, fail to find employment and continue living with their parents well into adulthood. I had hoped that Helping Children to Succeed would provide me with well-researched answers to my concerns, and maybe suggest ways in which all children can be helped to achieve success. However, the author chose to concentrate on the future of students from poor families and gave no indication that he felt such children’s chances of future success might be improved. There was an interesting focus on the significance of taking students’ personality into account as well as their academic test scores when predicting future success, but this is not new information. The same case has been established before, based on wider research.

B
I found Helping Children to Succeed to be a fascinating and inspiring book. What was most interesting to me was the research finding that children from wealthy families are no more prepared for a successful independent future than children from poorer families. The author demonstrates convincingly that children from all backgrounds need to learn how to work hard but also how to deal with failure without falling to pieces. The book shows convincingly how poor children as well as middle class children and those from wealthier homes are capable of learning these skills necessary for future success. This has made me feel very optimistic that no child needs to fail because of their family background and that something can be done to increase the life chances of poor children.

C
For me the most interesting aspect of Helping Children to Succeed is the amount of evidence which shows that children’s characters as well as their academic performance play a crucial part in their future success. This seems to be especially true in the case of children from disadvantaged families. The author’s central argument is that, even though children from poor backgrounds are less likely to succeed, determination and hard work can overcome inherited disadvantages. This is not a novel idea, but I found it interesting to hear it restated with reference to today’s situation. Where I disagree with the author is his assertion that our education system requires fundamental reorganisation if we are to help children from poor families. He seems to ignore completely the excellent work being done by dedicated teachers in today’s schools. He seems to ignore completely the excellent work being done by dedicated teachers in today’s schools.

D
I enjoyed Helping Children to Succeed, but in many ways I also found it disappointing. Having finished reading the book, my main criticism is that the title itself is misleading because it focuses primarily on children who fail. Most research studies quoted by the author illustrate how difficult it is for children from poor, disadvantaged homes to succeed or indeed to escape from a cycle of failure. I bought the book for the library where I work, thinking it might offer parents strategies for bringing up children to be successful. In practice, the main strategies recommended by the author are the following: avoid becoming poor and don’t expect your child to succeed at everything. He also suggests that children should get used to occasional failure. In my opinion this is an unnecessarily negative outlook.
Which reviewer

shares reviewer C's view that academic performance is not the only measure of a child’s success?

expresses a different view from the others about poor children’s chances of future success?

shares with reviewer A the feeling that the book did not live up to their expectations?

agrees with reviewer A about the originality of the ideas in the book?

Exam tip

Read the four texts to make sure you understand the subject. Pay particular attention to opinions and attitudes expressed by the writers. Look out for any similarities or differences of opinion.

Despite incredible improvements in health since 1950, there are still a number of challenges which should have been easy to resolve. Consider the following:

• One billion people lack access to healthcare systems.
• Cardiovascular diseases (CVDs) are the biggest killer amongst diseases globally. An estimated 17.5 million people died from CVDs in 2005, that is 30% of all global deaths.
• In 2002, almost 11 million people died from infectious diseases alone, far more than the number killed in the natural or man-made catastrophes that make headlines.
• HIV has spread rapidly. UNAIDS, the joint United Nations programme on HIV/AIDS, estimates are roughly: 33.4 million living with HIV, 2.7 million new infections of HIV, two million deaths from AIDS.
• There are 8.8 million new cases of tuberculosis (TB) and 1.75 million deaths from TB each year.
• 1.6 million people still die from pneumococcal diseases every year, making it the number one vaccine-preventable cause of death worldwide. More than half of the victims are children.
• Malaria causes more than 300 million acute illnesses and at least a million deaths annually.
• Around 11 million children under five die from malnutrition and preventable diseases each year.
• More than half a million people, mostly children, died from measles in 2003 even though effective immunisation costs just 0.30 US dollars per person, and has been available for over 40 years.

33 Health

Water and health

3.1 Read the text about water and choose the best summary (a–d).

a Drinking more water substantially reduces your metabolic rate.

b Drinking enough water allows increased carbohydrate storage.

c Water aids the consumption of excess energy.

d Drinking water is by far the best way to lose weight.

The benefits of drinking water are numerous, and recent studies suggest that you need to drink water to lose weight.

Drink more water to re-hydrate and detoxify your body.

Water is not only essential for health, but increases the rate at which the body burns calories, as well as being a natural appetite suppressant.

Water also plays an important role in metabolising food.

While we know that water is critical to the healthy functioning of the human body, studies suggest that water promotes the lowering of an individual's total energy intake and alters metabolism. Most people who are on a diet do not drink enough water.

To metabolise food, the body needs water.

For every gram of carbohydrate, the body requires three grams of fluid. So, drinking sufficient water can help your body burn up carbohydrates instead of storing them. Additionally, proper hydration while you are on a diet is vital for health, because you are more prone to water retention as your body starts losing fluid along with the weight. If you are dehydrated, your body will slow down its calorie-burning processes. So drink water to lose weight.

3.2 Find words and phrases in the text which match these definitions.

1 remove poisonous substances from your body ____________

2 something which prevents hunger ____________

3 the overall amount of energy consumed ____________

4 change eating habits to reduce body fat ____________

5 liquid substance ____________

6 be likely to have a particular problem ____________

7 have insufficient water in your body ____________

3.3 Complete these sentences using the correct prepositions. There are similar sentences in the text.

1 Regular meals are vital _________ healthy living, especially if people do physical activities.

2 Although we should not eat too much of it, fat is essential _________ our health.

3 You're more prone _________ illness when you're tired or run down.

4 Exercise plays an important role _________ keeping fit.

5 The rate _________ which you lose weight depends on the number of calories you burn.

6 To remain healthy, a balanced diet is important, along _________ regular exercise.

7 We live in an age where the public health infrastructure, its growth and its development are critical _________ our collective health.
Writing Part 2 A report

You see the following notice in your local health centre.

An International Health Development Agency is collecting information about attitudes to public health campaigns in countries around the world. Please help by writing a report on attitudes where you live.

Your report should outline some of the main current health concerns in your country, describe people's attitudes to any recent campaigns aimed at promoting healthy lifestyles and recommend ways in which you think people could be persuaded to take healthy living more seriously.

Write your report in 220 - 260 words in an appropriate style.

Exam tip

Decide who will read the report and how formal/informal your language should be.

Your report should include factual information followed by suggestions or recommendations.

Give your report a title and organise your ideas into sections, each with its own heading. Start by outlining the purpose of your report. Use your own words rather than repeating the words in the question. Explain the reasons for any recommendations you make.

5. The creation of cycle paths in Portland has resulted in a ____________________ in the use of bicycles in the city.
6. Portland was the first city in America to provide adults on _______________ with commuter bicycles.
7. The bicycles are all _______________ everything needed to use them.
8. The world’s most successful community cycling ____________________ can be found in Copenhagen.
9. In Copenhagen the majority of bicycle paths are separated from the main ____________________.
10. There is a 20 kroner ____________________ when you use one of Copenhagen’s public bicycles.

Public transport

2.1 Complete the text with the correct words from the box.

- eco-friendly
- fossil fuels
- get around
- carbon emissions
- private cars
- self-driving vehicles

Dubai recently opened its first Metro network in a bid to reduce the number of people using their cars and cut (1) _______________. The $7.42 billion project has so far been hailed as a success as thousands of people have opted to use it to (2) _______________ the city, as opposed to their cars. It raises the question that, if governments are so enthusiastic about citizens relinquishing their (3) _______________ to save the environment, what other alternatives are there? How else are people going to get to work conveniently, do their shopping or generally travel with ease and relative cheapness? Currently, the majority of public transport runs on (4) _______________ which creates pollution and is reliant on finite resources. However, many alternatives, such as (5) _______________, are being researched. Some of them may seem like preposterous ideas drawn from science fiction, but the drive to find (6) _______________ forms of transport is on.

Vocabulary note

get around = travel to different places:
More and more people are getting around by bicycle, especially in big cities.

get away with = escape without punishment for something you have done wrong:
They attacked the old man in the park, but nobody saw them, so they got away with their crime.

get by = to cope in a difficult situation:
I couldn’t speak the language, but I got by with gestures.

get out of = avoid doing something:
He tried to get out of going on the school trip, but in the end he had no choice.

get round to = do something after a long delay:
I’ve had her DVD for weeks, but yesterday I eventually got round to giving it back.

2.2 Answer these questions using appropriate phrasal verbs from the Vocabulary note.

1. If you were in an unfamiliar city, how would you travel from place to place?
2. If you were abroad and couldn’t speak the language, how would you cope?
3. How do you avoid doing things you don’t want to do?
**2.3 Read about some possible new forms of public transport and answer these questions.**

1. Which of the forms of transport would you like to use? Why?
2. Which do you think would be sensible transport solutions for your local area? Why?
3. Which ideas are unrealistic? Why?

**Driverless pods**
These vehicles seat four people and run along guideways like miniature trams. The service will not be timetabled, and will resemble a taxi service as a means of getting from A to B. Users will have the advantage of avoiding congested roads and will be able to travel at speeds of up to 32 km/h. Energy consumption per passenger is one quarter that of a car.

**Zeppelins**
A greener alternative to planes, these flying machines are finally making a comeback. Environmentalists praise the fact that they fly at lower altitudes than planes and use a fraction of the fuel. Another key advantage is that zeppelins do not need a runway to take off.

**Backpack helicopter**
Strap on a motor attached to a rotor and take to the skies with your very own backpack helicopter. Popular use of this personal flying machine would require individuals to undergo significant training in navigation and safety. Jet-packs, as seen in science-fiction films, seem an even less realistic prospect.

**Segway**
Powered by electricity, these clean-running, two-wheeled machines allow individuals to travel at speeds of up to 20 km/h. However, they cannot currently be used on most roads. Confined to pavements, users’ speeds are restricted.

**Maglev Trains**
These trains use the force of magnetism to drive them, slashing CO₂ emissions and significantly reducing noise pollution in the process. They’re even faster than conventional trains, with a potential top speed of 6,440 km/h. The only downside is that maglev trains are incompatible with the existent rail tracks and these would have to be replaced.

**Slidewalks**
Keep moving even while you’re standing still when slidewalks replace conventional pavements. In tests, these devices allowed walkers to move at speeds of up to 9 km/h. Airports have long used similar systems in the form of travelators. However, equipping our city streets with slidewalks would be a costly business.

**2.4 Complete these sentences with the correct prepositions. There are similar sentences in the texts.**

1. In most countries, cars are not allowed to drive to/at speeds of over 110 km/h.
2. Cycling is a greener alternative to/from other forms of transport.
3. New drivers are not allowed to go in/on fast roads like motorways.
4. Drivers caught speeding have to have training in/about speed awareness or face a heavy fine.
5. The pedestrian zone is confined about/to a very small central area.
6. Make sure you get the right fuel! Diesel is incompatible with/to petrol engines.
Listening Part 1

You will hear three different extracts. For questions 1 – 6, choose the answer (A, B or C) which fits best according to what you hear. There are two questions for each extract.

**Extract One**

You hear a woman asking her friend about a change in his transport habits.

1. On what occasions does he say he used to travel by taxi?
   - A when he couldn’t get a lift
   - B when he was on a short journey
   - C when he missed the last bus or train

2. What is the main reason he started walking more?
   - A He was spending too much money on taxis.
   - B He became tired of waiting for taxis.
   - C He realised that walking was beneficial for him.

**Exam tip**

For each question there is only one correct answer but you will hear vocabulary related to all of the options. Don’t choose your answers too soon. Make sure that what you hear fully answers the question. Remember, you will hear the recording twice.

**Extract Two**

You hear two people talking about flying.

3. What did the woman think when the pilot started speaking?
   - A She was determined not to lose control of herself.
   - B She was afraid that the plane was in real danger.
   - C She thought the plane was going to turn back because of bad weather.

4. Which is the worst part of flying for the woman?
   - A the last few moments of the flight
   - B the time she spends waiting to board the plane
   - C when the plane is about to leave the ground

**Extract Three**

You hear part of an interview with a man who is talking about travelling on the London Underground.

5. How did he feel about travelling when he first used the Underground?
   - A He was terrified.
   - B He was overexcited.
   - C He found it very funny.

6. What does he think of the Underground as an adult?
   - A It doesn’t inspire any particular feelings in him.
   - B It is surrounded by unnecessary marketing hype.

The Hollywood Star System

The star system was the method of creating, promoting and exploiting movie stars of early twentieth-century Hollywood cinema. In the past, studios used select promising young male and female actors, then glamorise and create new personalities for, often inventing new names and even new family and social backgrounds. Legendary actors were put through the star system include Cary Grant and Joan Crawford.

The star system put an emphasis the image rather than the acting skill. was expected that women would behave like ladies at all times, and were never allowed to leave the house without stylish clothes and full make-up. Men always had to behave like gentlemen public.

Just studio executives, public relations staff and agents worked alongside the actor to create their star personality, so they would work together to cover any incidents that could damage the public image of the star. A star's personal problems, such as divorce, would be suppressed.

Exam tip

Look at the words before and after the gap in the text. This will help you to decide what type of word you need, such as a preposition, an article, a pronoun or an auxiliary verb. Missing words may be part of phrasal verbs or fixed phrases.
Families

1.1 Quickly read the article to find the answers to these questions.

1 The writer names five roles that grandparents have in family life. The first is adviser. What are the other four?

2 When was it easier than it is now to teach children about beliefs and values?

3 What phenomenon is responsible for the changes in children today, according to the writer?

The role of grandparents in children's upbringing

(1) The word grandparents is descriptive of the unique dual parenting role that this generation assume. It emphasises the vital part they play in family life. With a wealth of old world experience behind them, and with the unique ability to metamorphose from advisers or mediators into listeners or friends, they can offer support and stability in an ever-changing world.

(2) The underlying sense of responsibility that goes with this is tremendous. Grandparents perform a balancing act between the needs of their adult children and those of their grandchildren. This role is varied. It is imperative at times, muted at others. It goes underground whenever required, but it is solid and absolutely dependable.

(3) Grandparents often bridge the gap between parents and their children. Rebellious, independent children who are trying to find their feet are almost always at loggerheads with their parents. The role of grandparents can be very important provided they act as impartial judges and are able to convey this feeling to both parties. Grandchildren prefer to listen to their grandparents rather than their parents, who often find themselves up against a brick wall.

(4) One important thing, which seems to be missing in the lives of children today, is a sense of family, values, beliefs and principles. This is where the grandparents step in. However, instilling beliefs and values is not as easy as it was fifty or sixty years ago. Then, no questions were asked and there was an implicit sense of trust. With changing times and changing outlooks, children have started to question the validity of everything around them. Globalisation has eroded their sense of belonging and weakened identification with their roots. Science and technology force them to doubt every traditional belief.

(5) Parents, who have so many demands on their time, are perhaps not in the best position to instil traditional values in their offspring. Children are very demanding and grandparents, without appearing to be pushy, have both the time and the experience to deal with tantrums. They can appease, soothe and impart values with tremendous ease. Our Indian culture is rich and varied, but how many children recognise this? Grandparents can teach them to appreciate cultural traditions and inform their moral development.

1.2 Match these expressions from paragraphs 1, 2 and 3 with their definitions.

1 have a wealth of  a find it impossible to make progress
2 perform a balancing act b deal with different demands at the same time
3 be at loggerheads c provide a connection
d bridge a gap d be unable to agree
5 be up against a brick wall e have a lot of

V Vocabulary note

Exercise can be uncountable or countable as a noun.

The uncountable noun describes physical activity that people do to keep fit and healthy:

*Regular exercise is good for you.*

Swimming is my favourite form of exercise.

The countable noun has several uses:

- specific physical or mental activity to improve something:
  *I do stomach exercises every day. I'm not keen on doing grammar exercises.*
- a course of action to achieve something specific:
  *The company statement is part of a public relations exercise.*

The phrasal verb particle off has a number of meanings:

- departure or separation, e.g. get off, close off:
  *They've closed off the city centre because of a bomb scare.*
- beginning, e.g. set off, start off, trigger off:
  *The incident triggered off a political debate.*
- stop or cancel, e.g. call off, cut off, switch off:
  *They've called off tomorrow's meeting.*
- decrease or completion, e.g. burn off, wear off, tail off:
  *The effect of the medicine is wearing off now.*

China on a shoestring?

A
You can probably manage on less than 30 euros per day. To do this, you'll have to look for the lowest fares on buses or trains and stay in hostels or budget hotels, of which there are many in southwest China. Taking the train is the best way of getting from one big city to the next, but buses are more economical. There are buses you can sleep on for long journeys — but having said that, they're pretty uncomfortable. One thing I can't stress enough: you'll miss out on the real China if you fly. Getting off the beaten track is best done by other means. However, in rural areas the language barrier was a challenge for me. I'm only sorry I wasn't able to converse more effectively.

B
I'd always liked the thought of being a solo traveller, but I think I'd probably had a better time going on something organised. My travel and accommodation cost about a hundred pounds a week, then there was food and flights to China on top of that. Once I'd paid, I didn't have to worry about money or anything else and I had people to share the experience with. I'd really recommend this option if you are in the same position. Our guide was a native speaker but fluent in English. He accompanied us everywhere and made everything so easy for the group.

C
Beijing seems really expensive to start with, but you soon find out how to get by on a budget and still eat well — the restaurants near the station are a good place to start. If you're going to travel around China by train, I'd suggest that you buy your ticket in advance, especially if you want to travel on a public holiday. And if you choose the cheaper seats, you'll be sure to get acquainted with the real Chinese. I can guarantee that they'll be interested in you. I've heard that you can travel pretty cheaply by plane these days, but I don't feel like I missed out. I would not have come into contact with so many locals if I had prioritised my own comfort whilst travelling.

D
If you go all the way to China, make sure you do as much as possible, instead of constantly looking for the least expensive ways of doing things. Obviously organised trips cost a little more than doing everything yourself, but I think you have a better experience. The travel reps are very efficient and want to make sure you get a good impression of the places you visit. As everything's set up in advance, you avoid misunderstandings and difficulties which can arise if you're trying to make arrangements in an unknown language.

E
Compared with travel in Europe, the cost of public transport in Chinese cities is incredibly cheap. In the capital, Beijing, for example, it only costs the equivalent of 30 cents to travel by underground anywhere in the city. If you buy what they call a "pass", you can travel around the city, but it can also be used to pay for public phones, for taxi fares or even to buy things in supermarkets. In many cities, taxis are a real option for travellers on a tight budget. If you share with other tourists, it can be cheaper than taking the bus. If you intend to go out at night, there may be night buses, but taxis are the most likely choice of transport, although some private citizens offer a taxi service in their private cars. These are often cheaper than taxis, but if you use them, you may be in danger, and you should remember that taking a "black taxi" is actually forbidden in China.
News and information

1.1 Which of these sources of information are important to you? Put a (√).

internet blogs  ____  24-hour TV news  ____  in-depth news analysis  ____

1.2 Complete the text with words and phrases from the box.

access to  directly  expert analyst  media channels  mobile devices
reported  stay up-to-date  subscribe to  targeted information  tuning in

Information sources of the future

The first and most dramatic change is the advent of social news. Social news is rapidly becoming the means by which we (1) stay up-to-date with what is going on in the world. News is no longer (2) solely by journalists. News can now come from anyone — bypassing the traditional (3) . Instead of having an edited version of what a(n) (4) is saying, we hear it straight from the source. Social news is about getting information (5) and unfiltered.

A new wave of entertainment has also arrived, one dominated by games, video and audio streams. Instead of (6) to a TV channel, we decide what to watch and when to watch it. We no longer have to (7) channels on which other people choose what we see. We control everything ourselves.

And a new concept in the form of (8) is slowly emerging. We are already seeing an increasing number of services on (9) which provide information for the particular area that you are in. For example, there are so-called ‘geo-targeting services’ which provide you with a list of restaurants within reach of your location rather than showing you establishments worldwide.

The number of these services is going to explode in years to come. In a world where we have (10) more information than we can consume, selecting that which is relevant will be a very important element of delivery. And this will expand far beyond the simple geo-targeting that we see today.

1.3 Find words and phrases in the text which match these definitions.

1  ignore a normal part of procedure to progress more directly ______ bypass
2  not edited or censored ______
3  news from websites where members decide the stories which are given priority ______
4  appear for the first time ______
5  use ______

V Vocabulary note

The original meaning of the word channel was a passage for water: The English Channel lies between England and mainland Europe.

It is now also used to mean a way to communicate information: diplomatic channels, television channel

Channel can also be used as a verb, meaning do something in a particular direction: He needs to channel his energy into something more positive.

3 Paula expected to find a good job in Ireland.
4 Paula was determined to be promoted.

Ireland's brain drain

Complete with a degree from a top Irish University and ready to join the world of work Paula McGrath struggled to find a job at home, so she decided to try her luck in the USA and escape the doom and gloom of the Irish economy. Now she can be found working in a restaurant in New York.

I graduated in Media Studies and came here to the US, which for many is the land of opportunity. I haven't landed the job of my dreams yet, but the excitement of living and working in a city like New York is like a dream come true in itself.

I always thought that I would stay in Ireland after I had graduated. The days when the country had a thriving economy were long gone, but there were still jobs for the more educated members of the workforce. At university I was aware that I couldn't wait for a job opportunity to spring up though, as there were plenty of people to fill gaps in the labour market when jobs were created.

At the same time Ireland was continuing to churn out more and more highly educated and highly motivated graduates, so I needed a plan to be able to compete. I decided that I would study as hard as I could and get the grades I needed to embark on a career.

I graduated with good grades and I was lucky enough to find a job in Dublin that had really good prospects. From my first day there I imagined myself climbing the corporate ladder and becoming an executive in the company. It was not to be though; after six months the company went bust and, all of a sudden, I found myself without a job.

I spent about six months trying to find a permanent job, but apart from some freelance work I couldn't find anything. I started to feel my work ethic disappear. It was at this point that I decided that it was time for a change. I came to the decision that I would try my luck in America. I applied for and got my visa and I haven't looked back since.

1.5 Complete the news article with words from the box.

finances income market non-essentials profits retailers spending stock

Low holiday spending due to economic worries

Americans won’t be spending as much this holiday season due to continued worry about their (1) finances. New research found that 56% of Americans rated the economy as ‘poor’ and 46% believed the situation was getting worse.

This is bad news for (2) trying to eke out their earnings this holiday season, especially since the survey showed that roughly 63% of respondents said they planned to spend less this holiday season. The figure is unchanged since last year, when retailers had one of the worst showings ever and had to slash prices even before Christmas to help move (3) .

Even the news that household (4) inched up is a double-edged sword. People surveyed indicated they’d be spending more on items like gas and groceries, but they’re making up for this increase by further cutting what they spend on (5) like movies or restaurant meals.

Perhaps the most troubling part of the research shows that a rising number of Americans not only have no money left over after paying their bills, but expect their (6) to fall even further in the coming months. Most people have already cut their spending to the bone, so it’s not clear what lies ahead for average Americans trying to make ends meet. The stock (7) may be rising and some big companies may be reporting (8) , but make no mistake: this data shows that we’re certainly not out of the woods yet.

Business tips

2.1 Read the article and write these headings above the appropriate paragraphs.

Focus on the essentials  Play to your strengths  Get the finance you need  Take advice

Top tips for starting your own business

A  
When seeking investment, make sure you put the time and effort into developing a solid business plan you can present to potential investors. The personal touch is also important, so try to build a good working relationship with your bank manager – it makes a big difference.

B  
When setting up a business, there’s often no need to spend large sums on offices, fancy logos and designer furniture. It is far more important to keep a low cost base at the start, and keep costs as variable as you can. Make sure you are not locked into long contracts, for example.

C  
Small businesses often have advantages over their larger competitors. If you can respond quickly to customers and feedback and always maintain the personal touch, your business may thrive where larger competitors have to struggle to react in such a dynamic way.

D  
Be a sponge, learn from others’ mistakes, as well as your own, and proactively seek out mentors. The Internet and especially social networking make it easy to connect with other small business owners. It’s important to be part of a buzzing business community.

You have listened to a radio discussion programme about the problem of young people not being prepared for employment. You have made the notes below.

Solutions to the problem of young people not being prepared for employment:
- school training programmes
- employers' programmes
- work experience

Some opinions expressed in the discussion:
"Employers should not be expected to train future employees in basic skills."
"It is the responsibility of schools to prepare students for the world of work."
"Young people should realise that starting work requires commitment and a readiness to learn new skills."

Write an essay discussing two of the solutions in your notes. You should explain which solution you think is more likely to be successful, giving reasons to support your opinion.

You may, if you wish, make use of the opinions expressed in the discussion, but you should use your own words as far as possible.

Exam tip
It is important that you make sure that what you write will make sense to the reader. This means presenting clear arguments in which the sentences and paragraphs are linked in a logical way. Remember to give reasons to support your ideas.

Read the article about environmental problems in Australia. Choose headings for paragraphs (1–6) from the expressions in 1.1.

1. When large numbers of trees are cut down, the salinity of the soil can greatly increase. Salt water draining from such areas can affect downstream water quality.

2. Pasture mismanagement is one of the main pressures on biodiversity. The unsustainable use of grazed pasture without giving plants time to recover has modified vast areas of grasslands. This kind of continued defoliation has led to desertification and erosion.

3. Australia’s fisheries are already close to collapse because of this activity, and the problem is getting worse. There are two major factors which account for the problem: slow regeneration of marine populations and depletion of fish stocks by commercial over-exploitation.

4. It is estimated that Australia gains around 20 new pests each year. Examples include cane toads, willows and, more recently, red fire ants. Historically, feral cats and foxes have been a cause of local extinctions and reductions in range for native species through a combination of habitat modification and predation. Weeds are an equally significant pressure on ecosystems, with more than 2,500 species of introduced plants now thriving in the wild in Australia. They have invaded every part of the landscape.

5. Bio-intensive farming is affecting Australia’s coasts and oceans, particularly estuaries and environments near the shore. Estimates are that each year almost 19,000 tonnes of phosphorus and 141,000 tonnes of nitrogen are discharged into rivers flowing to the coast.

6. Of continuing concern for Australia is population growth along the country’s coastline. The formation of massive metropolitan centres with intensive population density on Australia’s coasts could displace much valuable biodiversity and ‘high-value’ agricultural land.
1.3 Are these statements true (T) or false (F) according to the text? Explain your answers using the words in italics in the text in 1.2. Use a dictionary to help you.

1. Deforestation leads to an increase in the level of salt in the soil. _T_ - _salinity of the soil can increase_.
2. The range of organisms in the environment has not been affected by overgrazing. _F_.
3. Overgrazing has gradually worn away fertile soil. _F_.
4. Fish stocks have been able to renew themselves quickly. _F_.
5. In the past, new species of animals and plants wiped out some native Australian species. _T_.
6. Unwanted wild plants have had no effect on the environment. _F_.
7. Parts of rivers near to the mouth have not been affected by intensive agriculture. _F_.
8. Population growth is particularly worrying in inland areas of Australia. _T_.

Vocabulary note

The verb suffix -ify adds the meaning 'make' or 'become' to some adjectives:
- purify (= make pure), simplify (= make simple), solidify (= become solid)

These verbs can be converted into action nouns: purification, simplification, solidification

Some verbs and action nouns which follow a similar pattern are: identify/identification, modify/modification, verify/verification

Brazil's habitats under threat

The ongoing expansion of agriculture in Brazil is seriously threatening rare and vulnerable habitats such as the Amazon. The major threat to some of these vast natural areas is the destructive power of the soya bean. Soya beans are one of Brazil's main crops, with more than 21 million hectares under cultivation. Another crop which is causing concern is cocoa, which has been blamed for the widespread destruction of Brazilian forests. During the boom of the 1970s, the growth in importance of this crop was a leading cause of the decline of Brazil's Atlantic forest ecosystem, of which only about 10% remains. The Cerrado, an woodland savanna ecosystem in Brazil, is threatened by cattle farming. The growth of this business is closely linked to the increase in soya production, which poses serious concerns about the impact of this industry on ecosystems. In the forests of Brazil, some of the world's most diverse ecosystems have been converted to fast-growing plantations, mainly of eucalyptus, a non-native species.

Exam tip

For Reading and Use of English Part 3 tasks, read the whole text quickly first, thinking about what type of words are missing (for example, a noun or adjective). Then think about the exact form of each missing word. For example, if the word is a noun, should it be singular or plural? Think about whether the meaning of the word will add to the sentence as a whole. Does the word need a prefix, a suffix or both to make sense?
Discovery

1.1 Which three of these inventions or discoveries do you think are the most important? Put a (✓).

radio ✓ television ✓ electricity ✓ the telephone ✓
the personal computer ✓ the Internet ✓ nuclear energy ✓ the microchip ✓
the aeroplane ✓ penicillin ✓ birth control ✓ sanitation ✓
the internal combustion engine ✓

1.2 Listen to three people talking about the most important discoveries and inventions. Answer these questions for each speaker.

1 What does each speaker choose?
   Speaker 1 ________________________________
   Speaker 2 ________________________________
   Speaker 3 ________________________________

2 What are the reasons for these choices?

I would love electric cars to work, but they have their problems and the biggest of these is battery technology. Portable electronic gadgets like laptops, mobiles and cameras have long suffered from the limitations of the humble battery. In fact, while the performance of electronics has increased by 10,000% in the past 35 years, battery technology has lagged behind with only a sixfold increase in a century. This imbalance has important implications for the electric car. Many drivers won’t consider replacing their conventional petrol-powered car with an electric model until the differences in price and performance narrow dramatically.
2.3 Choose the correct words to complete the rest of the article from 2.2.

Batteries have to go a lot further before they can catch up with the combustion (1) engine / machine and their limitations are forcing car (2) creators / manufacturers into designing and making electric cars with the same (3) distance / range as vehicles made in 1910. As an example, a typical small family car can travel over 370 miles in mixed driving (4) conditions / circumstances and can easily (5) maintain / retain a speed of 70mph. For an electric car to manage that, its batteries would weigh over 1.5 tonnes and would be similar in size to the car itself. And unlike a (6) container / tank of petrol, a massive battery doesn’t get any lighter with each mile covered.

There are three key problems that will be difficult for manufacturers to (7) overcome / overtake: firstly, their range calculations may be too optimistic: to get a reasonable (8) life / living from batteries they should not be run from full to empty and should be kept at 20–80% of their charge.

Secondly, charging time remains a major (9) obstacle / obstruction. Recharging an electric vehicle battery on a domestic power supply is likely to take around 13 hours.

Finally, with the majority of our electricity likely to come from non-renewable (10) resources / funds in the near future, electric vehicles could actually contribute more CO₂ to the environment than one of today’s high-efficiency diesel (11) models / styles.

I’d like to see electric cars take off but we can’t assume they will. Neither can we assume they will have any impact on carbon (12) discharges / emissions for quite some time.

2.4 Compound nouns can often be used to replace a longer phrase, which may include a preposition. For example, power supply is used instead of supply of power. Make two-word compound nouns from these phrases.

1 emissions of gas  4 manufacturers of motors
2 a tank for petrol  5 resources of oil
3 a car suitable for a family  6 engines using diesel

2.5 Choose the correct phrasal verb with take in these sentences.

1 The mini-disk was a wonderful invention but it never really took off / took up commercially.
2 I hear they’re taking up / taking on a hundred new employees at the aircraft factory.
3 A small IT firm in our town has been taken out / taken over by a large multinational corporation.
4 When I started work in the laboratory, they took me round / took me through all the safety procedures.
5 My brother has decided to take up / take to medicine as a career.
6 The doctor has said I’m okay now, so he’s taken me away / taken me off the tablets.
7 I find it difficult to take up / take in what people are saying when I’m tired.

2.6 Write sentences using each of the take verbs you did not use in 2.5.

1 I’d like to take you up on your offer of help.

Writing Part 2 A letter

Your local council is considering banning all private vehicles from the town centre between the hours of 8.00 am and 6.00 pm on working days. Outside these times and at weekends there will be no restrictions. Write a letter to the editor of your local newspaper expressing an opinion on this issue. You may support or reject the idea. Give reasons for your position and state how this ban might affect you, the local economy and the environment.

Write your letter in 220 – 260 words in an appropriate style. You do not need to include postal addresses.

Exam tip

Before starting to write, think carefully about the purpose of the letter, who the reader will be and what this person will expect to read. Then, with this information in mind, decide how formal the language of your letter needs to be.

Fatimah has a busy life as a lawyer but in her free time she really enjoys hiking. Most weekends she drives out into the countryside and walks for a few hours. She says she likes to forget about work and she doesn't even take a mobile phone with her. In the summer she's going hiking in the Philippines. She's never been there before but the friend she's going with knows the country well.

Presenter: And our next caller is Karen. Karen, what’s your experience of public transport?
Karen: Yes, hello, Gary. Well, I commuted to London for over ten years. I caught the train every morning at 7.15 to get to work for nine o’clock, and I wouldn’t get home until about seven o’clock in the evening. And frankly it was a terrible period of my life, really stressful, mainly because of the unreliability of the train service. I was forever arriving late for work. One day I was travelling home when the train broke down and I eventually got back at midnight. Of course, I had to go to work the next day, so off I went for my 7.15 train. I’d been waiting over an hour when they announced that the train was cancelled. That really was the end for me. I arranged with my employer to work at home and I’ve been working at home happily for the last five years. Of course it meant a big salary cut, but I haven’t regretted it for a moment.

Presenter: Thanks for that, Karen. Can you just stay on the line? I’m hoping we’ve got Liam on the line. Liam, are you there?
Liam: Yes, I’m here, Gary.
Presenter: Great. And what point do you want to make?
Liam: Well, I just wanted to say that my experience is similar to your last caller, although I’m a newcomer to commuting by public transport. I’ve just sold my car and now I go to work by bus. I’d owned a car ever since I left college, but I wanted to do my bit to cut down on pollution. But I have to confess that I’m regretting it already. I’ve arrived late for work twice this week because the bus hasn’t turned up on time. It’s got so bad that I’m now thinking of buying a motorbike. It’ll cause less pollution than a car, and be more reliable than public transport.

Presenter: Well, it sounds like you’re another dissatisfied customer, Liam. But we’ve also got Sahar on the line, and I think she’s more positive. Sahar, are you there?
Sahar: I am, Gary, good afternoon.
Presenter: Hello, Sahar, what do you want to tell us?
Sahar: Well, I’d like to put in a good word for train travel. I’m working at home while our office block is being renovated, and while I’m appreciating being able to get up later than usual, I really miss my daily commute. You get to know the people you travel with every day. I remember one day I dropped my purse while I was getting off the train. Another passenger picked it up, found my address in it, and brought it round to my house later that evening. Another time, I’d been working really hard and went to sleep and missed my station. One of the other passengers was getting off at the next station and she had her car parked there. She woke me up and offered me a lift back to my home. I’d spoken to her only a couple of times before then, but now she’s a really good friend. You meet a lot of nice people, and become a part of the travelling community.

Presenter: Thanks, Sahar. That’s a side of commuting we don’t often hear about. Now, somebody else who sees the good side of train journeys – Luka. Are you there, Luka?
Luka: Yes, indeed. Actually, I’m phoning from the train on my way home from work.
Presenter: And are you having a good journey?
Luka: Yes, it’s been fine. But then I love trains. I’ve enjoyed travelling by train ever since I was young. I admit that it can be frustrating at times. There are delays and cancellations, and there are minor irritations like poor mobile phone reception – I’ve been trying to phone in to your programme for the last half hour, in fact – but I catch the 7.05 at the station near my home every morning, and still find there’s something quite magical about stepping on to the train. And there are clear advantages over driving, apart from the lack of stress. I reckon that over the years I’ve saved a huge amount of money by using public transport. I’ve never really considered buying a car. You can also get a lot of work done. On the train yesterday morning, for example, I’d read a couple of reports and prepared for an important meeting before I even got to work. Admittedly, I’m quite lucky. The train company I travel with have invested a lot of money recently. They’ve bought new trains and have really improved the service.

Karen: Gary …
Presenter: Karen, were you wanting to say something?
Karen: Yes, I just wanted to pick up Luka’s point that travelling by train is less stressful than driving. Public transport can be stressful, too, when trains don’t turn up or are delayed. What’s less stressful is working at home. At eight o’clock I’m usually having a leisurely breakfast when most people are in their cars or on the train. Yesterday, I’d finished all my work by 2.30, so I drove to the local pool for a swim and today I’ve been working hard all day, so now I’ve got time to relax by listening to the radio for a while. Much better than the stress of commuting.

Presenter: You’re very lucky, Karen. We’ve got another caller on the line …

Kelly: You must be really looking forward to going to America. When are you actually leaving?
Jessica: I’m flying on the 15th July. I’m spending a few days sightseeing in New York, and then I arrive in Los Angeles on the 20th. Lectures start on the 27th July.
Kelly: Sounds great. And what about accommodation?
Jessica: Well, first I’m going to stay with Daniel and Susanna, some friends of my parents.
Kelly: You’re not staying with them the whole time you’re there, are you?
Jessica: No, I’ll be looking for my own place. But I’m really pleased they’ll be around. It’ll be good to know I can contact them in case I have any problems. They’re meeting me at the airport, too. Mind you, I haven’t seen them for years. They’ll have forgotten what I look like.
Kelly: And what about the course?
Jessica: It looks really interesting. They sent me a reading list, but of course I haven’t got round to opening any of the books yet. So it’s going to take a long time to catch up. I’ll be studying really hard during the semesters so that I don’t have to do much work in the vacations.
Kelly: And when does the first semester end?
Jessica: The 7th December. Then I’m going to San Francisco for a week. I’ve always wanted to see the Golden Gate Bridge. I’m going to fly up there if it’s not too expensive.
Kelly: Do you know when you’ll be back in Los Angeles?
Jessica: Probably mid-December. So you can come any time after that.
Kelly: I’m so looking forward to it. I’ve always wanted to go to the States. I was going to see my aunt in Seattle a couple of years ago, but I cancelled the trip because she got ill.
Jessica: Will you stop over anywhere on the way out? Maybe New York or Chicago?
Kelly: Fine. And I’ll meet you at the airport, of course. By the time you come I’m sure I’ll have got to know LA really well, so I’ll be able to show you all the sights.
Kelly: Yes, I suppose you will. When I come to see you, you’ll have been living in California for nearly six months.
Jessica: Hard to imagine, isn’t it? After Los Angeles, I thought we could go down to a place called Huntington Beach. If you bring your tent, we’ll camp there for a few days. The weather will still be quite warm, even in the winter.
Kelly: Isn’t it your birthday around then?
Jessica: That’s right. I’ll be 21 on the 2nd January. Kelly: Well, that’ll be a really good way to celebrate.

Presenter: And now on Radio Nation, it’s 8.30 and here’s a summary of the latest news. Air passengers could be hit badly today as cabin crews stay at home in the latest in a series of one-day strikes. The major airlines are warning that up to 100,000 people may experience delays. The managing director of Travel Air, David Wade, had this warning to the unions.
David: I’m sure I don’t need to spell out the chaos being caused in the airline industry as a result of these strikes, and I would like to apologise to all our customers. However, the cabin staff must accept the new working conditions if the airline is to compete, and the management has no choice but to stand firm on this issue.
Presenter: But he didn’t have to wait long for a response. A union spokesperson said: ‘I can’t believe Mr Wade is being so confrontational. We will not be bullied by management. Eventually, the airlines will have to return to the negotiating table.’ ‘Up to 200 teachers and pupils had to be evacuated from Northfield Primary School in South Wales today after a fire broke out in an adjacent building. Although firefighters were able to bring the fire under control fairly quickly, they couldn’t prevent the fire damaging the school’s sports centre. The headteacher said it might be a number of months before the sports centre is back in operation, although the school itself should be able to reopen early next week. The new Borland Bridge, connecting the island to the mainland, was officially opened today by the Transport Minister. However, it’s been in operation for a few weeks already and has received a mixed reception from islanders. From Borland, here’s our reporter, Anna Curtis.
Anna: Yes, the new bridge has stirred up a lot of strong emotion on Borland, and I’m here to gather the views of some of the island’s residents. Excuse me, what do you think of the new bridge?
Resident 1: I think it will be of great benefit to the island. We used to be terribly isolated here because the ferry service was so bad. It’s only a short distance, but the crossing would take over an hour, at least. It could be a very rough journey, too. Many passengers would get seasick during the crossing.

Carmen: It’s certainly true that the bridge is going to have a major impact on the way of life of the people here over the next few years. But whether that will be a positive or negative effect, only time will tell.

Presenter: Following her report on the high levels of obesity among children, the government’s chief health adviser, Professor Carmen Brady, has said that schools have to play a more active role in encouraging children to take up sports. She has also criticised parents.

Resident 2: Is that such a good thing? There are already far too many cars and people. We’ll also get wealthy people from the mainland who can afford second homes. That will push up house prices and islanders won’t be able to buy properties. That can’t be right, surely? There ought to be restrictions on the number of people moving here.

Anna: It’s clearly true that the bridge is going to have a major impact on the way of life of the people here over the next few years. But whether that will be a positive or negative effect, only time will tell.

Interviewer: So, Ben, you’re well known in the climbing world as a bit of a loner. You prefer climbing without other people. Is that true?

Ben: Well, to some extent. I’ve always talked to other climbers, but different things work best for different people. And finally the weather. Well, if you’re in the south of the country, you shouldn’t be troubled by any rain today. It will be warm, sunny and dry, with temperatures up to 22 degrees Celsius. However, in the north you’re likely to see an occasional shower, temperatures up to 22 degrees Celsius. However, in the north you’re likely to see an occasional shower.

Research shows that the optimum time to start music education is between the ages of three and four. As well as improving manual dexterity and concentration, it seems that it may help emotional development, too. And starting young on understanding musical notation lays down an excellent foundation for later on. The instrument that many parents want their children to start learning, and I think three years old is the right time to start.

Woman: Starting early is vital, but less demanding instruments would be my choice, things like the recorder or a half-size guitar. Personally, I don’t think the piano is the best instrument to start with so early. Children have to show the mental, physical and emotional readiness to learn an instrument like the piano, which obviously takes a lot of effort and commitment. In my experience very few children under six are able to take on that kind of challenge.

Man: Well, I think children of that age can learn to play simple tunes on the piano and they soon progress to more complicated pieces if they can read music.

Presenter: Radio Nation news …
Announcer: Extract three.
You hear part of an interview with a restaurant critic called Amanda Downing.

Interviewer: You're such a household name, it must be terrifying for staff when you go into a restaurant. How do they react?
Amanda: It's true that a lot of people know me, at least in the restaurant world, so I always eat with a friend and they'll make the booking. Often, though, I get recognised and when that happens, it's inevitable, I suppose, that they take a bit more care over serving the food and some seem a bit nervous. I've never been given a complimentary meal, though, or anything like that. That would be just too obvious, and of course it could be considered unethical to accept a gift like that.

Interviewer: And what makes a good restaurant?
Amanda: A good restaurant is one where the management and waiting staff have given some thought to why their customers are there. Most restaurant owners believe that the main reason people go to restaurants is for the food, but that's completely wrong. The main reason people go to restaurants is to have a good time, not because they're hungry. So there might be a big difference between the priorities of a restaurant and the priorities of diners. For example, one thing that a restaurant gets judged on is the quality of service. What restaurant owners think is good is service that is efficient, but what customers have as their priority is friendly service.

Police Officer 1: So, how on earth did they manage to get in? There's no sign of a forced entry.

Police Officer 2: Well, it's much too far. Of course, there's always the fire escape around the back of the building. They could have climbed up there reasonably easily, and after that they might have been lowered by rope from the roof if that was the case, people living in the block of flats behind the museum might have seen something, so we need to talk to them.

Police Officer 1: Right, but we needn't interview everyone in the block, just the people who have windows facing the museum. I'll arrange that.

Police Officer 2: If it wasn't a window, the only other possibility is that they went in through the front door. Perhaps they forced the lock, but the door didn't appear to be damaged at all.

Police Officer 1: And the entry code is supposed to be known only by the security guard.

Police Officer 2: So someone else must have opened the door from the inside.

Police Officer 1: Only the security guard was allowed to stay in the museum after it closed. Do you think they somehow persuaded him to let them in? Maybe they just knocked on the front door and he opened it.

Police Officer 2: He surely wouldn't have done something as stupid as that. Do you think he might have been expecting them and that he was part of the gang?

Police Officer 1: I don't know, but we'd better find out all we can about that guard as soon as possible. Now, who was it that raised the alarm?

Police Officer 2: It was the head cleaner, who went into the building early this morning. He must have to know the entry code, too.

Police Officer 1: Yes, maybe. He says the front door was unlocked when he got here. But he claims he didn't see anything else unusual until he got to the fourth floor. But of course, he might be lying.

Police Officer 2: The other puzzling thing is how they took the paintings away. Apparently, they're very big, so the robbers must have had to bring a van around to the front of the building.

Police Officer 1: The driver must have been waiting nearby and drove up when they'd got the paintings. They could have loaded the paintings up very quickly, and might have driven straight to a port or airport. Anyway, the forensic team should have finished examining the building by now. Once they've done that, I think we should go and look around for ourselves …

Interviewer: Right, perhaps you could tell me something about how you got interested in environmental science, and what experience you have in the subject.

Nazim: Well, I've always been fascinated by plants and animals, and then last year a friend of mine, Mike Proctor, invited me to Brazil. He's the head of a project there run by a European charity. The charity's aim is to help groups of villagers set up their own schools and medical centres. They also encourage sustainable agriculture and the setting up of businesses to sell local handicrafts. Anyway, it was during my stay that I really began to understand the impact of climate change. I want to learn more about this and more generally how decision-making on environmental issues in one part of the world can affect the lives of individuals elsewhere.

Interviewer: You say you 'began to understand the impact of climate change'. Could you give me an example of what you saw in Brazil that influenced you?

Nazim: Yes, of course. We've all heard about the destruction of the rainforest, and I was able to see examples of that. But also, people don't realise that the climate in the region is changing, and that the speed of change is frightening. There's been a drought there for a number of months, and river levels are low. I had direct experience of this when I travelled with Mike. Having responsibility for the whole project in the area means that his job involves travelling to some pretty remote areas. Sometimes we had to go by boat to get to some of the villages, and we had to carry the boat because there wasn't enough water in the river.

Interviewer: And is this change affecting the lives of local people?

Nazim: A huge amount. The main problem has been the effect of the drought on food supplies. The majority of people there are farmers, and all of them have lost animals and crops. The charity's project has been a success so far, in that levels of income from the sale of handicrafts have increased. But, of course, financial success isn't everything. It's hard to imagine a future without farming in an area like that.

Interviewer: Your trip to Brazil sounds like an amazing experience. And since you've been back, have you done anything to develop your interest in the area?

Nazim: Yes, I've read a book about energy conservation and how this might slow down climate change. And I was particularly interested in how the Netherlands has begun to tackle the problem. The government has introduced some really interesting projects on energy-saving in cities – the use of low-energy light bulbs to reduce the consumption of lighting energy, better insulation for homes, and things like that. There's also a massive recycling scheme, which is saving an enormous amount of waste. What's needed now, though, is to expand work like this across the world.

Interviewer: And what are your plans for the future? What do you want to do after you've left college?

Nazim: Actually, I'd like to go into politics. We've got, somehow, to persuade governments in developed countries to change their priorities. For example, even if just a small percentage of the money spent on the arms trade could go into tackling climate change, I'm sure we could make a difference.

Interviewer: And you think that as a politician, you'd be able to do this?

Nazim: I'd certainly like to try.

Interviewer: Before we finish, have you got any questions about the course here at the college?

Nazim: I've noticed that statistics is included in the course. I'm a bit concerned about that.

Interviewer: It wouldn't worry about it. You'd be able to get by with a reasonable knowledge of maths.

Nazim: That's very reassuring. I also wanted to ask about the field trip for second-year students.

Interviewer: OK. Second-year students go to Nepal in June, looking at the ecology of mountain environments.

Nazim: That sounds like a fantastic opportunity.

Announcer: Speaker one.

Speaker 1: I took up running a couple of years ago. Until then, I did a bit of sport at school, but I didn't do much outside school at all. In fact, I suppose I didn't have many interests – except playing computer games. Then I went to watch my uncle in a 5k fun run – it was to raise money for charity. I thought the whole event was brilliant and everyone there seemed to be enjoying it. There was another fun run later in the year and I signed up for a laugh. I didn't do any proper training for it, just a bit of jogging around the park after school.
surprisingly, I seem to have fewer injuries now and I used to get back pain occasionally. But – everyone gets aching muscles after a long run, rainy day? Inevitably, you get a few injuries, too. Who would want to go running on a horrible weather's bad I might go all week without a run. I go out running every couple of days, but if the regular all my life. Now that I'm getting older would go out running with them. I think I started – just a pair of running shoes. Few sports where no special equipment's needed running causes major problems if you warm up some risks, but there isn't much evidence that course – I've had a few problems with sore knees and sprained ankles. I suppose all exercise carries a lot of weight. Not all the effects are positive, of that sometimes. But after I've been sitting at my computer all day I can't wait to go out for a run. We certainly both get a lot fitter and I've lost a lot of weight. Not all the effects are positive, of course – I've had a few problems with sore knees and sprained ankles. I suppose all exercise carries some risks, but there isn’t much evidence that running causes major problems if you warm up carefully and have good footwear. It’s one of the few sports where no special equipment’s needed – just a pair of running shoes. I had three older brothers and I think they could all have been Olympic athletes if they’d had the opportunity. So it was quite natural that I would go out running with them. I think I started at about the age of 10, and I’ve been running regularly all my life. Now that I’m getting older I go out running every couple of days, but if the weather’s bad I might go all week without a run. I certainly go out a lot less during the winter. Well, who would want to go running on a horrible rainy day? Inevitably, you get a few injuries, too – everyone gets achings muscles after a long run, and I used to get back pain occasionally. But surprisingly, I seem to have fewer injuries now than when I was younger. Maybe it’s because I run more slowly! Actually, I feel a lot healthier, and I even sleep a little better after I’ve been out running. But I think the best thing for me is the social contact. We’ve got a running club in our village – I moved here when I retired – and before I joined the club I had very few friends who lived nearby. Now, many of my closest friends are the runners in the club. Next spring we’re all going to Madrid to run in a marathon for over 60s only. Of course, we know that not all of us will finish, but you can be sure that every one of us will have a really good time. My aim is to complete the course and do it in less than six hours. But I know it won’t be easy! Earlier this year I fulfilled a lifelong ambition of mine by working for three months as a volunteer in an African country. I’m in my late 50s now and I don’t have the commitments that have previously held me back, like bringing up small children. I’ve worked in marketing for much of my life, and I wanted to use the skills I have to help out in a small way. I applied to do voluntary work a couple of years ago, but it wasn’t until about a year later that a suitable scheme came up and I was asked to go. The reaction of my friends to the news was very interesting. The majority of them told me how impressed they were, and a lot said that given the opportunity they’d like to do something similar – although I must say that some of them were not so keen when I told them later about how basic the conditions were. But a few clearly disapproved of what I was doing. They argued that I was patronising Africans by intervening and telling them how to run their lives. But I saw it rather differently. It’s true that in an ideal world, development schemes should be set up by the communities themselves that they’re going to benefit. But sometimes local people don’t yet have the necessary skills to make them effective, and need some kind of outside, expert support such as international agencies. And that’s where I came in. I was an adviser to a scheme based in a village of about 200 people in Tanzania. It involved building concrete tanks to capture water during the wet season with the aim of reducing the problem of drought during the rest of the year. With better irrigation would come more
reliable crops, so that the villagers wouldn’t be so dependent on international aid. The problems there were getting really serious. There had hardly been any rain in the area for the previous three or four years. The whole region was on the brink of starvation and handouts from charities were the only thing that kept people alive. The scheme had been underway for less than a year when I arrived, and my brief was to suggest ways in which the villagers could market any agricultural production that was surplus to their own requirements – any food that they didn’t need themselves. I’ve heard now that the village is making money from its crops by selling them in other parts of Tanzania and even exporting some produce, and it’s built a primary school and a small health centre. It’s very gratifying to know that the scheme has completely transformed its prospects, and the village is now well on its way to becoming a thriving community.

Interviewer: In the studio today we have the novelist David Bandreth, whose most recent book, A Woman Alone, was published last week. Welcome to the programme, David.

David: Thanks for inviting me.

Interviewer: Now, David, you came relatively late to writing, didn’t you?

David: Well, suppose I’d always been a writer – poems, short stories, and so on – but only my close family had read anything I’d written until I had my first novel published in my early 40s.

Interviewer: And how did you feel about that?

David: Oh, it felt fantastic having my first book published.

Interviewer: At that time you were a primary school teacher in your native Scotland. At what stage did you leave teaching?

David: Until my third novel was published, I was happy to teach during the day and write in the evening and at weekends. But I found that there wasn’t enough time to do both as well as I wanted to, so I left teaching and I started writing professionally.

Interviewer: Some of my close friends thought I was mad to give up my job, and I was greatly relieved that my subsequent books sold quite well.

Interviewer: So, no regrets about leaving teaching?

David: Oh, it was the most difficult decision imaginable! I’d worked at the same school for about 15 years, and I felt bad leaving the children and also some very close colleagues and friends. But I still live near the school and I go back on every possible occasion.

Interviewer: Tell us something about the process of your writing. How carefully do you outline the story at the very beginning?

David: Before I start writing I always know how a book is going to end, although I rarely have a clear idea at the beginning of how the characters will develop. As I write, gradually they grow into real people in my own mind. But sometimes even I’m surprised at how they turn out!

Interviewer: And what about your daily work routine?

David: I suppose I’m fairly disciplined in my writing. I’m generally up at about 7.00 in the morning, and I usually start work by about eight o’clock. I work upstairs – we’ve converted our attic into a study. In the early stages of a new book I’ll often go to the city library in the afternoon to do some research.

Interviewer: You don’t use the Internet?

David: As a rule I prefer finding information from books, and I only turn to the Internet as a last resort.

Interviewer: Let’s go on now to your latest novel, A Woman Alone. I was surprised to find it set in Norway.

David: Yes, I finished my previous book last January. I’d been feeling really tired, and I was aware that I needed rest and a source of fresh ideas. I taught English in Sweden after I left university – and I still speak Swedish quite well – but I hadn’t been to Norway before. There are a lot of historical links between Norway and the north of Scotland, so I decided to spend some weeks there. Some of the geographical settings used in A Woman Alone are based on places I visited while I was travelling around.

Interviewer: And A Woman Alone seems to be more personal than many of your other works.

David: I’d already decided that I wanted to write about a single-parent family. As you may know, my sister and I were brought up by my mother on her own. The mother in the story, Elsa, is very protective of her children, as was my own mother, but although they have certain common characteristics, Elsa is not really modelled on my mother. Elsa is quite a dominant figure and a woman susceptible to periods of depression, whereas my mother was a rather gentle woman and always calm.

Interviewer: And when you’re researching and writing books, do you have time to read other people’s novels?

David: I do, yes. One novelist I greatly admire is Wilhem Boyd. He writes simply, but with great control of language. I’ve just finished his excellent novel, Restless. It’s a quite remarkable story.

Alice: Hi everyone!
Alice: Listen, we need to make a decision about our holiday. If we don’t decide soon, it’ll be too late to get anywhere to stay. It’s got to be Corfu, hasn’t it?
Ryan: I’m not sure how we’ll get there.
Luke: Well, my brother went there last year. He flew to Rome, then took a train to Bari, and then had to get a boat.
Kathy: No, it’s not as difficult as that. We could fly from London to Athens and then take a flight from there to Corfu. It takes about six hours. I’ve had a look on the Internet and it looks like there’s a flight that leaves London at about ten in the morning. But we need to book soon. The longer we leave it, the more expensive it’s going to be.
Ryan: But obviously it would be much easier getting to Athens – there’s lots of flights and we wouldn’t have to change.
Luke: Then what about somewhere to stay? Aren’t hotels supposed to be pretty expensive in Corfu?
Alice: Well, I’ve found three that seem possible. I’ve printed off the details here. They all look pretty good, and they’re right next to the best beach on the island.
Luke: Which one’s cheapest?
Alice: Er … this one here. 60 euros a night for a double room.
Luke: Well, accommodation would be cheaper in Athens, I think. It says in my guidebook that there are reasonable hotel rooms for as little as 40 euros a night. There’s one here recommended. It’s a bit far from the city centre, but it’s on the metro, so it’s easy enough to get into the centre from there.
Kathy: It wouldn’t be as nice as being able to look out over a beach. What worries me is what we’ll do in Athens for a couple of weeks.
Ryan: Look, Athens is one of the oldest cities in the world. There’s lots of museums, and then there’s the Acropolis with the Parthenon.
Kathy: I remember going to Rome with my parents once. We spent the whole time looking at museums and art galleries, and it was the most boring holiday I’ve ever had.

Alice: Yeah, I think it’d be more fun to go to Corfu. I much prefer lying on a beach to walking around art galleries all day. And it would be more peaceful than being in a city. I want to come home more relaxed and healthier … not unhealthier than when I went away!

Kathy: Yes, I’d prefer to go to an island, too, although I don’t want to be on the beach all day. Maybe we could hire a car and explore the island a bit.

Alice: Yeah, we want to see as much as possible, and a car would be the easiest way of getting around. It’s probably not as unspoilt as some of the other Greek islands, but it’s still supposed to be a really beautiful place, so we’ll want to see as much as we can. What about the weather in August? I know we all want to see some sunshine, but isn’t Athens supposed to be incredibly hot in August? I’ve heard that it gets so hot that a lot of people leave the city to find somewhere cooler.

Ryan: No, my friend Mark used to work there as an English teacher, and he reckons the heat is nowhere near as bad as people say. Anyway, isn’t Corfu likely to be as hot as Athens at that time of the year?

Alice: I think you get the breezes off the sea …

Unit 9

Recording 12

First, let me introduce myself. I’m Dr Lynn Jones, and I’ll be taking you for the first five lectures in this course on first-language learning. I’d like to begin today’s session by highlighting some of the main areas that I’ll be covering with you. From the moment they wake up, infants are keen to interact and communicate with others. The interaction may not, of course, be with people. Early morning sounds from a child’s bedroom may be them babbling to themselves, or speech as a child speaks to their toys. I recently bought my two-year-old daughter a cuddly elephant, and it has become the ‘person’ she talks to each morning lying in bed. And as my three-year-old dresses each morning lying in bed. And as my three-year-old dresses herself, she likes to talk to each item of clothing. ‘Red jumper, your turn …’ So the first lecture will be about what I call ‘private’ conversations. Of course, a child’s parents are usually their most important focus of interaction, and in the second session we’ll be exploring the part that parents play in very early communication. The first stage of interactive play might be a child giving a toy to their mother or offering her some food. And even before they can use words, infants employ their faces, bodies and sounds to communicate what they want. A hand outstretched to a toy could mean ‘Give it to me’, or a broken toy handed to a parent with an ‘Aaa’ might mean ‘Mend this for me’. Parents encourage this kind of interaction by, for example, hiding an object behind them and asking ‘Where’s it gone?’. At first, infants point, and then later verbalise a response. The importance of infants listening to adults speaking for the development of their own language cannot be overestimated.

8 Grammar and Vocabulary for Advanced © Cambridge University Press 2015
Many parents play "Follow the instructions\" games with their children when they first become mobile, saying things like \"Go to the toybox and find the car for me\" or \"Fetch me your hat\", although as the parents of older children will know, the novelty for children of following instructions soon wears off! Reading stories for young children is a similarly important part of the process of listening and understanding. But even when children are not being actively encouraged to listen, they will be seeking to make sense of the language they hear. When children appear to be busying themselves with their toys, or applying themselves to painting a picture, they will be absorbing the speech they hear around them and often copying what they hear in their own speech. So the third area we\'ll be looking at is the relationship between listening and the development of speech. Interactions between infants will often copy parental speech and behaviour. Two small children at a nursery school might hug each other when they meet each morning, because that\'s what parents do to the children when they are collected from school. Most parents at some time hear their child say something and ask themselves the question: \"Did they copy that from us?\\" Of course, it is very difficult to assess exactly the extent of parental influence. Take, for example, the area of conflict. It is not uncommon to see in a nursery school two small children playing with each other peacefully one moment, but they might be hitting each other the next. If their language is more developed, they might each blame the other for a broken toy or a spilled drink. While these would be uncharacteristic of normal adult interaction, perhaps the conflicts between parents witnessed by small children somehow are mimicked in these arguments. A fourth area, then, will be the extent to which patterns of communication are copied. A final subject I will examine during the course is that of problems in language acquisition. We might consider first-language learning natural, a normal process that everyone goes through, and Dr Jackman will be describing this process in detail in later talks. However, a significant number of children either acquire language more slowly than the usual rate, or never reach an average level of language proficiency. This topic will obviously be of particular importance to those of you who are going on to work with children with learning difficulties, or as speech therapists. So, first of all then, let\'s look at the private conversations that infants engage in …
came in 1901, when Marconi announced that he had received a transmission from across the Atlantic. The old photograph that you can see ahead of you shows Marconi at Signal Hill in St. John’s, Newfoundland, where this first transmission was received. Soon after, Marconi opened a ‘wireless telegraph’ factory in England, which employed around 50 people. There are just a few of the ‘wireless telegraphs’ that the factory produced left in the world, an example of which you can see in Case 2. These early radio systems could only be used for Morse code, in which each letter of the alphabet is represented by a combination of dots and dashes. Radio waves could not carry speech until a method had been developed whereby the low-frequency waves produced in a microphone could be combined with high-frequency radio waves. The invention that made this possible was the vacuum tube or thermionic valve. You can see examples of these in Case 3. In several countries, radios became the main means of communication during the 1930s and 1940s. The next photograph shows a family gathered around the radio in the mid-1930s. Radio entertainers, many of whom became household names, were highly paid. In Britain, the popularity of radio increased until 1952, by which time four out of five households owned one. You can probably guess the reason why radio began to lose some of its popularity in the early 1950s – competition from television. Move now to Room 36, where you can find information and displays about the early days of television.

Recording 14

The story of radio probably begins with Heinrich Hertz, who was the first to produce radio waves in a laboratory. He devised an experiment in which a spark jumped across a gap in a metal ring when a sparking coil was held a few metres away. The model that you can see in Case 1 shows how this works. For most people, however, it is the Italian Guglielmo Marconi whose name is mainly associated with the development of radio. Before Marconi’s breakthrough, it was possible only to send electrical messages, or ‘telegraphs’, along fixed wires. This obviously greatly restricted the places to which telegraphs could be sent. Marconi’s goal was to find a system where telegraphic messages could be transmitted without the need for the connecting wires that were used in the electric telegraph. For some time he was only able to transmit signals over a few hundred metres, and there were many people who doubted Marconi would ever succeed. The first public demonstration of the power of radio came in 1901, when Marconi announced that he had received...
photographic studio. It was easy to find a photographer wanting to take on an assistant for no pay. For a couple of years I lived at home with my parents, who supported me financially. And I was very lucky that the photographer who took me on taught me a lot. She was really the first person to encourage me to take up food photography. She always let me help out with ‘food shoots’ – wedding cakes, publicity photos for local restaurants, and so on. Then, when I was 18, there was a major photography competition being held in London and one of the categories was ‘Celebrations’. So I entered a portfolio of photographs – just for the experience, I thought. By that time I was getting quite into it.

Interviewer: And you won.

Helena: That’s right. At that time, I was the youngest person in the competition to win any of the major categories.

Interviewer: Now, it’s sometimes said that photographing food is the most difficult job for a professional photographer. Is that really true?

Helena: It can certainly be very difficult to make it look appetising. Food photography is all done in studios, and the biggest problem is the heat produced by the lights. It can take a very long time to get everything exactly right for a shot, and by that time a chef’s carefully prepared salad might look limp or a cream cake becomes a mound of wet sponge.

Interviewer: So how do you get round that?

Helena: Well, firstly, the food in photographs used to illustrate cookbooks and magazine articles isn’t always entirely authentic.

Interviewer: You mean it’s made of plastic?

Helena: Well, some of it, perhaps, but not all of it! If great food could be copied in plastic, I’d be out of a job! We have a number of techniques to help us out. First, a lot of the items in the photographs can be set up early – glasses, cutlery, flowers, perhaps. And then we put in some material to substitute for the food – something with the same size, shape and colour. Often we just make this quickly in the studio from cardboard or any other material available, and paint it.

Interviewer: Personally, I prefer food not made of cardboard!

Helena: Don’t we all! In the meantime, a food stylist prepares the food to be photographed.

Interviewer: A food stylist?

Helena: Oh, yes, most professional food photographers employ a food stylist nowadays. As soon as I’m satisfied with the setting, lighting, and so on, we take out the artificial food and put in the real thing. But the food starts to dry out very quickly. So I generally have with me a spray bottle containing glycerine mixed with water. Glycerine’s a liquid, completely colourless, that’s often used to sweeten food. It’s great for keeping food looking shiny and moist. Another difficulty is that food is sometimes meant to be hot and steaming, but of course by the time we photograph it, it’s completely cold. The only thing to do in that case is to create steam from elsewhere. We use cotton wool balls soaked in water and then put in a microwave. These steam nicely for a couple of minutes, and we position them so that it looks like it’s the food steaming. Something else I wouldn’t be without is a small blowtorch.

Interviewer: What do you use that for?

Helena: Hundreds of things – quickly melting butter over vegetables, browning toast … A technique that might be used in photographing meat is to take a piece of, say, chicken, use the blowtorch for a while so that it’s nicely golden brown, and then spray some glycerine on the outside to make it look moist. It looks great in the photo, but it might be raw on the inside.

Interviewer: Helena, it’s been fascinating talking to you. Thank you so much for coming into the studio.

Helena: My pleasure.

Researcher: Thanks to both of you for filling in the questionnaire about your diet, and for agreeing to discuss the issues that it raised. First of all, Maria, could you describe your eating habits on a typical day?

Maria: Well, on a typical working day I usually start with a piece of toast and a glass of orange juice. For lunch I generally have a sandwich and a packet of crisps as I’m sitting at my desk. When I get home late I take a ready meal out of the freezer and put it in the microwave. Curries are really good, or something with noodles.

Researcher: And what about you, Stefan?

Stefan: I’m pretty much the same, actually, although at the weekend I like to make something myself so as not to eat processed food all the time. I’ll usually go out to eat, seeing that none of us like cooking.

Researcher: OK. Can you tell me how your diet now is different from when you were younger – say, when you were a teenager?

Maria: Well, when I was younger, my mother used to

Stefan: That I'd learn about diet and nutrition. Also, I talked to me about the food she made, so that I'd learn about diet and nutrition.

Researcher: Maria?

Maria: Right. Stefan?

Stefan: Yes, I suppose because it's so easy to buy ready meals from the supermarket, it makes me quite lazy about cooking, and in that way my diet isn't so good. But in some ways, it's better now, though. If I get hungry, I'll eat some fruit, whereas at school I'll buy a bar of chocolate. I remember once, I was eating some sweets in my bedroom when my mother walked in. I got a long lecture through illness or are attacked by other animals.

Researcher: Liam?

Liam: That's true, of course. In the wild, animals die through illness or are attacked by other animals.

Researcher: Nadia?

Nadia: Yes, I think that's true, in that I ate more regularly then and had a more balanced diet.

Researcher: Stefan?

Stefan: OK, so what are the main problems you see in your present diet, and what would you most like to change?

Marie: Well, for me, I think the biggest problem is breakfast. I don't eat much for breakfast because I'm always in a rush. I know that's not good for me, and I'd like to have something more substantial before I leave home in the morning. But I have to get out by 7.30 in order to catch my bus, so I really don't have time.

Researcher: Marie?

Marie: My biggest problem is that I tend to snack a lot. When I've had one of those ready meals, I feel hungry by the time I go to bed. So sometimes I get up in the night and have a snack, although I know it's bad for me. I must be eating too much because I've been getting a bit overweight recently. And as I put on weight, it gets more and more difficult to exercise. I was absolutely exhausted when I had to run for the bus yesterday.

Researcher: Maria?

Maria: Thanks. And what's preventing you from making the changes that you'd like to make in your diet? I suppose time is the big problem. Although I'd like to eat more fresh food, I don't have time to prepare meals in the evenings. And I don't have the opportunity to go shopping while I'm working.

Stefan: Well, my problem is that I'm not a very good cook. I actually read a lot about food and health, and what I should be eating. But it's very hard to put a healthy diet into practice despite the fact that I know all about the theory. And most recipes in magazines are no use to me because of the time they take. It would be really helpful to …
Presenter: Mariam Khan. Can I bring you in here? You were disappointed that Twyford was to be a zoo and not a safari park.

Mariam: Yes, I certainly was. First of all, I agree with Nadia that it's inhumane to keep animals in the conditions you find in most zoos. Safari parks offer all the educational experience of zoos — the close contact with animals — but they also allow animals to roam free in large enclosures. Safari parks are also very active in captive-breeding programmes, of course.

Liam: I'm all in favour of safari parks, provided that the animals are well looked after. Unfortunately, that hasn't always been the case in the past. But they can never replace zoos. They're places where large animals, mainly from Africa — giraffes, elephants, lions, and so on — roam free. But you can't have small animals roaming around — if they're not eaten by the larger animals first, they'll be killed by visitors' cars.

Nadia: If I could just get a word in here … Save the Animals believes that safari parks are not an acceptable substitute for zoos. Even though they say they are concerned about the welfare of animals, just like zoos, they are still businesses mainly out to make a profit. Entertaining visitors is the priority, not the welfare of animals. Our view is that wild animals should be protected in their natural habitat. There are many successful reserves in Africa, for example, where wild animals roam peacefully.

Mariam: But all that costs huge amounts of money that can only be provided by rich tourists who come to see the animals. Most families can't afford to take trips like that to see them. Safari parks allow city-dwelling children from all levels of society access to …

Nadia: But animal welfare is more important! In reserves, animals can be monitored and treated for illness and they can be protected from poachers. And they have as much space as they need to live their lives freely. So long as developed countries put money into these reserves, species will be preserved.

Liam: I'm sorry, but that's unrealistic.

Presenter: Well, I'm afraid that's all we have time for tonight. Mariam Khan, Nadia Muller, Liam Borg, thank you.

Linda: Have you seen Sam’s article for this week?
Bob: No, not yet. He’d got as far as Naples last week, hadn’t he? Go on, read it out.
Linda: Right. He’s called it ‘Rest and rats: from Naples to Amalfi’. ‘When I last wrote, I was just north of Naples. I was tired, had big blisters on my feet, and, having fallen over a number of times, I was feeling thoroughly miserable. Now, a week later, I’m sitting in a restaurant looking out over the Mediterranean, watching the sun go down—and life has improved greatly.
Bob: That’s a bit better! To hear him grumbling last week, you’d think he was about to get on the next flight home! That’s a bit better! To hear him grumbling last week, you’d think he was about to get on the next flight home!
Linda: He sounds in good form now. Listen to this. ‘I had no idea where I was heading when I walked into Naples. Exhausted by a difficult few days, I was only interested in finding a bed for the night. Not wanting to carry my backpack any further than I needed to, I went to the first hotel I came across. But I struck lucky! I’d found a small, friendly hotel. In fact, the welcome I got at the hotel made me decide to stay for a couple of days. While in Naples, I did what all visitors do—I took a tour to Vesuvius and Pompeii. Fascinating places, and it was so good to sit on a coach and give my feet a rest.’ You’ve been there, haven’t you?
Bob: Yes, I went a couple of years ago. Pompeii is amazing. I don’t imagine he rested his feet that much, though—it’s such a big place to walk around. What else does he say?
Linda: Let’s see… ‘But after a couple of days of rest and relaxation, I was ready to get back on the trail. Before leaving Naples, I bought yet more walking socks and a new pair of boots. These are not just any old boots, though. Made from the softest leather imaginable, they are as comfortable as a pair of slippers. He must be really pleased. He was getting so many blisters with the old pair. ‘Having left the sprawl of the city behind me, I walked up into the hills to avoid the long trek around the coast. There’s spectacular scenery up there and beautiful views to the sea. On the downside, though, the hills are covered in thorny bushes, and the whole area is very rocky. At times it was difficult to follow the paths as they’re not well marked, and I often had to retrace my steps. I also had a few unpleasant encounters with the local wildlife. Walking into one village I was met by a pack of unfriendly dogs. Snarling aggressively, the dogs were pretty terrifying at first. But I found that if I ignored them, they soon lost interest in me. I met some smaller wildlife, too. The first night on the hills, I pitched my tent, and was ready to sleep. But opening up my sleeping bag, I discovered a scorpion.’
Bob: You’re kidding! Aren’t they dangerous?
Linda: Well, Sam obviously wasn’t sure. ‘I’m no expert on scorpions, and I didn’t know if this one was poisonous. I shook it out of my sleeping bag well away from the tent, and made sure it was heading off in the opposite direction before I settled down for the night!’ But then, around two in the morning, having been woken up by a scratching sound, I found a large rat trying to get into my backpack. Fortunately, it ran off when I threw my boots at it. What with sleeping so badly, and a long and difficult walk along some treacherous paths down from the hills, it was quite a relief to get to Amalfi this afternoon. I’m now ready for dinner—’ I’ve been recommended the local speciality of lasagne with ricotta cheese—and a few more miles of walking tomorrow towards Ravello. This time, though, it will be along the coast and (I hope) scorpion and rat free! Another report next week.’
Bob: Well, it sounds like he’s enjoying Amalfi, anyway. He hasn’t got much further to go, has he?
Linda: No, probably another two or three weeks and he’ll be back with us.

I think there's a lot of other good things about having your parents teach you, besides saving money: You've got to book driving lessons in advance, but you can go out with your parents whenever it suits you. And you can spend a lot more time practise, as well. For example, my mum used to come and collect me from college in the car and I'd drive home. What's more, she'd let me drive when we went shopping. My mum was a great teacher. Even though she doesn't have a professional qualification or anything, she's got lots of experience to pass on. I was lucky, though, because she knew a deserted airfield near to where we live, and for the first few lessons Mum took me there to practise. She wouldn't let me drive on busy roads before I could control the car reasonably well. And as long as I didn't do anything stupid, she stayed pretty calm. Of course, one disadvantage of learning with your parents is that you have to pay a lot to insure the car. But apart from that, I think it's much better.
Actually, Sue reckoned the expansion would damage the airport. They said that the expansion would cause around 2,000 jobs directly – people employed at the airport. They also said that it might increase tourism in the region. I wasn’t so sure about this. I asked how it would boost tourism, and they said that tourism because people wouldn’t want to go on holiday anywhere near an airport. They said that a growing number of people in the local area supported the expansion, particularly local business.

Magnus: But what about the noise?

Leyla: Mr Kelly said the airport had carried out trial flights last month and no complaints had been received. They said they would keep people informed about future developments. They promised to keep us updated about the plans in detail. They also announced that there would be a public enquiry before any final decision is taken.

Minister: I’m worried about the nuclear power station on the coast. Won’t planes fly directly over it? And if ever a plane crashed into it, it would be a disaster!

Leyla: They said that the flight paths they’re proposing would keep planes away from the power station. Mind you, when Sue gave her presentation she warned us that the airport authorities were not telling the truth. She obviously doesn’t trust them, and demanded that we be shown the details of the flight paths. She wanted to know why they should believe them when they had denied for years that flight paths existed at all.

Minister: They avoided replying to our complaints. I’ve volunteered to write to her. And we suggested inviting the Minister for Transport to hear about the proposal and she advised us to write to her about this. Someone asked Sue what we should do to protest about the proposal and she advised us to write to our local politicians with our objections and she also suggested inviting the Minister for Transport to hear about the proposal. I’ve volunteered to write to her. And I’m going to go and have a look at the plans in detail. Do you want to come with me?

Leyla: Yes, I’d be interesting to see …

You will hear five short extracts in which people are talking about moving from the countryside to the city. Look at Task 1. For questions 1–5, choose from the list (A–H) the reason each speaker gives for leaving the countryside. Look at Task 2. For questions 6–10, choose from the list (A–H) what each speaker says about their experience of living in the city. While you listen you must complete both tasks.
Speaker one.

I grew up in a village and went to school by bus in a small town just a few miles away. Then after school I got part-time jobs, doing seasonal farming work and stacking shelves in local shops, but nothing permanent. There just weren't many employment opportunities around. So a few years back I decided to move into the city. It was a big upheaval – you know, leaving family and friends. But it was pretty straightforward to get a job and it was reassuring to find how sociable people are. I've met a lot of people with similar interests. I'm out most nights with someone or other. I think everyone should try city life, even if it's only for a short time.

Speaker two.

My parents moved out of the city while I was away at university. Then when I finished my course, I went to stay with them. I set up an online business, so it didn't matter where I lived. The countryside was great, but it was a long trek to get to the nearest town to see a film or go to the theatre. So after a year or so I moved here into the city, where things like that are easy to get to. I'm not really into cooking, so I go out a couple of nights a week to a restaurant or pick up something from a fast-food place. It's great that there's a huge range of food on offer.

Speaker three.

What's surprised me most about living in the city is the incredible variety of nationalities that you see around you. It's mind-blowing, all the shops and cultural activities of all the different ethnic groups. Certainly a big change from where I was before. For most of my life I lived in the same small town – not much more than a village, really – that I was born in. I was very happy there. I worked in a timber business that my father ran. But by the time I was in my mid-20s most of my close friends – the people I'd grown up with – had gone away to the capital or one of the other big cities, so I decided it was time for me to move on, too.

Speaker four.

I lived in a village close to the sea for about ten years. I loved being able to walk along the beach. But what drove me away was the difficulty of finding good accommodation. There were plenty of places to buy or rent, but most were old, cold and damp. I had to come to the city to find something decent within my price range. Admittedly, I have to live a long way out of the centre and commute, but it's great that the buses and trains are frequent and reliable. That's certainly one of the bonuses of living in a built-up area. I miss the peace and quiet, of course, but I think my quality of life is better.

Speaker five.

My old place was a few kilometres from the nearest town. I don't drive so I was dependent on the local bus service, which was useless. You could never guarantee it would be on time, and sometimes it didn't turn up at all. I'm not as young as I was, so a couple of years ago I moved into the city. It hasn't all been plain-sailing – it's taken me a while to get used to the crowds and traffic. But at least it's reassuring to know that if I have an accident or I'm suddenly taken ill, there are excellent medical facilities not far away. And I still go back and see friends where I used to live every few weeks.

Alison: Are you still using the computer?
Ben: I won't be long. I was just looking at some of these adventure holidays in Australia. You've been to Australia, haven't you? Who did you go with?
Alison: A company called TransWorld Adventures.
Ben: Oh, that's who I was thinking of going with! They do diving holidays in quite a few places – Perth, Brisbane, Sydney ...
Alison: I went for the one based in Brisbane. It was a fantastic experience.
Ben: The website's a bit short on detail, though. What happened when you got there? Who met you at the airport?
Alison: One of the local organisers did. And then he drove me to a diving school just outside the city, where I met the others in the group. We had a week there learning to dive, and then we went to the Gold Coast where we had a week of sailing.
Ben: Do they provide all the equipment? It doesn't say much about that on the website.
Alison: They should do. They certainly did for us – all the air tanks, weights and things that you need – although it's useful to have your own face mask and snorkel.
Ben: I'm a bit concerned about the diving. I'm not really a very good swimmer.
Alison: No, neither am I. But you don't have to be. That's the great thing about diving – you don't actually have to be a strong swimmer. What else were you thinking of doing?
Ben: Well, sailing would be great, but I've never sailed a boat before.
Alison: That doesn't matter. Nor had I, but it's really not that difficult, and the instructors are brilliant. And anyway, it doesn't matter if you fall in. The water's warm, and they give you life jackets to wear.

Ben: You think I'd enjoy it, then?

Alison: Oh, I'm sure you would.

Ben: So have you got any good tips?

Alison: Well, make sure you take a sun hat. It's easy to get burned. And take a couple of pairs of old trainers – preferably plastic ones because they get really wet on the boats. I took leather trainers that fell apart, and I had to buy new ones while I was out there. I suppose the other thing is that I didn't realise what hard work sailing is. By the end of the holiday I was exhausted, but very fit!

Ben: Yes, I need to get into better shape. I was also thinking about spending an extra week in Tasmania going river rafting. That's probably hard work, too.

Alison: Sounds great, but I don't think TransWorld Adventures do that, do they?

Ben: Yeah, it mentions it here on their website.

Alison: Let's see ... So it does. That's new!

Ben: It looks amazing. You travel down the Franklin River in a rubber dinghy and then camp by the river at night.

Alison: Wow! Well, if you're going camping, don't forget to take a really good insect repellent. You'll certainly need some. Tea tree oil works very well.

Ben: That doesn't matter. Nor had I, but it's really not that difficult, and the instructors are brilliant. And anyway, it doesn't matter if you fall in. The water's warm, and they give you life jackets to wear.

Alison: I don't imagine so. Usually they provide that sort of stuff. But why not contact them and ask them for more information?

Ben: Yeah, maybe I'll email them now.

Alison: But why not contact them to get a map of their premises? That was really helpful.

Ben: Yes, it's available, one vegetarian. We try to introduce a wide range of styles of cooking. Naturally, at first, students were a little dubious about the food. Most had only eaten what you might call 'traditional' British food, so I think it was quite adventurous for them to try what they saw as unusual. The kinds of foods they normally wouldn't have the opportunity to eat at home, or wouldn't want to.

Interviewer: And rather than having a typical school canteen with individual students lining up to collect food from the kitchen, you have a different arrangement.

David: Yes, we have our restaurant system. We get everybody seated at about 12.30 on tables of six and then one student from each table collects the food from the kitchen and serves it to the others. It's slow, but we deliberately encourage students to sit and talk around the table, including about the food they're eating. There's still some resistance to this, particularly as a lot of our students come from homes where fast food and ready meals are what's normally eaten, and family members eat at different times. They don't have the habits of conversation over a meal or discussions about food. But we see this as part of our mission, to give them basic social skills so they can operate in an adult world.

Interviewer: And what about staff here? What's their part in this?

David: Staff are expected to eat in the restaurant and sit with students, but they're not there to control things. They're there to talk to students about the food they're eating and in this way they learn about nutrition and how important it is to get the right amounts, and that having too much carbohydrate or fat isn't a good thing. Of course, it's not all food talk. An unexpected benefit is that the teachers learn more about students outside the classroom. At first there were grumbles from teachers about being forced to eat with students rather than sitting with other members of staff, but now I think they prefer to.

Interviewer: You always try to cook with fresh ingredients. And you always try to cook with fresh ingredients.

David: Yes, that's right. Although we offer international dishes, both for nutritional reasons and because of environmental concerns, pretty much all of the produce we use is locally sourced. We've also got a small herb garden behind the science block. Students can help with this if they're willing to. So as well as having fresh food, we're reducing the environmental problems associated with transporting food over long distances. We put up a map in the restaurant to show where food has...
come from. It’s not always possible to get local produce, of course, but we do what we can.

Interviewer: Now what about you personally, David? How did you come to take on the post of school chef here?

David: Well, I’ve had a varied career: I’ve been a waiter and a chef in a London restaurant, I’ve run two small companies, and I went on to train as a teacher. I taught domestic science in a secondary school for ten years before taking on this job. I’ve found that probably the most important part of the job is to listen to what the students say about the food. I spend a lot of time in the restaurant. I go and talk to the students. They’ll always give me an honest opinion on whether or not they’ve enjoyed something. The time I spent in management has helped me most with this. You need to listen to what people are saying to get the best out of them and make the right decisions.

Interviewer: And do you think the approach to food you’ve taken here could be adopted in any school?

David: No, I don’t think all schools would be able to. We’re lucky in that we’re a new school and we set it up with the ethos that learning about healthy eating is an important life skill, and students and their parents accept that, although sometimes rather unwillingly. It could be difficult to introduce this into an established school where, for example, chips and burgers are a regular feature of school dinners. Introducing a radical change when students are used to doing things in a certain way can be difficult. But any school could take some steps to make students aware of the importance of healthy eating. I’d certainly advise them to. Over time, I think we’ll see most schools moving in this direction.

Announcer: Now listen to Part 3 again.

The final presentation to be made tonight is an award for Lifetime Service to Music Education, and I’m delighted to say that this goes to … Maria Adams. Before I ask Maria to come up and accept the award, I’d just like to say a few words about her. All of you will know of her achievements, first as a highly successful violinist, and then as conductor of the York City Orchestra, but fewer of you will know about her contribution to music education in this country and beyond. It was in the mid-1990s that we first met. She had been conductor of the YCO for about a year, and I was head of education on York city council. For some time Maria had been writing to me, saying that the council should do more to help children’s musical development in the city, particularly for those who came from poorer backgrounds. What she was suggesting was that members of the YCO would volunteer their services, either individually or in groups, to go into schools and play for children and run music workshops. In exchange, she wanted the city council to lend instruments to children and provide free music lessons for children whose parents weren’t able to afford them. This was at a time when the government had cut funding for music lessons. Eventually, I invited her to talk to the committee, so along she came to present her proposal. What she did next was convince us of the value of a musical education. Making music she sees as a fundamental part of a child’s development, as essential as an ability to read or write. What impressed us most was the way she calmly and clearly argued her case. By the end of the meeting, all of us had been won over by Maria’s arguments and the Music in Schools project was born. Somehow we found the money to support it! Rarely have I met anyone with such passion for their beliefs. And thanks to Maria’s enthusiasm, the project has been a tremendous success. Not only has she persuaded YCO members to give up their time willingly, but she has also encouraged visiting musicians to give free concerts in schools when they came to play in the city. Well, ‘encourage’ perhaps isn’t the right word – she’s a very persuasive person! A number of times, the council has tried to make changes to the Music in Schools project in order to save money. When this has happened, Maria has demonstrated that she is a determined and persuasive character. Five years ago, for example, there were plans to start charging all children for music lessons, but this she resisted. Only after Maria threatened to withdraw her support from the project did the council back down. Maria’s dream was always to extend her work beyond this city, and with typical energy she set about persuading the government to adopt the project throughout the country. What’s happened as a consequence is that music has become established as an important part of the national curriculum. I think it’s fair to say that, had Maria not been around, music education in most schools in this country would have practically disappeared. Instead, so successful has it been, that those involved in music education around the world have visited the city to see the project in action. And then came an invitation to be a special adviser to the government on music education. In this role, she has worked closely with the Minister for the Arts. Were he here tonight, I know that he would want to express his thanks personally to Maria. And as a further acknowledgement of her enormous service to music education, we’d like to present her with this lifetime achievement award. Maria Adams, if you’d like to come up onto the stage … .
Lake Taal lies in the huge crater of the Taal volcano. In the middle of the lake is a smaller volcano which has been showing signs of increased activity over the last few weeks. Taal is one of the most active volcanoes in the world. In 1911 an eruption claimed over a thousand lives and in 1965, villages on the lakeshore were devastated by falling rocks and huge waves on the lake. Although scientists predicted the 1965 eruption, the authorities failed to warn villagers and the breakdown in communication cost at least a hundred lives. After the disaster of 1965, the government introduced the Taal Emergency Strategy. This involved monitoring the volcano for early signs of an eruption and the drawing up of an evacuation plan. Since that time, however, there has been an increase in the number of people living close to the lake, and the government has also encouraged the industrial development of the area. The building of two power stations just a few kilometres away was strongly criticised by environmentalists. In the event of an eruption, these would have to be shut down, possibly for a long period if damage occurs. The closure of the power stations would leave thousands of homes and businesses without electricity. Last month, scientists noticed a sudden rise in the temperature of the lake. There was also a dramatic rise in the level of radon gas in the soil. Their concerns increased with the discovery of thousands of dead fish, apparently killed by acidic volcanic gases rising from the bed of the lake. As a result, they gave a warning that Taal could erupt again at any moment. The authorities took immediate action. The President put government authorities on a state of high alert, saying that the danger of the situation made it necessary to bring in the army to oversee operations. The decision was made to evacuate an area of five kilometres around the entire lake, and two days ago the evacuation of around 30,000 people began. The provision of temporary shelter in a safe location for those displaced is the army’s top priority, and it is now estimated that about 25,000 evacuees have arrived at makeshift camps. Conditions in the camps are reasonably comfortable, and there are adequate supplies of food and water. But no one knows how long they will be away from their homes – or, indeed, if Taal erupts again, whether they will have homes to go back to. All they can do is watch and wait for nature to take its course … Katie Hill in the Philippines.
Mother: But you’re not likely to be able to afford a car for ages … It struck me that the Canley apartment might be quite noisy with that busy road nearby.

Liz: But it’s in such a great location. There’s a lot of open space at the back of the block. It’ll be great in summer. And there’s that lovely little river that runs nearby.

Father: Yes, but I wonder whether it floods in heavy rain? I’ve heard there have been problems in the past …

Mother: It’s a pity that the Canley apartment is so small. There wasn’t much space in the bathroom, was there? Nowhere to store towels and things. And did you notice that in one of the bedrooms there was just a bed, a small wardrobe and some bookshelves? You couldn’t even fit a chest of drawers in there.

Father: The kitchen was quite small, too.

Liz: I must admit the town apartment is a bit bigger, but the rooms in it are quite dark and that made it feel cramped. I really like the light in the Canley apartment.

Father: Another thing to consider is whether the apartment is going to be a good investment.

Mother: Yes, they say that the cost of property in the town centre is going to go up with more people wanting to move in. Apparently, there are plans to build new apartments not far from the one we looked at.

Liz: Maybe, although the agent’s advertisement for the Canley apartment says, ‘There is expected to be a lot of interest in the property’. 

Mother: Oh, I’m sure it’s just a way of encouraging people to buy quickly. But take your time to think about it, there’s no hurry to decide.

Liz: You really want me to take the town apartment, don’t you?

Father: Well, it’s obviously your decision, but there are so many advantages of living in town …

Mother: Yes, and it would be so much easier for us to come and visit you there …

Osman: Osman Seville.

Sofia: Oh, hi, Osman, it’s Sofia. Look, I’m really sorry, but I’ve messed up our plans for tomorrow.

Osman: Oh, no. What’s happened?

Sofia: Something’s come up at work. Well, to be honest, it’s a really important meeting. I’m so silly! I arranged it weeks ago and I forgot to put it in my diary. It means I’ve got to spend a couple of days in Marseille and I’ll be heading off there early tomorrow morning.

Osman: Right.

Sofia: So I won’t be able to pick you up at the airport after all. I tried to reschedule the meeting for next week, but it’s just impossible. I’m really, really sorry about this.

Osman: No, don’t worry. I’m sure I’ll be able to get to your place somehow.

Sofia: Well, it means that you’ll have to get to Perpignan from Montpellier airport on your own, and I’m afraid it’s a bit complicated. You’ve got to get to Montpellier railway station and then catch a train to Perpignan. If you’ve got a pen handy, you might want to take down some of the information I’m going to give to you.

Osman: OK, just a second … Right, go ahead.

Sofia: OK, now, I know that you get to Montpellier airport at eight in the evening.

Osman: Ten past eight, that’s right.

Sofia: I’ve found out the train times from the SNCF website and it appears that the last one from Montpellier to Perpignan is at ten minutes to ten. You really need to catch that train or an earlier one, so the first step is to get from the airport to the railway station in the centre of Montpellier. I know you’re on a tight budget, so you could get the bus instead of a taxi, but to be honest I’d advise you against catching the bus. It can be quite unreliable and it will only take you as far as the main square, and then it’s a bit of a walk to the railway station from there. For the sake of a few euros, it’s worth taking a taxi right to the station.

Osman: Right. OK, I’ll do that.

Sofia: You’ll need to buy a ticket before you get on the train. I think it costs about 25 euros. The last train’s due to get in at about 11.30. Because I won’t be in Perpignan, I’ve booked you into a hotel not far from the station.

Osman: That’s great. Thanks!

Sofia: It’s called Le Metropole. I haven’t stayed there myself, but one of my friends recommended it to me.

Osman: Le Metropole. Right … That sounds good. Thanks.

Sofia: Now, depending on the weather you could either take a taxi there or walk from the station. Actually, it’s probably best to walk, as it’s really not far. Don’t worry about getting lost – everyone knows Le Metropole and will be able to give you directions, and there’ll still be plenty of people around at that time of night.

Osman: OK, that’s fine.

Sofia: It’ll be quite late when you arrive, so when you’ve checked into the hotel, I suggest you get a meal there. The hotel restaurant is very good and they’ll still be serving food at that time. And have whatever you like – I’m paying for your room and the meal.

Osman: No! You don’t need to do that.

Sofia: Yes, I want to. It’s the least I can do. I’ll sort out the bill when I pick you up on Thursday afternoon.

Osman: Well, I’ll buy you a meal later in the holiday.

Sofia: All right, then. I’ll take you up on that.

Osman: Fine.

Sofia: Relax on Thursday morning and walk around town.
Perpignan’s a lovely place. While you’re strolling around, look out for Café Mathis. You might want to try their hot chocolate. It’s the best in town. I should be with you at about two and I’ll meet you in the foyer at Le Metropole.

Osman: Sounds wonderful. Thanks for organising that. I’m looking forward to seeing you.

Sofia: OK, Osman. And I’m really sorry again. Hope the journey goes well, and I’ll see you on Thursday.

Osman: Great. See you then. Bye, Sofia.

**Announcer:** Exam practice, Listening Part 1.

You will hear three different extracts. For questions 1–6, choose the answer (A, B or C) which fits best according to what you hear. There are two questions for each extract.

**Announcer:** Extract one.

You hear two friends talking about doing team sports in the schools they went to.

**John:** You did a lot of team sports at school, didn’t you?

**Mia:** Yes, mainly football and volleyball. I was in the school team for both of them. I always felt really healthy from it, and it was a great way of getting to know people well. Some of the people I played with are still people I meet up with regularly. But you were good at sport, too, weren’t you? Didn’t you enjoy it?

**John:** To be honest, I really didn’t like team sports at school, although I did play rugby. It certainly kept me in good shape, and it was a great way of getting to know people well. Some of the people I played with are still people I meet up with regularly. But you were good at sport, too, weren’t you? Didn’t you enjoy it?

**Mia:** To be honest, I really didn’t like team sports at school, although I didn’t play rugby. It certainly kept me in good shape, but what I disliked most was having to spend so much time on it after school. I really wanted to do was get on with homework – which I actually enjoyed – but the rugby practice got in the way. I also hated the competitive side – the constant pressure to win. I’ve spoken to some teammates since then – still people I keep in touch with – and many of them felt the same way.

**John:** Well, I suppose the pressure is sometimes a bit intense. But overall, I think doing team sports really does help you develop skills that are useful in later life. I suppose I’m a naturally competitive person and I get a lot of fun out of playing against teams from other schools.

**Mia:** Yes, that’s all very true, but I just like holding real books. There’s something about how they feel – and sometimes even how they smell – that really appeals. And I like having them on my bookshelves to remind me what I’ve read as I walk past them, and also to show people who visit what I’ve read so they can learn something about me. You can’t do that if what you’ve read is on an e-reader.

**John:** Yes, I’ve hardly used it at all. I still prefer reading printed books.

**Pippa:** Oh, but e-readers are so convenient. You should really try it more. I use mine all the time – on the train on the way to work, on holiday, reading in bed before I go to sleep. You read a lot, don’t you? You’d be able to carry a load of reading material around with you in something that’s the size of a single paperback. And it’s not just books – you can get newspapers and magazines as well. What I particularly like is being able to change the font size so easily. I hate reading books with very small print. Have a go.

**John:** Yes, that’s all very true, but I just like holding real books. There’s something about how they feel – and sometimes even how they smell – that really appeals. And I like having them on my bookshelves to remind me what I’ve read as I walk past them, and also to show people who visit what I’ve read so they can learn something about me. **Announcer:** Extract three.

You hear two people talking about receiving marketing texts on mobile phones.

**Ross:** You’ve got a new job in your company, haven’t you?

**Josie:** Yes, I transferred to the marketing department just a couple of weeks ago. My job’s to send texts to people about new offers and new products.

**Ross:** Oh, I get marketing texts all the time, and I must say that I find it pretty irritating. They tend to come from companies I know nothing about, trying to sell me things I’ve no wish to own. Although I sometimes text back telling them to stop contacting me, the texts just keep coming. I mean, I can understand why companies do it – it’s a really efficient way of keeping people informed. But I wish I could stop it somehow.

**Josie:** Well, our company just sends texts to people who we think would want to find out more about our products. Perhaps they’ve already bought something from us online so we know they might be interested in hearing from us. They’ll have given us permission to send them details as well. And if people tell us to stop contacting them, we always delete their details from our database. Of course, not all companies follow the regulations that have been agreed about marketing texts.

Teacher: Thanks, Kate, for showing us Happening. I’m sure there’ll be lots of questions about it from students.
Sarah: Where did your idea of a newspaper for teenagers come from?
Kate: Well, I used to spend a lot of time reading newspapers when I was at school. But my friends didn’t read them much, even though I knew they were concerned about what was going on in the world. So, I suppose the idea of setting up some kind of newspaper for young people came from that time.

Teacher: Hannah?
Hannah: Why did you go for an online newspaper?
Kate: Well, I did a journalism course at university. I’d also had the opportunity to do a course on website design, and that influenced my decision. It just seemed natural to combine the two, so I designed a prototype of an online newspaper for teens. My main motivation was that I wanted to increase young people’s awareness of current affairs, but I also realised that there might be a chance of making it a commercial success. I felt that there was a big demand for an online newspaper aimed specifically at teenagers.

Jasvinder, your question.

Jasvinder: Didn’t you need a lot of money to get it started?
Kate: Not really, no. I talked to a couple of university friends, and when the course finished we just went ahead. That’s one of the great things about most online business – you don’t need huge amounts of money at the outset. But we did need money to live on, of course. We had real difficulty in persuading banks to lend us anything at all. Every bank we approached was sceptical about whether the project would ever make money. But eventually, we managed to borrow some money from parents and we took the decision to work on it for six months. If we weren’t making money after that, we’d give the idea up.

Teacher: Can I ask a question here? How do you actually make money when people don’t have to pay to access the site?
Kate: All the money comes from advertising. Organisations pay us to put their adverts on the site. When we started we immediately contacted companies, but it was difficult to generate business at first. They were very wary of advertising with us, but as the number of hits we got started to increase – the number of people accessing the site – the number of companies wanting advertising space went up as well.

Teacher: I see, thanks. Er … Hannah, you’ve got another question?
Hannah: Do you think online newspapers will ever take the place of traditional newspapers?
Kate: I doubt it. Being able to access news online is right for some people, but not others. A lot of people want to be able to read a newspaper on the bus or train, or at home away from their computer. So, no, I think they’ll always be a need for traditional newspapers.

Teacher: Any more … Tom?
Tom: What’s been the reaction of teenagers to Happening?
Kate: We averaged about 20,000 hits a day and the number’s steadily growing. We’ve had an increase of about 50% in the last three months alone. When I talk to young people, they seem generally very enthusiastic about the site. And hundreds of comments get posted on our message board each day.

Teacher: And do many people complain about Happening?
Kate: Yes, we get both complaints and praise. In the early days we used to get quite a lot of complaints about our news coverage because it didn’t feature young people’s perspectives enough. We’ve tried to take that on board. So, for example, as you know, a recent big news story has been the protests about the location of a new nuclear power station on the east coast. As part of this, we covered what school students had been doing to protest. We also occasionally get complaints about how well the website works. Young people demand very high standards nowadays.

Teacher: Hannah.
Hannah: Are any young people directly involved in producing Happening?
Kate: Yes, young people get the chance to contribute in various ways. For example, we have a reviews section, which is concerned with films, CDs, DVDs and books. All of the reviews are written by young people.

Teacher: And what future do you see for Happening?
Kate: That’s a good question. First, I’d like to see it expanding. We’ve decided to include a section on celebrities, and also do more on science and technology. For that, though, we need more staff, and that means more money. But the recent increase in hits on the website means that we can charge more for advertising space. So we’re quite optimistic about that. More generally, though, politicians seem to be getting interested in Happening as a place where young people express their views. If I’m right about this, then young people may be able to have an influence on government policies through Happening.

Speaker 2: The nearest I came to living in a big city was
spending two weeks at the home of an old school
friend – her parents own a flat in the centre of
London. It was really convenient, just being able to
hop on a bus or take the underground. At first it
gave me quite a buzz – being somewhere where so
much was going on, but I don’t think I relaxed the
whole time I was there. What got to me was the
constant noise – all day and all night. I also felt a
bit nervous if I was out on my own – especially at
night. Perhaps it was a subconscious awareness that
crime rates are higher in cities than in rural areas. It
was a real relief to get home.

Speaker 1: I grew up in a quiet, remote, rural area, but I’ve lived
here in the heart of the city since I was a student.
The traffic and the noise don’t bother me – I just

In my work and my social life I come into regular

granted the incredible range of entertainment on
offer: theatres, cinemas, nightclub, concerts of all
kinds. As far as I’m concerned, the only downside
is the cost of living – my rent’s nearly twice what it
would be if I moved to a smaller town.

Speaker 3: I’ve never been a great fan of stand-up. But one of
my friends had got a spare ticket for this gig. He
wasn’t someone I’d heard of before, and it was in
a run-down local club, so I wasn’t really expecting
much. As it turned out, I can’t remember the last
time I laughed so much. He had the whole audience
in stitches from the moment he came on stage.

of the world? Where everything is exciting and the
dreary routine of home is a million miles away?

Jane: We've managed to find a pretty strong expat community out here, but I still feel homesick most of the time. I miss my family and friends desperately, the daily contact with people I've known all my life. As a family we're very close-knit, always on the telephone or popping round for this and that. I definitely feel I've lost more than many by moving here. After 18 months we still haven't found our feet and I'm starting to feel like it will be impossible to really settle.

If you look at it logically, KL is a far more exciting place to live ... it's multicultural, there are amazing places to eat and drink ... it's one of the best cities in Asia for shopping, and it's summer all year round. By contrast, Alnwick is pretty dull really ... but my heart's in Northumberland. We would be home like a shot if it wasn't for David's job.

Louisa: In the past I've travelled a fair bit, and I'd always been one for going off the beaten track. I spent a year as a volunteer in Tanzania and another year in Indonesia. I'd also spent several holidays here in Vancouver with my fiancé's family. None of this prepared me for the sense of loss that overwhelmed me on arrival though. It was like a rug being pulled out from under my feet. I didn't know anyone.

Obviously my in-laws and my fiancé were here, but accommodation costs and food are both higher than in Britain, and jobs are not easy to find. She has already returned home and warned me that, however wonderful your new home is, few of my old university friends have had much luck finding work at home either and I can only think of one person who has actually got what I would call a real graduate-level job.

You will hear Lindsay Jones, a recent graduate, talking to a group of students about travelling abroad to find work. For questions 1–8, complete the sentences with a word or short phrase.

Lindsey: After months of searching for work since graduating from university last summer, I've decided to move to New Zealand and leave Britain's jobless economy behind me. Online statistics have shown that I'm not the only one: 10,000 or so people leave Britain annually for New Zealand, plus many more head to Australia or Canada, as well as less traditional destinations for emigrants, such as Germany and Singapore. Despite being a graduate with a good degree from a highly respected university, the only available jobs that I could have applied for in Britain were general, low-level jobs, ones where experience wasn't an issue, and which definitely weren't suitable for a graduate. That being the case, I decided that if I was going to have to work in a shop or as a hotel receptionist, I might as well do it in a different country and as part of a new experience. That's why I'm heading to New Zealand next month equipped with a working holiday visa, though I'm hoping that it won't take me too long to find a 'proper job'.

Lots of people do. The dream of pastures new is realised by thousands of Brits every year ... but the downside is that, however wonderful your new surroundings, it's likely that you will pine for some aspect of home. 35-year-old Jane Foreman knows all about the pain of homesickness. Her husband David's job took her to Kuala Lumpur in Malaysia a year and a half ago, but she is desperate to return home to Alnwick in Northumberland.

I'm really hoping that working in a country with a stronger economy will give graduates like me new life skills and experiences that may help us land a better job when we return to the UK. I guess a lucky few might also find well-paid graduate jobs in their chosen country – but I know that I can't count on that. A US study published recently set out to determine why people take risks. It came to the conclusion that risk and age are correlated. The researchers sampled 500 participants, divided into four main groups: children – adolescents, young adults and the elderly – further dividing them into certain social backgrounds and also by gender. The methodology required participants to resolve a situation by choosing one of two options. One option was 'safer' than the other, but would result in a worse outcome than taking the potentially riskier option.

Participants were told that 600 coins were locked in a box that could be opened in one of two ways. The first option would guarantee that 200 coins in the box would be saved (a 66% loss), and the second option had a one-third chance of saving all 600 coins, but a two-thirds chance of breaking the box and losing all of the coins.

The results showed that social background was not a significant predictor of risk avoidance, with each social group just as likely as the others to pick the so-called 'safe' option. Gender was also a relatively minor predictor of a preference to engage in risk-taking, although male participants were slightly more likely to take the riskier option than their female counterparts.

The results also showed that the most significant predictor of risky behaviour was age, with adolescents more likely to display risk-taking behaviour, often for the thrill of it, than either children, young adults or the elderly. The authors of the study are satisfied these results are proof that risk-taking and the onset of adolescence are linked. Children’s responses showed far more fear of risky situations, and the elderly participants in the study tended to be more sensible, foreseeing problems when presented with a risky option, especially where money was concerned.

When I moved to England from the States, it was one of the first things I noticed. I found it quite shocking, to see grown women call themselves 'girls' and to allow themselves to be called 'girls.' A 'girl' is someone who is not an adult, not a grown-up, is not someone who takes responsibility for herself, she's a child. When you get past a certain age, as a mature adult, you do not want to be treated as a child. In comparison to men, women are still underpaid in Western culture, and are striving to make inroads into a male-dominated society. We should pay attention to the way women are addressed, especially in the workplace, and whether the word 'girl' is used in a derogatory way or not. Of course the same applies to the term 'boys' but you don't throw that word around as often and men do not have a historical disadvantage to deal with.

Throughout my life I have been involved in gymnastics. I first participated in the sport at the age of three, and completed my competitive career at the age of 18. I was a strong and powerful gymnast who did well on the vault and bars, but had more difficulties with the graceful dancing aspect of the balance beam and floor exercise. To me, my larger frame, and muscular physique stood out among most other gymnasts who were petite and graceful. However, this did not stop me from pursuing the sport I loved. Before studying the subject, I knew that gymnastics was mainly an individualised sport but I’d never thought about it being a traditionally female sport. What I’ve learned from my studies is that gymnastics is deemed a feminine sport predominantly because it lacks face-to-face competition and overt aggression. But with the amazing skills and strength that male gymnasts demonstrate, I can see that we are moving away from this gender-typing. Behaviour and participation in the sport seems to be more and more gender-neutral and this encourages both boys and girls to take part.

Gymnastics provides wonderful strength and flexibility training for both male and female, so this can only be a good thing for everyone involved.

The smallpox vaccination procedure was developed by an English doctor named Edward Jenner in the late 18th century, who had noticed that farm labourers who had caught the animal form of smallpox, cowpox, didn’t go on to catch the human form. As a result, Jenner used the cowpox virus to develop a vaccine, a cure against the spread of smallpox in humans. Much later, by 1950, the Pan-American health organisation had successfully put an end to the disease in the majority of the Western world through an international immunisation program. In 1959, the World Health Assembly decided to take steps to defeat smallpox globally. The last recorded case of smallpox was in 1977 in Somalia, and soon after, the disease was declared to have totally disappeared from every country.

Cycling is a great way to get to know a city and, at the same time, to keep fit. There are many amazing cities for biking throughout the world, cities which allow you to explore at ease and safely. Today, you are going to hear about three bike-friendly cities. Let’s start with Amsterdam, which is known as the ‘bikie capital of the world’. According to the latest statistics, 46% of all traffic movements in the city are by bicycle. The city has an extensive network of safe, fast cycle lanes as well as a highly effective theft-prevention programme. Residents or visitors can also rent bicycles. The city council is currently planning a 10,000-bike garage at the main train station. Portland, the second most bike-friendly city in the world, has a bicycle network that connects all parts of the city. This has led to a dramatic increase in bicycle use in the city. The city was also the first in the States to provide adults on low incomes with commuter bicycles as well as lessons on commuting safely. The bikes are all fitted with lights, a lock, a helmet, a pump, tool kits, maps and rainwear. In some neighbourhoods, bike commuters are as high as 9%. Copenhagen, the capital of Denmark, is home to the world’s most successful community cycling programme. In Denmark, almost everybody has a bike, and currently 32% of workers cycle to work. Most of the city’s extensive and well-used bicycle paths are separated from the main traffic lanes and sometimes have their own signal systems. Already one neighbourhood is completely car-free. The city provides public bicycles, which can be found throughout the city centre and used with a returnable deposit of 20 kroner – your money is refunded when you return the bike to one of the many racks.

One of the most difficult things about finding employment these days is the impossible situation of not being able to get a job without experience, and not being able to get experience without a job. I struggled with this after I left school, as did many of my school friends. With the job market the way it is right now, you can’t even get a job waiting tables in a restaurant without at least two years’ experience and good references, regardless of whether you have recognised qualifications or not. My parents would always tell me that the secret to getting a job was to walk into an office, go straight to the manager, look them in the eye, give them a firm handshake and tell them why you deserved a job. That might have worked in the 70s, but things are different now.

One of the ways around this is to apply for an apprenticeship. An apprenticeship gives you hands-on experience in the area you want to work in, and you get paid while you are learning a profession. Nine months after I left school, I was lucky enough to get an apprenticeship as a trainee engineer for a firm in my hometown. I didn’t know anything about engineering, but my supervisor offered valuable support and showed me the basics. I received a lot of training in engineering theory and general boat and ship design, as well as a number of health and safety courses, before I was ready to enter the workshop for the first time.

After this initial insight into the job, I was able to learn more difficult and technical tasks, and was soon working on my own. I gained my master engineer’s certificate after 12 months of regular classes and training, and six months later I was also given a team of trainees to supervise and team-building days to organise. I am now giving something back as an educator of regular classes and training, and six months later I was also given a team of trainees to supervise and team-building days to organise. I am now giving something back as an educator of new trainees.

Announcer: Exam practice, Listening Part 1. You will hear three different extracts. For questions 1–6, choose the answer (A, B or C) which fits best according to what you hear. There are two questions for each extract.

Announcer: Extract one. You hear a woman asking her friend about a change in his transport habits.

Amy: What's happened to you? You never used to walk anywhere.

Joe: I know, but now I've turned over a new leaf.

Amy: I don't believe it. You always used to get us to drive you everywhere, even when you could have caught a bus or a train.

Joe: Yeah, well a couple of weeks ago, just about everyone seemed to be away and I had to get taxis every day. You know I have no idea about public transport. Even though I was often just travelling very short distances, it was costing me an absolute fortune. One night, it was really late and I got fed up of waiting for a taxi, so I walked home. It only took me about ten minutes longer than it would have taken me by taxi. I really felt quite pleased with myself because I'd saved the price of a pizza. I realised that there were a lot of better things I could be doing with my cash than blowing it on taxis.

Amy: Why don't you buy yourself a car?

Joe: Yeah, you're right. Actually I've started taking driving lessons, and I'm saving what I would have spent on taxi fares – eventually I'll be able to afford my own car. In the meantime, I'm enjoying walking – it's really good exercise.

[repeat]

Announcer: Extract three. You hear part of an interview with a man who is talking about travelling on the London Underground.

Interviewer: Do you remember the first time you went on an underground train?

Sam: Yeah, I was about five, I think – I remember it was my first time in London. I didn't have the faintest idea what 'the Tube' was. I couldn't believe it when we stepped on the escalator and started going down into the ground. That was so thrilling for a little kid. I remember giggling and waving at the people on the up escalator. At one point I got so carried away that I almost toppled but luckily my dad was holding my hand. On the platform, I remember staring at the black tunnel – then there was a whooshing noise, a warm wind and suddenly there was the train. The doors slid open and hundreds of people spilled out. That was the only thing that was a bit scary.

Interviewer: Do you still get like that?

Sam: No, I'm pretty blasé now. It's still awe-inspiring though, when you think about it. All the business types, tourists, clubbers and buskers rushing about in those hot airless tunnels – because it's simply the best way to get from A to B. It's one of the great London institutions – no wonder you see all the merchandise covered in logos and maps on sale everywhere these days – the London Underground has become an icon.

Speaker 1: They've got absolutely nothing to do with reality. They're just fantasies for people who've got no life of their own ... if they had, they wouldn't waste their time watching these programmes! I just see them more as entertaining game shows! They're all contests of some kind, whether the prizes are...
money, love, jobs, or whatever. And these game shows are wonderfully entertaining in the same way a great trashy novel feels so good during the summer. We all need to relax and unwind from time to time. And in the world of reality TV, there’s something for everybody to enjoy.

Speaker 2: Although I’m quite ashamed of it and would never admit it to my friends, I adore reality TV programmes – they’re definitely a guilty pleasure for me. I even prefer some of them to normal scripted shows. It seems the drama on these shows is addictive. It’s compulsive viewing – like a car crash – you just can’t tear your eyes away from it. But I really wish they were more real than they are. I don’t like the fact that the producers feel the need to re-shoot certain scenes or to manipulate story lines.

Speaker 3: I love reality TV, although I’m not too sure how much is unscripted, but it is interesting to watch how others react to a new situation, how they work together with other people they’ve never met, and how they find a way to find common ground with people they would have never spoken to if not brought together by the show. I think group dynamics are fascinating … especially when they’re complete strangers. These shows may not be everyone’s cup of tea but I certainly enjoy them.

Speaker 1: While I’ve seen many successful start-ups with friends and family, I have seen more heartache and failures. The friendships won’t last if there is a fall out. I’ve always been told, ‘Never go into business with friends or family’ I think that’s basically good advice. Our personal relationships are too precious to risk in this way.

Speaker 2: What I’d suggest is that you bring in other people from outside your social circle and give them real responsibility. If the strain of cashflow or conflicting goals gets too great, that will give you more of a buffer. And keep things in perspective, so that the friendship stays first.

Speaker 3: Treat this venture as you would when dealing with strangers, so get everything in writing. I’d strongly advise having each potential partner – and their spouses – put down what they expect from their participation in the business. Build a comprehensive business plan based on these expectations. Also, have an attorney review all contractual agreements. ‘Oh, we’re such good friends we don’t need an attorney’ will never hold up in a court of law – only a contract holds up! Good luck!

Speaker 4: Deciding whether or not to partner with a friend or family member is a tricky question. Businesses are tough. You don’t want to mess up your relationship. Consider whether a dispute with your partner would affect your ability to be friends with them, and vice versa. If they tend to get pretty emotional in a disagreement, you are probably better off choosing someone else.

You will hear part of a radio interview in which two psychologists, Stella Burrows and Simon Peres are giving advice to office workers. For questions 1–6, choose the answer (A, B, C or D) which fits best according to what you hear.

Interviewer: Good afternoon. Today, we’re looking at ways of getting on well with work colleagues. With me I have Stella Burrows and Simon Peres, both psychologists, who have recently published an article on the importance of workplace personalities in the office environment. Stella and Simon, welcome to the programme.

Simon: Hello.

Stella: Hi.

Interviewer: So, what do you mean by workplace personalities?

Stella: Well, we all know the classic office characters, don’t we? I’m talking about the smooth talker who can be seen dashing around everywhere and gets paid a lot, but no one is quite sure what they actually do. Every person has their own office persona.

Interviewer: Are you saying that people behave differently at their place of work from how they do at other times?

Simon: Yes, that’s exactly what we’re saying – your office persona will be slightly, or indeed very, different from your home-life character. If you’re a live-to-work type, it’s a good idea to think about how your character comes across to your colleagues – perhaps other people are inspired by your efforts, or on the other hand, they may see you as a goody-goody. Your boss is likely to value the fact that you put so much effort into your work, although they may have started taking it for granted that you arrive early, stay late and never put a foot wrong. In other words, you may seem too good to be true.

Interviewer: That’s a live-to-work type. What about the work-to-live type?

Stella: Obviously they’re very different – in fact they’re...
quite literally opposite in every way. If you are a work-to-live type, your colleagues may be frustrated that you don’t seem to be pulling your weight, or they may be fed up of making excuses for your being late. Your boss may secretly be impressed at your lack of interest in joining the rat race, but still be irritated by your lack of commitment and effort.

Interviewer: But surely these are extreme examples!
Simon: Well, sure, most people are not at either of the two extremes we’ve described – they’re probably somewhere in the middle. So we’ve come up with a number of tips which will help everyone to have a healthier work-life balance and so be a good work colleague.

Interviewer: OK, let’s have some concrete ideas for our listeners.
Stella: Well whatever you do, don’t take the credit for someone else’s work – especially to try and impress your manager in meetings. Be prepared – make sure you are up-to-date with new projects and have plenty of your own ideas. If you’re working on a team project, make sure you pull your weight – don’t hide in the group and expect them to carry you. Take your job seriously – regardless of what you do, and other people in your workplace will respect and value their jobs. If you undermine what you do, you are undermining their job too. This is a surefire way to drive your colleagues mad.

Interviewer: How about on the more personal front? Do you have any advice there?
Simon: Well, yes, there are some very simple do’s and don’ts that are just common sense, for example, don’t gossip about your colleagues behind their backs. And, if you can see that one of your colleagues is upset about something, ask if there’s anything you can do to help. Also, be very careful about telling other people what you think they should do, unless, of course they actually ask you for your opinion. You could easily lose colleagues’ respect if you appear to be superior.

Interviewer: Stella and Simon, thank you so much for your time today. Everything you’ve said makes perfect sense. Let’s hope that some people’s office relationships improve as a result.

Announcer: Now listen to Part 3 again.

Is exercise your idea of a nightmare? Do you think it’s impossible to keep fit and enjoy yourself at the same time? I hope I can convince you otherwise. Get your inspiration from the physical activities that you already do and take pleasure from. There are things that are part of your regular everyday life that are seriously good for you. For people with busy lives it can be difficult to take the time out to go to a special place to exercise. You don’t have to sacrifice any of that precious time at all! Think about making some minor adjustments to get your heart rate up while you go about your day. We all use the stairs. Learn to love them and never take the elevator. Challenge yourself to run up the stairs. Take them in double time. When you’re driving, park a little way from your destination and walk the rest. Get off the bus or the train one stop early and do the same. If you love shopping, shop till you drop – it’s good for you, if not for your wallet. If you’re tired to the home most of the day, don’t fear. How do you feel about dancing? Even if you’re just rocking out in your kitchen, you’re activating your muscles and enjoying the experience. Or, have you tried rollerblading, cycling or swimming? If you have an indoor pool nearby, swimming is a wonderful aerobic activity that can both relax you and burn off some calories. It’s no-impact, which protects your joints from damage too. In good weather, cycling or rollerblading are a fun way to get out and about. Obviously the extortionate fees charged by many gyms can put people off becoming members. Don’t let that be your excuse not to exercise. Many high schools have tracks that anyone can use and they’re a perfect place to walk, jog, or run ... alone or with company. City parks are also great spots to take a leisurely stroll. Maybe the all-American pastime of baseball is your favorite sport. Don’t hang back there as a spectator. Sports are not just for the pros. Get together with some of your friends and neighbours and start some old-fashioned neighbourhood ball games. The entire neighbourhood can join you in your quest for improved fitness! You’ll be doing them a favour. Physical activity is often more fun with other people. And who better than people you already know? You get to catch up with gossip and they won’t let you quit when you’re low on motivation. Got some ideas now? Remember, when you find the right exercise for you, it’ll be no pain and all gain. Have fun!

Speaker 1: Iceland wants investigative journalism to be free of unjustified interference by the rich and powerful. Although I thoroughly approve of the idea, the difficulty is that the rich and powerful also profit from freedom of expression, by publishing material which is either a gross infringement of the human rights of an individual, or misinforms the general public on important issues. Allowing international media organisations to say what they like, free from any accountability, creates a new form of totalitarian state. Iceland risks creating ‘libel tourists’ – media corporations that want to profit, without fear of correction or sanction, at the expense of the individual.

Speaker 2: It’s a great idea. If one European country revises its laws to meet high free-speech standards, then others may do so too. Currently, plenty of countries in Europe restrict free speech. But, using the Internet, disidents can speak freely to their supporters back home. From now on, if they publish from Iceland, opponents will find it difficult to close them down through expensive lawsuits. And, critically, sources and contacts will remain hidden. There are other benefits too. This might even make our politicians take free speech more seriously.

Speaker 3: I wholeheartedly support Iceland’s move, but will Iceland’s proposed legislation make any difference in the long run? I doubt it. For every move on the chessboard of free speech there is an equal and opposite move which negates openness. Access to Icelandic servers will be blocked by countries who are against the idea, leaving the technologically literate to use proxy servers to actually access the information.

Speaker 4: This is a fantastic and innovative proposal that will undoubtedly help certain news organisations and possibly individual journalists, but I honestly don’t think from the perspective of responsible news organisations that’s going to make much difference. They will still be used in their own countries under their own outsourced libel laws.

Speaker 1: When I left school 30 years ago, there was plenty of work. There was hardly any youth unemployment, but there were basically three work possibilities for 16-year-old girls like me. You could do shop work, go into the local textile factory, or do admin in an office. I found work in the head office of a big insurance firm. It was a little on the dull side, but it was quite well paid and they trained me in general office skills and there was quite a pleasant working atmosphere there. Lots of banter, you know. I’m still in touch with quite a few people from the office. Obviously, at the time, I was still living with my parents, so I didn’t need a great deal of money. And the work was quite varied – I spent most of my time on the phone dealing with customers’ enquiries. I went on maternity leave and never went back. I thought about it when my children started school, but everything’s changed now. The office where I worked has gone and the work I used to do has moved to a call centre in India.

Speaker 2: My dad retired last year – he’d been with the same company all his working life. He’d started with the company straight after leaving school and retired when he was 65. That’s pretty unusual these days. I’m only just coming up to 30 and I’ve already been made redundant twice. The same goes for lots of my friends, so it doesn’t bother me that much, you just accept it and get on with your life, don’t you? But my dad’s really shocked. People of his generation would have thought the world had ended if they’d lost their job at any age. I suppose it’s more worrying if you find yourself out of work in your late 40s or your 50s – it’s so much more difficult to find new employment at that age. At my age, as long as you’re prepared to retrain, you know, pick up new skills, you’re almost certain to find something. Having said that, I’m probably one of the lucky ones – I’m experienced and well qualified and I don’t really mind what kind of work I do.

Speaker 3: My family has run this farm for as long as anyone can remember – at least eight generations. My father took it on from his father who had taken it over from his father, my great grandfather. In those days – the 1920s – 20 men were employed
here. Now there are just five of us – my wife and I, our foreman and two farm hands who’ve been with us for over 30 years. That’s in addition to a lot of expensive tractors and other hi-tech gear of course. I love farming, but I don’t think my children will want to take over from me. You have to work all hours of the day – often seven days a week – I haven’t had a proper holiday for five years – it’s a very hard life. And it isn’t as if there are great financial compensations. Margins are very tight today, largely because the supermarkets dictate the prices we get for our produce – sometimes there’s barely enough money to cover costs. Most kids these days think farming’s a mug’s game.

Speaker 1: Obviously it’s not just the fuel situation that’s worrying us: we know the whole economy’s in a mess – one or two friends lost their jobs already and couldn’t keep up their mortgage repayments and have had to move out of their homes. But, I think what’s hit my family the hardest is the increase in the price of fuel of all kinds, you know, from running the family automobile to keeping the house heated during the winter months. I guess here in the States, we’ve never had to worry over much about the cost of gas. Now all of a sudden we’re beginning to realise that it’s not going to last forever. We’re having to import oil from other places – that’s one of the reasons prices are going up so fast. What this all means to us as a family is that we’re having to generally keep a check on our spending – you know, using our car less – going by bus or train if we can – like I don’t drive to work any more. Getting stuck in those early-morning jams turned out real expensive.

Speaker 2: For us it has to be the cost of putting the kids through higher education. Here, people finance their college fees through debt these days – but loans are not as easy to come by as they were a few years ago. It’s well known that college fees are going up at an alarming rate. I read an article the other week which said that in the near future, college education may become unaffordable to many American families. It’s not just the fees, it’s the accommodation, food, books. Both of our boys are at college – one graduates next year, our younger son Jake still has two years to go. They both do a few hours’ part-time work a week to help with their living costs. For the moment, we can afford it, but if the general economic situation goes on getting worse, who knows what may happen. Some of our friends are already getting jumpy and talking about taking their kids out of college. We’re not quite at that stage yet, but if my husband or I got laid off, what then? We don’t think it’s very likely, but these are strange times – you get the feeling that with the economy in free fall, anything could happen.

The importance of plants to our everyday lives cannot be overestimated. On a fundamental level, plants provide us with the basis of life. They take sunlight and carbon dioxide and turn them into oxygen and in doing so provide us with the air we breathe. They also take water and slowly release it back into the atmosphere. In a more practical sense, most of us depend on plants for protection and shelter. Timber from trees is used to build many of our homes and cotton plants supply us with the material from which we make our clothes. Throughout the world, much of our medicine is also based on plants. Over 5,000 species of plant, for example, are used in traditional Chinese medicine. Another example is the widely used drug aspirin, which originates from the willow tree. A cure for cancer called taxol has been found in the bark of a yew tree. Aloe and jojoba plants provide us with many of the ingredients for cosmetics. The aloe plant soothes the skin and the jojoba plant produces oil used in shampoos and soaps. Common food crops such as corn can also be used to make products such as soap, glue and plastics.

And, of course, plants provide us with food. Both vegetarian and meat-eating diets are dependent on plants. Animals used in food production need food from grass, grains and vegetables, too. As a result, the pressure on food supplies is huge. As populations increase, farmers are under increasing pressure to grow crops that are resistant to water shortages and have better protection and shelter. Speaker 1: Here at the Millennium Seed Bank, we work with 50 partner countries. We collect seeds from alpine, coastal and island ecosystems, as these are most vulnerable to climate change. Plants from arid locations can tolerate being dried out and frozen for many years, but those from moist tropical areas are harder to store. Our initial aim was to store seeds from all the UK's native plants. We've now achieved this, apart from a few species that are either very rare, or whose seeds are particularly difficult to store. What's even more remarkable is that, we've achieved the goal of banking seeds from 10% of the world's flora. Our next target is to conserve 25% of the world's plant species by 2020.

Speaker 2: Throughout the country, we have inherited a legacy of first-class public parks. Today, every town has a park to be proud of, and many are historically important. The Victorians invented and shaped the concept of public parks and this influenced the creation of parks in America and elsewhere. Recognising the need for places to relax, and to exercise, the top landscape designers of the day were commissioned to lay out new parks. My research clearly shows that the promoters and champions of the first public parks also saw them as a way of boosting the local economy, by making towns attractive places to work and live. These parks were conceived as places where all sections of society could enter free of charge and mix freely.

Speaker 3: We all need power and I believe micro-generation is the way forward. It’s quiet and efficient and I expect to earn back what I pay out in a very short time because we’re located on the windy coastal road. I farm beef cattle, and last year the electricity bill was £1,500. Next year, I’m hoping to pay nothing and make a profit by selling some back to the National Grid. So, if we can save money and produce surplus energy, I’ll be very happy. Don’t forget, we’ve been harnessing wind power since the 12th century, to mill grain and pump water, but now wind will play an even more important role as we face rising fuel costs and a growing population.

Speaker 4: All the animals that have arrived from the overnight emergency clinic or that were brought in early are examined first. If they need surgery or hospitalisation, they’ll be admitted. The emergency doctor usually calls to discuss cases from the emergency clinic. This is followed by the morning rounds – all patients in the clinic are examined and the owners phoned with progress reports. At the same time, animals being admitted for surgery are examined and the procedure discussed with owners. After they are admitted, technicians take blood samples and then it’s time for appointments or surgery. Personally, I like to do surgery early in the day, as this allows patients to recover throughout the day while there are plenty of staff to monitor progress.

Speaker 5: Here’s what I’d suggest doing in the next week or so. Clip your hedges, and prune your shrubs, cutting out dead, diseased, branches. Plant shrubs and trees while the soil is still warm. Aerate lawns and remove moss and dead grass to encourage healthy growth next season. Incidentally, now is an ideal time to put down a new lawn. Next, check the readiness of fruit and vegetables. Apples and pears should be gently lifted with the hand; if the stalk remains on the fruit but parts easily from the tree, it is ready to be picked. Sweetcorn should be ripe enough to harvest, but remember that it deteriorates quickly, so you should use it as soon as possible after picking.

Speaker six: Now listen to Part 4 again.

In a world where we rely on being online and contactable anytime and anywhere, it is hard to imagine a time when letters were our only means of communication, a time when a letter was something special and meaningful both for the letter writer and for the person receiving it. Letter-writing took time and concentration. For many it was a tedious process, which involved lots of sheets of paper, lots of ink and rewrite upon rewrite, as without a ‘delete’ button, you would have to start your letter all over again if you made a mistake. However, for others, such as myself, it was a rich form of expression, one where you could take your time and really think about what you wanted to say. You could go over your letter until it was perfect and if you had a heartrending message for a loved one for example, you could make it as romantic, heartfelt and soppy as you wanted.

The advent of the telephone usurped letter writing as it was so much more immediate. You could pick up the phone, talk to the person at the other end in real time and get an immediate response. As the Internet became more and more important, our ways of communication changed dramatically again. Although more and more people own smartphones, they actually use them less to make calls. Faced with a proliferation of ways to communicate such as email, video conferencing, instant messaging, social networks and apps, conventional phone calls and writing letters are becoming increasingly obsolete.

In our age of instant communication, the opportunities to reach out are endless. You can keep in touch with distant relatives or friends in foreign countries and can share your special moments with them in a heartbeat. However, as letter-writing has become rarer, if you do decide to take the time and make the effort to write one, chances are it will be very much appreciated.

Interlocutor: I’d like you to discuss some of the ways in which people try to protect the environment. Think and talk about the benefits of the different ways and then decide which change to people’s lifestyle would be most difficult to make.

Man: We can hire bikes by the hour or the day in London, can’t we? You collect them at one place at the beginning of your journey, and then leave them at another place near the end. They’re trying to stop people using their cars. I think they’re a great idea – and cycling helps people to keep fit.

Woman: I agree they’re a good idea – but it often rains in London and there aren’t many cycle lanes, so cyclists are involved in quite a few accidents.

Man: Mmm. What about the idea of recycling plastic?

Woman: Yes, people have picked up on this idea very quickly, haven’t they? I know my family were very keen on it. It seems such an obvious thing to do.

Man: It does, yes – we’ve always done it too, but I remember hearing on the news recently that we’re recycling more plastic than our industries can reuse. So they’re now exporting what we can’t use to other countries.

Woman: Seems crazy. doesn’t it? It must cost a fortune to export.

Man: You’re right. The issue of so-called food miles is being taken much more seriously than it was a few years ago. We do always try to buy local produce if we can. That’s also a good way of supporting local farmers.

Woman: True, but what about people who live in cloudy countries?

Man: As long as the sun shines for part of the time – it at least means people use less conventional fuel like electricity or gas.

Woman: One of my favourite ideas is getting people to buy all their fresh fruit and vegetables from local shops. I’m sure we’d all be a lot healthier if we did.

Man: I agree, but sometimes fruit and vegetables are grown in other countries and are brought here by air, and planes are some of the worst air polluters.

Woman: And not only that, the fruit and vegetables are more expensive because they’ve had to travel so far.

Woman: And not only that, the fruit and vegetables are more expensive because they’ve had to travel so far.

Speaker 1: In my opinion, the answer has to be electricity and electrification. I know electricity is more of a discovery than an invention, and also that we’re not talking about a single event – electricity is still being introduced in many parts of the world. For me, the reason it’s so important is that without electricity, many of the other inventions people mention would not have been possible, like radio and television, computers or the Internet. Even many medical advances would have been far more difficult without the simple benefit of electric lighting. So much of modern life depends on electricity: lighting, heating, food production, transport, healthcare, etc., etc. The list is endless. Nothing else even comes close.

Speaker 2: So the real answer is that the product that we just could not survive without and that has allowed us to develop at a faster rate than if it hadn’t been there is, in my opinion, the discovery in 1928 of penicillin by Sir Alexander Fleming. This not only marked a period of great medical advance, it saved countless lives, including people who have gone on to contribute to our cultural evolution. Today the average life expectancy of a human in the developed world is far greater than before we had antibiotics and this increased lifespan allows us as individuals to contribute far more to the world.

Speaker 3: The most important invention over the last 100 years must be the microchip. It just goes to show the incredible power of tiny things. Smaller than the smallest coin, the chip is quite literally the brain, heart and nervous system of every digital device on the planet. It powers computers, mobile phones, washing machines, cars and satellites. It is used in the design of space stations, it guides planes in for a safe landing, it makes it possible for us to watch hundreds of TV channels, and enables teenagers every day to log on to the Internet and chat with somebody half a world away. Since the widespread introduction of the microchip in the early 1970s, there have been more scientific breakthroughs than in any other period of time, due in large part to the awesome computing power this thin silicon wafer has brought us.
